Contents

Acknowledgement		ix
Chapter 1	Introduction	1
1.1	Historical Background	1
1.2	Outline of the Book	3
Chapter 2	Offset Fresnel Zoneplate	7
2.1	Simple Circular Zoneplate	7
2.2	Offset Zoneplate	9
2.3	Radiation of the Offset Fresnel Lens Antenna	16
2.4	Evaluation of the Integral	21
2.5	Numerical and Experimental Results	24
2.6	Conclusions	29
Chapter 3	Phase Correcting Zoneplates	30
3.1	Focal Field Expression	31
3.2	Subzone Phase Correction	34
3.3	Aperiodic Subzone Phase Correction	37
3.4	Design of High Efficiency Zoneplate Antenna	39

3.5	Sidelobe Performance	43
3.6	Multilayer Phase Correcting Zoneplate Reflector	45
3.7	Offset Multilayer Zoneplate Reflector	49
3.8	Conclusions	52
Chapter 4	Zonal Reflectors	53
4.1	Parabolic and Stepped Zonal Reflectors	54
4.2	Method of Moments (MoM) Model	57
4.3	Numerical Results	59
4.4	Conclusions	64
Chapter 5	Single Printed Flat Reflector	66
5.1	Reflective Phase Shifter Incorporating FSS	66
5.2	Analysis of Reflective Phase Shifters	69
5.3	Phase Correcting Flat Reflector Incorporating Rings	75
5.4	Other Designs	79
5.5	Conclusions	80
Chapter 6	Reflective Array Antenna	83
6.1	Phase Efficiency of a Reflective Array	84
6.2	Arrays with Ideal Phase Shifting Elements	88

6.3	Arrays with Quantised Phase Shifting Elements	90
6.4	Tolerance Analysis	94
6.5	Arrays with Multilayer Tiles	95
6.6	Conclusions	98
Chapter 7	Other Fresnel Zone Antennas	100
7.1	Single Printed Fresnel Zone Lens	100
7.2	Millimetre-Wave Dielectric Fresnel Lens	102
7.3	Phase Correcting Lens Employing Artificial Dielectric	104
7.4	Waveguide Lens	105
7.5	Cylindrical Lens	106
7.6	Fresnel Lens for Automotive Radar	107
7.7	Integrated-Circuit Fresnel Zone Antenna	108
7.8	Suggestions for Future Work	110
Bibliography		111
Index		117
