Foundations of Mechanics

Second Edition

Revised, enlarged, and reset

A mathematical exposition of classical mechanics with an introduction to the qualitative theory of dynamical systems and applications to the three-body problem

RALPH ABRAHAM AND JERROLD E. MARSDEN University of California Santa Cruz and Berkeley

with the assistance of Tudor Ratiu and Richard Cushman

PART I PRE	LIMINARIES 1
Chapter 1.	Differential Theory
1.1	Topology
1.2	Exercises
	Exercises
1.3	Local Differential Calculus
1.4	Manifolds and Mappings
	Exercises
1.5	Vector Bundles
1.6	The Tangent Bundle

VIII CONTENTS

	Exercises	
1.7	Tensors	
	Exercises	.59
Chapter 2.	Calculus on Manifolds	60
2.1	Vector Fields as Dynamical Systems	
	Exercises	.78
2.2	Vector Fields as Differential Operators	.78
2.2	Exercises	
2.3	Exterior Algebra	
2.4	Exercises	
2.4	Cartan's Calculus of Differential Forms	
2.5	Exercises	
2.5	Exercises	
2.6	Integration on Manifolds	
2.0	Exercises	
2.7	Some Riemannian Geometry	
	Exercises	
DADT II ANA	ALYTICAL DYNAMICS	159
-Ani II ANA		
Chapter 3.	Hamiltonian and Lagrangian Systems	HAMES A
		161
Chapter 3.	Hamiltonian and Lagrangian Systems	161 161 174
Chapter 3.	Hamiltonian and Lagrangian Systems	161 161 174 174
Chapter 3. 3.1 3.2	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises	161 161 174 174 185
Chapter 3. 3.1	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets	161 174 174 174 185 187
3.1 3.2 3.3	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises	161 174 174 174 185 187 199
Chapter 3. 3.1 3.2	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability	161 174 174 185 187 199 201
3.1 3.2 3.3 3.4	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises	161 174 174 185 187 199 201 208
3.1 3.2 3.3	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems	161 174 174 185 187 199 201 208
3.1 3.2 3.3 3.4 3.5	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems Exercises	161 174 174 185 187 199 201 208 208 217
3.1 3.2 3.3 3.4	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems Exercises The Legendre Transformation	161 174 174 185 187 199 201 208 . 208 217 . 218
3.1 3.2 3.3 3.4 3.5	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems Exercises The Legendre Transformation Exercises	161 174 174 185 187 199 201 208 208 217 218 223
3.1 3.2 3.3 3.4 3.5 3.6	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems Exercises The Legendre Transformation Exercises Mechanics on Riemannian Manifolds	161 174 174 185 187 199 201 208 217 218 223 .224
3.1 3.2 3.3 3.4 3.5 3.6	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems Exercises The Legendre Transformation Exercises	161 174 174 185 187 199 201 208 217 218 223 .224 244
3.1 3.2 3.3 3.4 3.5 3.6 3.7	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems Exercises The Legendre Transformation Exercises Mechanics on Riemannian Manifolds Exercises	161 161 174 185 187 199 201 208 217 218 223 .224 .244 .246
3.1 3.2 3.3 3.4 3.5 3.6 3.7	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems Exercises The Legendre Transformation Exercises Mechanics on Riemannian Manifolds Exercises Variational Principles in Mechanics	161 174 174 185 187 199 201 208 217 218 223 .224 244 .246
3.1 3.2 3.3 3.4 3.5 3.6 3.7 3.8	Hamiltonian and Lagrangian Systems Symplectic Algebra Exercises Symplectic Geometry Exercises Hamiltonian Vector Fields and Poisson Brackets Exercises Integral Invariants, Energy Surfaces, and Stability Exercises Lagrangian Systems Exercises The Legendre Transformation Exercises Mechanics on Riemannian Manifolds Exercises Variational Principles in Mechanics Exercises	161 161 174 185 187 199 201 208 217 218 223 .224 244 .252 253

4.2	The Momentum Mapping	
4.3	Reduction of Phase Spaces with Symmetry	
	Exercises	
4.4	Hamiltonian Systems on Lie Groups and the Rigid Body .	.311
	Exercises	
4.5	The Topology of Simple Mechanical Systems	
	Exercises	
4.6	The Topology of the Rigid Body	
	Exercises	308
Chapter 5.	Hamilton-Jacobi Theory and Mathematical Physics	370
5.1	Time-Dependent Systems	.370
***	Exercises	
5.2	Canonical Transformations and Hamilton-Jacobi Theory .	
	Exercises	400
5.3	Lagrangian Submanifolds	402
	Exercises	420
5.4	Quantization	425
5.5	Introduction to Infinite-Dimensional Hamiltonian Systems	
	Exercises	
5.6	Introduction to Nonlinear Oscillations	489
PART III AN	OUTLINE OF QUALITATIVE DYNAMICS	507
	g	
Chapter 6.		
6.1	Topological Dynamics	509
	Limit and Minimal Sets	.509
	Limit and Minimal Sets	.509 513
6.2	Limit and Minimal Sets	.509 513 .513
	Limit and Minimal Sets	.509 513 .513 515
6.2 6.3	Limit and Minimal Sets Exercises Recurrence Exercises Stability	.509 513 .513 515 515
	Limit and Minimal Sets	.509 513 .513 515 515
	Limit and Minimal Sets Exercises Recurrence Exercises Stability	.509 513 .513 515 515 519
6.3 Chapter 7.	Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Differentiable Dynamics	.509 513 .513 515 515 519 520
6.3	Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Differentiable Dynamics Critical Elements	.509 513 .513 515 515 519 520
6.3 Chapter 7. 7.1	Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Differentiable Dynamics Critical Elements Exercises	.509 513 .513 515 515 519 520 521 525
6.3 Chapter 7.	Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Differentiable Dynamics Critical Elements Exercises Stable Manifolds	.509 513 .513 515 515 519 520 521 525 525
6.3 Chapter 7. 7.1 7.2	Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Differentiable Dynamics Critical Elements Exercises Stable Manifolds Exercises	.509 513 .513 515 515 519 520 521 525 525 531
6.3 Chapter 7. 7.1	Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Differentiable Dynamics Critical Elements Exercises Stable Manifolds Exercises Generic Properties	.509 513 .513 .515 515 519 520 521 525 525 525 531 .531
6.3 Chapter 7. 7.1 7.2	Limit and Minimal Sets Exercises Recurrence Exercises Stability Exercises Differentiable Dynamics Critical Elements Exercises Stable Manifolds Exercises	.509 513 .513 .515 515 515 519 520 521 525 525 525 531 .531
