Automatic vs. manual curation of a multi-source chemical dictionary: the impact on text mining

Kristina M Hettne^{*1,2}, Antony J Williams³, Erik M van Mulligen¹, Jos Kleinjans², Valery Tkachenko³ and Jan A Kors¹

Correction

In 'Automatic vs. manual curation of a multi-source chemical dictionary: the impact on text mining' (Hettne et al. *Journal of Cheminformatics* 2010, 2:3) [1], the name of the automatically curated dictionary is identified as 'Chemlist'. CHEMLIST is a trademark that the American Chemical Society has used for many years to identify its Regulated Chemicals Listing (CAS) database. To avoid future confusion, the 'Chemlist' dictionary mentioned in this article has been renamed to 'Jochem.'
