Foreword by L.E. Cross .....	v
Foreword by S.B. Lang .....	vii
Preface .....	ix
Contents .....	xi
1. INTRODUCTION: CHARACTERISTICS OF FERROELECTRICS .....	1
1.1. Structural symmetry .....	1
1.2. Spontaneous polarization and pyroelectric effect .....	4
1.3. Ferroelectric domains and hysteresis loop .....	7
1.4. Ferroelectric Curie point and phase transitions .....	11
1.5. Thermodynamics of ferroelectricity .....	16
1.5.1. Equations of state .....	17
1.5.2. Paraelectric phase .....	18
1.5.3. Second-order phase transitions or continuous phase transitions ( $\xi > 0$ ) .....	18
1.5.4. First-order phase transitions ( $\xi < 0$ ) .....	22
1.6. Piezoelectric equations and pyroelectric coefficients .....	25
1.6.1. Piezoelectric equations .....	25
1.6.2. Pyroelectric coefficients .....	29
1.7. Electrostrictive equations .....	32
References .....	34
2. METHODS FOR MEASURING THE PHYSICAL PROPERTIES OF FERROELECTRIC MATERIALS .....	37
2.1. Determination of the dielectric properties of ferroelectrics .....	37
2.1.1. Dielectric constants and dielectric spectrum .....	37
2.1.2. Thermally stimulated depolarization current (TSDC spectrum) .....	50
2.2. Determination of the piezoelectric, electrostrictive and pyroelectric properties of ferroelectrics .....	52
2.2.1. Determination of dielectric, piezoelectric, and elastic constants on the basis of IRE standards .....	53

2.2.2. Measurement of piezoelectric constants by a static (or quasi-static) method . . . . .	60
2.2.3. Measurement of electrostrictive coefficients . . . . .	64
2.2.4. Measurement of pyroelectric coefficients . . . . .	68
2.3. Measurement of the optical and electrooptical properties of ferroelectrics . . . . .	73
2.3.1. Optical birefringence in ferroelectrics . . . . .	73
2.3.2. Optical absorption spectrum . . . . .	75
2.3.3. Methods of measuring electrooptic coefficients . . . . .	78
2.3.4. Measurement of the nonlinear optic coefficients . . . . .	92
References . . . . .	99
3. PEROVSKITE-TYPE FERROELECTRICS: PART I . . . . .	101
3.1. Physical properties and processing of piezoelectric ceramics with perovskite-type structure . . . . .	104
3.1.1. Physical properties of BaTiO <sub>3</sub> , PbTiO <sub>3</sub> , PZT, niobates, etc. . . . .	104
3.1.2. Conventional processing of piezoelectric ceramics . . . . .	112
3.2. Compositions and modifications of piezoelectric ceramics . . . . .	121
3.2.1. Effects of the composition and grain size on properties . . . . .	121
3.2.2. Modification of piezoelectric ceramics . . . . .	129
3.2.3. Some examples of practical piezoelectric ceramics . . . . .	143
3.3. Stability of piezoelectric ceramics . . . . .	146
3.3.1. Duration stability . . . . .	147
3.3.2. Thermal stability . . . . .	152
3.4. Actuators: recent applications of piezoelectric ceramics . . . . .	154
References . . . . .	159
4. PEROVSKITE-TYPE FERROELECTRICS: PART II . . . . .	163
4.1. Transparent ferroelectric PLZT ceramics and their applications . . . . .	164
4.1.1. Composition and phase diagram of PLZT . . . . .	164
4.1.2. Processing of transparent ferroelectric ceramics . . . . .	168
4.1.3. Physical properties and applications of PLZT . . . . .	171
4.2. PTC ceramics of barium titanate . . . . .	193
4.3. Perovskite-type ferroelectric single crystals . . . . .	196
4.3.1. BaTiO <sub>3</sub> single crystal . . . . .	197
4.3.2. KNbO <sub>3</sub> single crystal . . . . .	201
4.3.3. KTa <sub>1-x</sub> Nb <sub>x</sub> O <sub>3</sub> single crystals . . . . .	204
4.4. Ferroelectric thin films . . . . .	206
References . . . . .	210

5. LITHIUM NIOBATE AND LITHIUM TANTALATE . . . . .	217
5.1. Structure and ferroelectricity of $\text{LiNbO}_3$ and $\text{LiTaO}_3$ . . . . .	217
5.2. Single crystal growth . . . . .	221
5.3. Piezoelectric, pyroelectric, electrooptical properties and applications of $\text{LiNbO}_3$ and $\text{LiTaO}_3$ . . . . .	224
5.3.1. Piezoelectric properties and their applications . . . . .	224
5.3.2. Pyroelectric properties and their applications . . . . .	230
5.3.3. Electrooptical properties and their applications . . . . .	231
5.3.4. Nonlinear optical properties and their applications . . . . .	235
5.4. Photorefractive effects in $\text{LiNbO}_3$ . . . . .	236
References . . . . .	242
6. FERROELECTRIC TUNGSTEN-BRONZE-TYPE NIOBATE CRYSTALS . . . . .	247
6.1. Crystallographic structure of tungsten-bronze-type niobates . . . . .	247
6.2. Barium sodium niobate and its derivative single crystals . . . . .	250
6.3. Strontium barium niobate crystals . . . . .	254
6.4. Potassium lithium niobate crystals . . . . .	262
6.5. Potassium sodium strontium barium niobate (KNSBN) crystals . . . . .	263
6.6. Lead barium niobate (PBN) crystals . . . . .	272
References . . . . .	274
7. KDP FAMILY, TGS FAMILY AND OTHER WATER-SOLUBLE FERROELECTRIC CRYSTALS . . . . .	277
7.1. KDP family ferroelectric crystals . . . . .	277
7.1.1. Structure and spontaneous polarization . . . . .	277
7.1.2. Physical properties and applications of KDP family crystals . . . . .	280
7.1.3. Isotope effect in KDP family crystals . . . . .	283
7.1.4. Growth of KDP crystals . . . . .	284
7.2. TGS family ferroelectric crystals . . . . .	286
7.2.1. Structure and spontaneous polarization of TGS . . . . .	286
7.2.2. Physical properties of TGS family crystals and their applications . . . . .	289
7.2.3. Growth of TGS crystals . . . . .	292
7.3. Other water-soluble ferroelectric crystals . . . . .	293
7.3.1. Rochelle salt . . . . .	297
7.3.2. Sodium nitrite . . . . .	298
References . . . . .	299

8. OTHER FERROELECTRIC CRYSTAL MATERIALS .....	301
8.1. Bismuth titanate .....	301
8.2. Ferroelectric-ferroelastic crystal gadolinium molybdate ..	307
8.3. Lead germanium oxide .....	313
8.4. Ferroelectric semiconductor SbSI (antimony sulphoiodide) family .....	317
8.5. Potassium titanyl phosphate (KTiOPO <sub>4</sub> ) family .....	321
References .....	325
9. ORGANIC FERROELECTRIC MATERIALS AND PIEZOELECTRIC COMPOSITES .....	329
9.1. Polyvinylidene fluoride films .....	330
9.1.1. Structure and piezoelectricity of PVDF .....	330
9.1.2. Pyroelectric and ferroelectric properties of PVDF and P(VDF-TrFE) .....	337
9.1.3. Electrooptic and nonlinear optic effects in PVDF and P(VDF-TrFE) .....	339
9.1.4. Application of ferroelectric polymer films .....	340
9.2. Composites of polymers with piezoelectric ceramics .....	341
9.2.1. Connectivity and piezoelectric coefficients of a diphas piezoelectric composite .....	342
9.2.2. Fabrication and properties of piezoelectric composites	345
9.3. Ferroelectric liquid crystals .....	350
9.3.1. Phase and structure of liquid crystals .....	350
9.3.2. Electrooptic effects in ferroelectric liquid crystals ...	355
References .....	359
Author index .....	363
Subject index .....	379
