DOI 10.1007/BF01575619**

On page 409 of Baker (1990), where the Boltzmann-Matano equation is presented, the term C_M in the equation was incorrectly described as the Matano interface. Instead,

C_M is the concentration at either the minimum or maximum along the diffusion profile whose origin is at the Matano interface, where x is set to 0. This mistake is only in the explanation of the term C_M in the equation and does not modify any results of Baker (1990).

The online version of the original article can be found under doi:[10.1007/BF01575619](https://doi.org/10.1007/BF01575619).
