This work is protected under copyright by Elsevier Inc., and the following terms and conditions apply to its use:

Photocopying

Single photocopies of single chapters may be made for personal use as allowed by national copyright laws. Permission of the Publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Permissions may be sought directly from Elsevier's Rights Department in Oxford, UK: phone: (+44) 1865 843830, fax: (+44) 1865 853333, e-mail: permissions@elsevier.com. Requests may also be completed on-line via the Elsevier homepage (<http://www.elsevier.com/locate/permissions>).

In the USA, users may clear permissions and make payments through the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA; phone: (+1) (978) 7508400, fax: (+1) (978) 7504744, and in the UK through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK; phone: (+44) 207 631 5555; fax: (+44) 207 631 5500. Other countries may have a local reprographic rights agency for payments.

Derivative Works

Tables of contents may be reproduced for internal circulation, but permission of the Publisher is required for external resale or distribution of such material. Permission of the Publisher is required for all other derivative works, including compilations and translations.

Electronic Storage or Usage

Permission of the Publisher is required to store or use electronically any material contained in this work, including any chapter or part of a chapter.

Except as outlined above, no part of this work may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the Publisher.

Address permissions requests to: Elsevier's Rights Department, at the fax and e-mail addresses noted above.

Notice

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

------------------------	----

Exploring Quantum Matter with Ultracold Atoms in Optical Lattices

Immanuel Bloch and Markus Greiner

1. Introduction	2
2. Optical Lattices	3
3. Bose-Einstein Condensates in Optical Lattices	10
4. Bose-Hubbard Model of Interacting Bosons in Optical Lattices	20
5. Collapse and Revival of a Macroscopic Quantum Field	30
6. Quantum Gate Arrays via Controlled Collisions	34
7. Outlook	40
8. Acknowledgements	43
9. References	43

The Kicked Rydberg Atom

F.B. Dunning, J.C. Lancaster, C.O. Reinhold, S. Yoshida and J. Burgdörfer

1. Introduction	50
2. Realization of the Impulsive Limit	53
3. Effect of a Single HCP	60
4. Effect of Multiple HCPs	71
5. Phase-Space Localization	88
6. Outlook	98
7. Acknowledgements	100
8. References	101

Photonic State Tomography

J.B. Altepeter, E.R. Jeffrey and P.G. Kwiat

1. State Representation	107
2. Tomography of Ideal Systems	122
3. Collecting Tomographic Measurements	129
4. Analyzing Experimental Data	142
5. Choice of Measurements	149
6. Error Analysis	153

7. A Complete Example of Tomography	154
8. Outlook	156
9. Acknowledgements	157

Fine Structure in High-*L* Rydberg States: A Path to Properties of Positive Ions

Stephen R. Lundeen

1. Introduction	162
2. Experimental Methods	166
3. Theoretical Methods	176
4. Results	192
5. Summary and Outlook	201
6. Acknowledgements	202
7. References	203

A Storage Ring for Neutral Molecules

Floris M.H. Crompvoets, Hendrick L. Bethlem and Gerard Meijer

1. Introduction	210
2. Manipulating Polar Molecules	212
3. Manipulating Polar Molecules in Phase Space	224
4. A Prototype Storage Ring for Neutral Molecules	233
5. Longitudinal Focusing and Cooling of a Molecular Beam	248
6. Dynamics of Molecules in the Storage Ring	257
7. Design of a Sectional Storage Ring	273
8. Conclusions and Outlook	283
9. Acknowledgements	283
