Contents

Part I

Chapter 1 (Endo)Fullerenes: From Production to Isolation	3
<i>Delphine Felder-Flesch</i>	
1.1 Introduction	3
1.2 Production Methods	4
1.2.1 The Krätschmer–Huffman Arc-Discharge Apparatus	4
1.2.2 The Combustion Process	5
1.2.3 Chemical Synthesis	6
1.2.3.1 Pyrolytic Dehydrogenation or Dehydrohalogenation	6
1.2.3.2 Surface-Catalysed Cyclodehydrogenation	7
1.3 Isolation and Purification of Empty Fullerenes	8
1.4 Endohedrals ²⁰	8
1.5 General Conclusions	9
References	9
Chapter 2 Endohedral Fullerenes	12
<i>N. Chen, A. L. Ortiz and L. Echegoyen</i>	
2.1 Introduction	12
2.2 Synthesis of Endohedral Fullerenes	13
2.3 Separation and Purification	14
2.4 Classical EMFs	16

RSC Nanoscience & Nanotechnology No. 20

Fullerenes: Principles and Applications, 2nd Edition

Edited by Fernando Langa and Jean François Nierengarten

Published by the Royal Society of Chemistry, www.rsc.org

2.4.1	Multimetallofullerenes	17
2.4.2	Classical EMFs with Large Cages	18
2.4.3	Bimetal EMFs	18
2.4.4	Non-IPR EMFs	19
2.4.5	Missing Endohedral Fullerenes	20
2.4.6	Electrochemistry of Classic EMF	20
	2.4.6.1 The Influence of Transferred Charge	21
	2.4.6.2 Influence of the Cage Structure	22
2.5	Metallic Carbide EMFs	22
2.5.1	M_2C_2 Metallic Carbide EMFs	23
2.5.2	$Sc_3C_2@C_{80}$ and $Sc_4C_2@C_{80}$	24
2.6	Metallic Nitride EMFs	25
2.6.1	I_h-C_{80} Encaged Metallic Nitride EMFs	26
2.6.2	Mixed-Metal Nitride EMFs (MMNMFs)	27
2.6.3	Non-IPR Trimetallic Nitride EMFs	28
2.6.4	Expanding the Carbon Cages: Template for Larger Nitride Clusters Fullerenes	30
2.6.5	Electrochemistry of Trimetallic Nitride Cluster EMFs	31
	2.6.5.1 Electrochemistry of $M_3N@C_{80}$ (I_h) and their Derivatives	31
	2.6.5.2 Decreasing the Cage Size: $Sc_3N@C_{68}$, $Sc_3N@C_{78}$ and $Dy_3N@C_{78}$	34
	2.6.5.3 Electrochemistry of Metallic Nitride EMFs with Larger Cages	35
2.7	Metallic Oxide EMFs	36
2.8	Endohedral Fullerenes with Nonmetal Atoms Inside	37
2.9	Chemical Functionalisation of Endohedral Fullerenes	38
2.9.1	Photochemical Reactions	38
	2.9.1.1 The Silylation Reaction	38
	2.9.1.2 Carbene Addition Reactions	39
	2.9.1.3 Other Reactions	40
2.9.2	Free-Radical Reactions	40
2.9.3	Diels–Alder Reactions	41
2.9.4	1,3-Dipolar Cycloaddition or Prato Reaction	43
2.9.5	[1+2]-Cycloaddition or Bingel–Hirsch Reactions	44
2.9.6	Additional Reactions	45
2.9.7	Influence of Chemical Functionalisation on the Endohedral Clusters $M@C_{82}-(C_{2v})$ Derivatives	46
2.9.8	Influence of Endohedral Clusters on the Reactivity and Regioselectivity of $M_3N@C_{80}$	47

<i>Contents</i>	ix
2.10 EMF Nanostructures	49
2.10.1 Imaging Metallofullerenes by Scanning Tunneling Microscope (STM)	49
2.10.2 EMF/Nanotube Composite	50
2.11 Applications of EMF	50
2.11.1 Photovoltaic Devices	50
2.11.2 Molecular Electronics	51
2.11.3 Biochemistry and Medicine	51
2.12 Summary	53
References	54
Chapter 3 Basic Principles of the Chemical Reactivity of Fullerenes	66
<i>Rubén Caballero, Pilar de la Cruz and Fernando Langa</i>	
3.1 [60]Fullerene Reactivity	66
3.1.1 Introduction	66
3.1.2 Cyclopropanation: Bingel Reaction	67
3.1.2.1 Retro-Bingel Reaction	73
3.1.3 [4 + 2] Cycloadditions: Diels–Alder Reaction	76
3.1.4 [3 + 2] Cycloaddition Reactions	83
3.1.4.1 Azomethine Ylides	83
3.1.4.2 Nitrile Imines	91
3.1.5 Multiaddition Reactions	98
3.2 Reactivity of Higher Fullerenes (C ₇₀ , C ₇₆ , C ₈₄)	108
References	114
Chapter 4 Fullerene-Containing Polymers	125
<i>Francesco Giacalone</i>	
4.1 Introduction	125
4.2 Classification	126
4.3 Synthetic Strategies	128
4.3.1 Crosslinked Polymers	128
4.3.2 End-Capped Polymers	130
4.3.3 Star-Shaped Polymers	131
4.3.4 Main-Chain Polymers	133
4.3.5 Side-Chain Polymers	135
4.3.6 Supramolecular Polymers	137
4.3.7 Carbon-Nanotube–Fullerene Hybrids	140
4.3.8 DNA–Fullerene Hybrids	144
4.4 Properties and Applications	146
4.4.1 Optical Limiting	147
4.4.2 Photodynamic Therapy and DNA Cleaving	148
4.4.3 Photovoltaics	149
4.5 Outlook and Perspective	153
References	154

Chapter 5	Fullerene-Containing Dendrimers: Synthesis and Properties	162
	<i>Jean-François Nierengarten, Michel Holler and Robert Deschenaux</i>	
5.1	Introduction	162
5.2	Dendrimers with a Fullerene Core	163
5.3	Fullerene-Rich Dendrimers	175
5.3.1	Divergent Synthesis	176
5.3.2	Convergent Synthesis	181
5.4	Conclusions	188
	References	188
Chapter 6	Hydrogen Bonding Donor–Acceptor Carbon Nanostructures	192
	<i>M^a Angeles Herranz, Francesco Giacalone, Luis Sánchez and Nazario Martín</i>	
6.1	Introduction	192
6.2	Hydrogen-Bonded C ₆₀ •Donor (C ₆₀ •D) Ensembles	194
6.2.1	H-Bonding Interfaced Metallomacrocycles•C ₆₀ Diads	194
6.2.2	H-bonding Tethered π -Conjugated Oligomer•C ₆₀ Diads	200
6.2.3	Other Electron-Donor Moieties H-Bonding Interfaced with [60]Fullerene	205
6.3	H-Bonded Supramolecular C ₆₀ -Based Polymers	207
6.4	H-Bond Interactions in Supramolecular Carbon Nanotubes (CNTs) Aggregates	216
6.4.1	H-Bonding in CNT–Polymer Composites	219
6.4.2	H-Bonding in the Interaction of CNTs with Biomolecules	220
6.4.3	H-Bonding for the Assembly of CNTs in the Search for New Properties	223
6.5	Conclusions and Outlook	224
	Acknowledgements	225
	References	225

Part II

Chapter 7	Three Electrodes and a Cage: An Account of Electrochemical Research on C₆₀, C₇₀ and their Derivatives	237
	<i>Maurizio Carano, Massimo Marzaccio and Francesco Paolucci</i>	
7.1	Introduction	237
7.2	The Electrochemical Properties of Fullerenes	239

7.2.1	Increasing the Electronegativity of Fullerenes	239
7.2.2	Fulleropyrrolidines: Mono- and Bis-Adducts	240
7.2.3	Polyphenylated Derivatives	242
7.2.4	C ₆₀ Ph ₅ Cl, a very Special Polyphenylated Fullerene Derivative	244
7.3	Electrochemically Induced Reactivity in Fullerene Derivatives	244
7.3.1	The Electrochemically Induced Retrocyclopropanation Reaction	246
7.3.2	The Role of Digital Simulation of the CV Experiments in Mechanistic Studies	247
7.4	Fullerenes as Active Components of Molecular Devices	249
7.4.1	Photoactive Diads	249
7.4.2	Fullerene-Based Photoactive Liquid Crystals	251
7.4.3	Fullerene-[Ru(bpy) ₃] ²⁺ Systems	252
7.4.4	Fullerenes Containing Crown Ethers	255
7.4.5	Trannulenes	256
7.4.6	Interlocked Architectures Equipped with C ₆₀	256
7.4.7	Electropolymerisable C ₆₀ Derivatives	258
7.4.8	C ₆₀ as a Mediator in Bioelectrochemical Sensors	259
7.5	Back to the Basics: The Oxidative Electrochemistry of C ₆₀	260
7.6	Final Remarks	262
	References	263
Chapter 8	Electron-Transfer Processes of Fullerenes Studied with Time-Resolved Spectroscopies	270
	<i>Osamu Ito</i>	
8.1	Introduction	270
8.2	Time-Resolved Spectroscopies and Other Methodologies	273
8.3	Intermolecular Electron Transfer of Fullerene–Donor Mixture Systems	277
8.4	Intramolecular Electron Transfer Through Covalent Bonded between Fullerene and Donor Molecules	289
8.5	Electron Transfer of Fullerene–Donor Through Coordination Bonds	306
8.6	Electron Transfer Through Space between Fullerene–Donor Molecule Inclusion Complexes and Rotaxanes	309
8.7	Electron Transfer along Copolymers between Fullerene–Carbazole Units	318

8.8	Concluding Remarks	320
	References	321
Chapter 9	Nanoscopic Organisation of Fullerenes	329
	<i>Sukumaran Santhosh Babu and Takashi Nakanishi</i>	
9.1	Introduction	329
9.2	Self-Organisation on Solid Substrate	330
9.2.1	One-Dimensional Arrays	331
9.2.2	Two-Dimensional Arrays	331
9.2.3	Donor–Acceptor Coassembled Arrays	333
9.3	Self-Organisation in Solution	336
9.4	Supramolecular Coassembly of Fullerenes	338
9.5	Supramolecular Assemblies of Fullerene Derivatives	342
9.5.1	Conventional Amphiphilic Assemblies	342
9.5.2	Hydrophobic Amphiphilic Assemblies	344
9.5.3	Other Strategies	348
9.6	Future Perspective	349
	References	349
Chapter 10	Interlocked Artificial Photosynthetic Model Systems Composed of Electron-Donor and [60]Fullerene Units	354
	<i>Jackson D. Megiatto, Jr. and David I. Schuster</i>	
10.1	Introduction	354
10.2	Rotaxane Structures Composed of Electron-Donor and [60]Fullerene Components	358
10.2.1	Rotaxane and Pseudorotaxane Diads and Triads Containing [60]Fullerene	358
10.2.2	Bistable Rotaxanes	367
10.2.3	Rotaxane Sensors	373
10.2.4	Polyrotaxanes	374
10.3	Catenanes Containing Fullerene Subunits	375
10.4	Conclusions and Perspectives	380
	References	381
Part III		
Chapter 11	Fullerenes for Materials Science	389
	<i>Alejandro Montellano López, Aurelio Mateo-Alonso and Maurizio Prato</i>	
11.1	Introduction	389
11.2	Donor–Acceptor Systems	390
11.2.1	Diads	390

11.2.1.1	Porphyrins Diads	390
11.2.1.2	Phthalocyanine, Subphthalocyanines and Conjugated Oligomers Diads	392
11.2.1.3	TTF and exTTF Diads	393
11.2.1.4	Ferrocene and Ruthenocene Diads	394
11.2.2	Polyads	396
11.3	Organic Electron Devices	397
11.4	Superconductors	398
11.5	Fullerene Aggregates	399
11.6	Nonlinear Optics (NLO) Applications	400
11.7	Liquid Crystals	402
11.8	Fullerene–Inorganic Hybrids	405
11.9	Conclusion	406
	References	406

Chapter 12 Fullerene Derivatives for Organic Photovoltaics **416**

Pi  trick Hudhomme and Jack Cousseau

12.1	Introduction	416
12.2	From Inorganic to Fullerene-Based Organic Solar Cells	417
12.3	Principle of Fullerene-Based Organic Solar Cells	419
12.4	Bulk-Heterojunction Organic Solar Cells	423
12.4.1	The Leadership of PCBM	423
12.4.1.1	[60]PCBM: [6,6]-Phenyl-C ₆₁ - Butyric Acid Methyl Ester	423
12.4.1.2	Modification of the Donor Polymer	425
12.4.1.3	[70]PCBM: [6,6]-Phenyl-C ₇₁ - Butyric Acid Methyl Ester	427
12.4.1.4	Evolution of the Efficiency of Polymer: PCBM Devices	431
12.4.1.5	Small-Molecule and PCBM- Based Bulk-Heterojunction Devices	431
12.4.2	Newer Fullerene Derivatives in the Photoactive Layer	433
12.4.2.1	Chemical Engineering on PCBM	434
12.4.2.2	Other Strategies in Fullerene Chemistry	444
12.5	New Device Architectures with Organic Tandem and Multijunction Solar Cells	449

12.5.1	Tandem and Multilayer Organic Solar Cells Based on Low Molecular Weight Molecules	450
12.5.2	Hybrid Tandem Organic Solar Cell	450
12.5.3	Solution-Processed Tandem Organic Solar Cells	452
12.6	Conclusion and Outlook	453
	References	454
Chapter 13	Fullerene-Modified Electrodes and Solar Cells	462
	<i>Hiroshi Imahori and Tomokazu Umeyama</i>	
13.1	Introduction	462
13.2	Langmuir–Blodgett Films	463
13.3	Self-Assembled Monolayers	465
13.3.1	Self-Assembled Monolayers on Gold Electrodes	465
13.3.1.1	Single Components	465
13.3.1.2	Diads	467
13.3.1.3	Triads	468
13.3.1.4	Multiporphyrins	470
13.3.2	Self-Assembled Monolayers on ITO Electrodes	470
13.3.2.1	Single Components	470
13.3.2.2	Diads	471
13.3.2.3	Triads	474
13.3.2.4	Multilayers	475
13.4	Layer-by-Layer Deposition	477
13.5	Electrochemical Deposition	480
13.5.1	Fullerenes and Their Derivatives	480
13.5.2	Donor–Acceptor Linked Systems	481
13.5.3	Donor–Acceptor Composite Systems	483
13.5.4	Preorganised Molecular Systems	485
13.5.4.1	Dendrimers	485
13.5.4.2	Oligomers	487
13.5.4.3	Nanoparticles	489
13.5.5	Fullerene–Carbon–Nanotube Composite Systems	492
13.6	Chemical Adsorption and Cast Deposition	493
13.6.1	Hydrogen-Bonding Systems	493
13.6.2	Coordination Bonding Systems	497
13.6.3	Self-Assembling Systems	498
13.7	Summary	499
	References	499

Chapter 14 Biological Applications of Fullerenes 507
Alberto Bianco and Tatiana Da Ros

14.1	Methodologies for Fullerene Solubilisation	507
14.2	Health and Environment Impact of Fullerenes	513
14.3	Fullerenes for Drug Delivery	516
14.4	Neuroprotection and Antioxidant Activity	519
14.5	DNA Photocleavage and Photodynamic Approach Using Fullerenes	522
14.6	Antibacterial, Antiviral Activity and Enzymatic Inhibition	527
14.7	Immunological Properties of Fullerenes	531
14.8	Biological Applications of Radiolabelled Fullerenes	533
14.9	Miscellaneous	536
14.10	General Conclusions	537
	References	538

Part IV: Other Carbon Nanostructures**Chapter 15 Covalent Approaches towards Multifunctional Carbon-Nanotube Materials** 549
Vito Sgobba, Christian Ehli and Dirk M. Guldi

15.1	Introduction	549
15.2	CNT Reactivity	552
15.2.1	Oxidation Reactions	553
15.2.3	Fluorination	567
15.2.4	Derivatisation of Fluorinated CNTs	569
15.2.5	Cycloaddition Reactions	572
15.2.6	Radical Additions	580
15.2.7	Nucleophilic/Electrophilic Substitutions/ Additions	588
15.2.8	Replacements of Carbon Atoms	591
15.2.9	Plasma Activation	592
15.2.10	Mechanochemical Functionalisations	593
15.3	Concluding Remarks	593
	References	594

Subject Index 613
