10 Recent Advances in GaN Nanowires: Surface-Controlled Conduction and Sensing Applications 295
 Ruei-San Chen, Abhijit Ganguly, Li-Chyong Chen, and Kuei-Hsien Chen

10.1 Introduction 295

10.2 Surface-Controlled Transport 296

 10.2.1 Surface Photoconduction 296

 10.2.2 Size-Dependent Transport Properties 300

 10.2.3 Persistent Photoconductivity 303

10.3 Molecular Sensing 305

 10.3.1 Gain Amplified and Selective Gas Sensing 305

 10.3.2 Biomolecular Sensing 306

10.4 Summary 312

References 312

11 Minority Carrier Transport in ZnO and Related Materials 317
 Elena Flitsyian, Zinovy Dashevsky, and Leonid Chernyak

11.1 Introduction 317

11.2 Role of Minority Carrier Diffusion Length in Bipolar Device Performance 319

11.3 Methods for Determination of Minority Carrier Lifetime and Diffusion Length 320

 11.3.1 EBIC Technique 321

 11.3.2 SPV Technique 322

 11.3.3 TRPL Technique 322

11.4 Temperature Dependence of Minority Carrier Diffusion Length and Lifetime 323

 11.4.1 Studies in n-Type ZnO 323

 11.4.2 Studies in p-Type ZnO Doped with Antimony 326

11.5 Studies of Minority Carrier Recombination 331

 11.5.1 Influence of Electron Trapping on Minority Carrier Diffusion Length 332

 11.5.2 Optical Studies of the Effects of Electron Trapping on Minority Carrier Lifetime 335

 11.5.3 Mechanism of Electron Injection Effect 341

 11.5.4 Device Applications 342

11.6 Summary 345
