Contents

Preface	xi
Chapter 1 Introduction and Overview	1
1.1 Related Time Series,	1
1.2 Overview: Dynamic Regression Models,	7
1.3 Box and Jenkins' Modeling Strategy,	15
1.4 Correlation,	17
1.5 Layout of the Book,	21
Questions and Problems,	22
Chapter 2 A Primer on ARIMA Models	24
2.1 Introduction,	24
2.2 Stationary Variance and Mean,	27
2.3 Autocorrelation,	34
2.4 Five Stationary ARIMA Processes,	39
2.5 ARIMA Modeling in Practice,	49
2.6 Backshift Notation,	52
2.7 Seasonal Models,	54
2.8 Combined Nonseasonal and Seasonal Processes,	57
2.9 Forecasting,	59
2.10 Extended Autocorrelation Function,	62
2.11 Interpreting ARIMA Model Forecasts,	64
Questions and Problems,	69

Case 1	Federal Government Receipts (ARIMA)	72
Chapter 3	A Primer on Regression Models	82
3.1	Two Types of Data, 82	
3.2	The Population Regression Function (PRF) with One Input, 82	
3.3	The Sample Regression Function (SRF) with One Input, 86	
3.4	Properties of the Least-Squares Estimators, 88	
3.5	Goodness of Fit (\bar{R}^2), 89	
3.6	Statistical Inference, 92	
3.7	Multiple Regression, 93	
3.8	Selected Issues in Regression, 96	
3.9	Application to Time Series Data, 103	
	Questions and Problems, 113	
Case 2	Federal Government Receipts (Dynamic Regression)	115
Case 3	Kilowatt-Hours Used	131
Chapter 4	Rational Distributed Lag Models	147
4.1	Linear Distributed Lag Transfer Functions, 148	
4.2	A Special Case: The Koyck Model, 150	
4.3	Rational Distributed Lags, 156	
4.4	The Complete Rational Form DR Model and Some Special Cases, 163	
	Questions and Problems, 165	
Chapter 5	Building Dynamic Regression Models: Model Identification	167
5.1	Overview, 167	
5.2	Preliminary Modeling Steps, 168	
5.3	The Linear Transfer Function (LTF) Identification Method, 173	
5.4	Rules for Identifying Rational Distributed Lag Transfer Functions, 184	
	Questions and Problems, 193	
	Appendix 5A The Corner Table, 194	
	Appendix 5B Transfer Function Identification Using Prewhitening and Cross Correlations, 197	

Chapter 6 Building Dynamic Regression Models: Model Checking, Reformulation, and Evaluation	202
6.1 Diagnostic Checking and Model Reformulation, 202	
6.2 Evaluating Estimation Stage Results, 209 Questions and Problems, 215	
Case 4 Housing Starts and Sales	217
Case 5 Industrial Production, Stock Prices, and Vendor Performance	232
Chapter 7 Intervention Analysis	253
7.1 Introduction, 253	
7.2 Pulse Interventions, 254	
7.3 Step Interventions, 259	
7.4 Building Intervention Models, 264	
7.5 Multiple and Compound Interventions, 272 Questions and Problems, 276	
Case 6 Year-End Loading	279
Chapter 8 Intervention and Outlier Detection and Treatment	290
8.1 The Rationale for Intervention and Outlier Detection, 291	
8.2 Models for Intervention and Outlier Detection, 292	
8.3 Likelihood Ratio Criteria, 299	
8.4 An Iterative Detection Procedure, 313	
8.5 Application, 315	
8.6 Detected Events Near the End of a Series, 319 Questions and Problems, 320	
Appendix 8A BASIC Program to Detect AO, LS, and IO Events, 321	
Appendix 8B Specifying IO Events in the SCA System, 322	
Chapter 9 Estimation and Forecasting	324
9.1 DR Model Estimation, 324	
9.2 Forecasting, 328 Questions and Problems, 340	
Appendix 9A A BASIC Routine for Computing the Nonbiasing Factor in (9.2.24), 340	

Chapter 10 Dynamic Regression Models in a Vector ARMA Framework	342
10.1 Vector ARMA Processes, 342	
10.2 The Vector AR (π Weight) Form, 345	
10.3 DR Models in VAR Form, 346	
10.4 Feedback Check, 349	
10.5 Check for Contemporaneous Relationship and Dead Time, 354	
Questions and Problems, 356	
Appendix	357
Table A Student's t Distribution, 357	
Table B χ^2 Critical Points, 359	
Table C F Critical Points, 360	
Data Appendix	362
References	376
Index	381
