Contents

| | |
|--|-------------|
| Preface | xi |
| List of Symbols | xiii |
| 1 Fourier Pricing Methods | 1 |
| 1.1 Introduction | 1 |
| 1.2 A general representation of option prices | 1 |
| 1.3 The dynamics of asset prices | 3 |
| 1.4 A generalized function approach to Fourier pricing | 6 |
| 1.4.1 Digital payoffs and the Dirac delta function | 7 |
| 1.4.2 The Fourier transform of digital payoffs | 8 |
| 1.4.3 The cash-or-nothing option | 9 |
| 1.4.4 The asset-or-nothing option | 10 |
| 1.4.5 European options: the general pricing formula | 11 |
| 1.5 Hilbert transform | 12 |
| 1.6 Pricing via FFT | 14 |
| 1.6.1 The sampling theorem | 15 |
| 1.6.2 The truncated sampling theorem | 17 |
| 1.6.3 Why bother? | 21 |
| 1.6.4 The pricing formula | 21 |
| 1.6.5 Application of the FFT | 23 |
| 1.7 Related literature | 26 |
| 2 The Dynamics of Asset Prices | 29 |
| 2.1 Introduction | 29 |
| 2.2 Efficient markets and Lévy processes | 30 |
| 2.2.1 Random walks and Brownian motions | 30 |
| 2.2.2 Geometric Brownian motion | 31 |
| 2.2.3 Stable processes | 31 |
| 2.2.4 Characteristic functions | 32 |
| 2.2.5 Lévy processes | 34 |
| 2.2.6 Infinite divisibility | 36 |
| 2.3 Construction of Lévy markets | 39 |

| | | |
|----------|--|-----------|
| 2.3.1 | The compound Poisson process | 39 |
| 2.3.2 | The Poisson point process | 41 |
| 2.3.3 | Sums over Poisson point processes | 42 |
| 2.3.4 | The decomposition theorem | 45 |
| 2.4 | Properties of Lévy processes | 49 |
| 2.4.1 | Pathwise properties of Lévy processes | 49 |
| 2.4.2 | Completely monotone Lévy densities | 53 |
| 2.4.3 | Moments of a Lévy process | 54 |
| 3 | Non-stationary Market Dynamics | 57 |
| 3.1 | Non-stationary processes | 57 |
| 3.1.1 | Self-similar processes | 57 |
| 3.1.2 | Self-decomposable distributions | 58 |
| 3.1.3 | Additive processes | 60 |
| 3.1.4 | Sato processes | 63 |
| 3.2 | Time changes | 63 |
| 3.2.1 | Stochastic clocks | 64 |
| 3.2.2 | Subordinators | 64 |
| 3.2.3 | Stochastic volatility | 66 |
| 3.2.4 | The time-change technique | 67 |
| 3.3 | Simulation of Lévy processes | 73 |
| 3.3.1 | Simulation via embedded random walks | 74 |
| 3.3.2 | Simulation via truncated Poisson point processes | 74 |
| 4 | Arbitrage-Free Pricing | 79 |
| 4.1 | Introduction | 79 |
| 4.2 | Equilibrium and arbitrage | 79 |
| 4.3 | Arbitrage-free pricing | 80 |
| 4.3.1 | Arbitrage pricing theory | 80 |
| 4.3.2 | Martingale pricing theory | 81 |
| 4.3.3 | Radon–Nikodym derivative | 82 |
| 4.4 | Derivatives | 83 |
| 4.4.1 | The replicating portfolio | 83 |
| 4.4.2 | Options and pricing kernels | 84 |
| 4.4.3 | Plain vanilla options and digital options | 86 |
| 4.4.4 | The Black–Scholes model | 88 |
| 4.5 | Lévy martingale processes | 89 |
| 4.5.1 | Construction of martingales through Lévy processes | 89 |
| 4.5.2 | Change of equivalent measures for Lévy processes | 90 |
| 4.5.3 | The Esscher transform | 91 |
| 4.6 | Lévy markets | 92 |
| 5 | Generalized Functions | 95 |
| 5.1 | Introduction | 95 |
| 5.2 | The vector space of test functions | 95 |
| 5.3 | Distributions | 97 |
| 5.3.1 | Dirac delta and other singular distributions | 98 |

| | | |
|----------|--|------------|
| 5.4 | The calculus of distributions | 99 |
| 5.4.1 | Distribution derivative | 100 |
| 5.4.2 | Special examples of distributions | 100 |
| 5.5 | Slow growth distributions | 103 |
| 5.6 | Function convolution | 104 |
| 5.6.1 | Definitions | 104 |
| 5.6.2 | Some properties of convolution | 104 |
| 5.7 | Distributional convolution | 105 |
| 5.7.1 | The direct product distributions | 105 |
| 5.7.2 | The convolution of distributions | 106 |
| 5.8 | The convolution of distributions in \mathcal{S} | 108 |
| 6 | The Fourier Transform | 113 |
| 6.1 | Introduction | 113 |
| 6.2 | The Fourier transformation of functions | 113 |
| 6.2.1 | Fourier series | 113 |
| 6.2.2 | Fourier transform | 117 |
| 6.2.3 | Parseval theorem | 120 |
| 6.3 | Fourier transform and option pricing | 120 |
| 6.3.1 | The Carr–Madan approach | 120 |
| 6.3.2 | The Lewis approach | 122 |
| 6.4 | Fourier transform for generalized functions | 123 |
| 6.4.1 | The Fourier transforms of testing functions of rapid descent | 123 |
| 6.4.2 | The Fourier transforms of distributions of slow growth | 124 |
| 6.5 | Exercises | 125 |
| 6.6 | Fourier option pricing with generalized functions | 127 |
| 7 | Fourier Transforms at Work | 129 |
| 7.1 | Introduction | 129 |
| 7.2 | The Black–Scholes model | 130 |
| 7.3 | Finite activity models | 132 |
| 7.3.1 | Discrete jumps | 132 |
| 7.3.2 | The Merton model | 133 |
| 7.4 | Infinite activity models | 134 |
| 7.4.1 | The Variance Gamma model | 135 |
| 7.4.2 | The CGMY model | 137 |
| 7.5 | Stochastic volatility | 138 |
| 7.5.1 | The Heston model | 141 |
| 7.5.2 | Vanilla options in the Heston model | 142 |
| 7.6 | FFT at Work | 146 |
| 7.6.1 | Market calibration | 147 |
| 7.6.2 | Pricing exotics | 147 |
| | Appendices | 153 |
| A | Elements of Probability | 155 |
| A.1 | Elements of measure theory | 155 |

| | | |
|----------|--|------------|
| A.1.1 | Integration | 157 |
| A.1.2 | Lebesgue integral | 158 |
| A.1.3 | The characteristic function | 160 |
| A.1.4 | Relevant probability distributions | 161 |
| A.1.5 | Convergence of sequences of random variables | 167 |
| A.1.6 | The Radon–Nikodym derivative | 167 |
| A.1.7 | Conditional expectation | 168 |
| A.2 | Elements of the theory of stochastic processes | 169 |
| A.2.1 | Stochastic processes | 169 |
| A.2.2 | Martingales | 170 |
| B | Elements of Complex Analysis | 173 |
| B.1 | Complex numbers | 173 |
| B.1.1 | Why complex numbers? | 173 |
| B.1.2 | Imaginary numbers | 174 |
| B.1.3 | The complex plane | 175 |
| B.1.4 | Elementary operations | 176 |
| B.1.5 | Polar form | 177 |
| B.2 | Functions of complex variables | 179 |
| B.2.1 | Definitions | 179 |
| B.2.2 | Analytic functions | 179 |
| B.2.3 | Cauchy–Riemann conditions | 180 |
| B.2.4 | Multi-valued functions | 181 |
| C | Complex Integration | 185 |
| C.1 | Definitions | 185 |
| C.2 | The Cauchy–Goursat theorem | 186 |
| C.3 | Consequences of Cauchy’s theorem | 187 |
| C.4 | Principal value | 190 |
| C.5 | Laurent series | 193 |
| C.6 | Complex residue | 196 |
| C.7 | Residue theorem | 197 |
| C.8 | Jordan’s Lemma | 199 |
| D | Vector Spaces and Function Spaces | 201 |
| D.1 | Definitions | 201 |
| D.2 | Inner product space | 203 |
| D.3 | Topological vector spaces | 205 |
| D.4 | Functionals and dual space | 205 |
| D.4.1 | Algebraic dual space | 206 |
| D.4.2 | Continuous dual space | 206 |
| E | The Fast Fourier Transform | 207 |
| E.1 | Discrete Fourier transform | 207 |
| E.2 | Fast Fourier transform | 208 |

| | | |
|-------------------------|--|----------------|
| F | The Fractional Fast Fourier Transform | 215 |
| F.1 | Circular matrix | 216 |
| F.1.1 | Matrix vector multiplication | 218 |
| F.2 | Toepliz matrix | 219 |
| F.2.1 | Embedding in a circular matrix | 219 |
| F.2.2 | Applications to pricing | 220 |
| F.3 | Some numerical results | 221 |
| F.3.1 | The Variance Gamma model | 221 |
| F.3.2 | The Heston model | 223 |
| G | Affine Models: The Path Integral Approach | 225 |
| G.1 | The problem | 225 |
| G.2 | Solution of the Riccati equations | 227 |
| Bibliography | | 229 |
| Index | | 233 |
