TABLE OF CONTENTS

Chapter 1	Introduction	9
------------------	--------------	----------

PART I. GENETICS OF CARDIOVASCULAR RISK FACTORS

Chapter 2	Telomere Length and Risk of Cardiovascular Disease and Cancer	23
Chapter 3	Genome wide association study and identification of a protective missense variant on lipoprotein(a) concentration	31
Chapter 4	Genetically determined high levels of iron parameters are protective for coronary artery disease	65

PART II. INTERPLAY OF GENETICS AND LIFESTYLE WITH CARDIOVASCULAR DISEASE

Chapter 5	Contributions of interactions between lifestyle and genetics on coronary artery disease risk	75
Chapter 6	Associations of combined genetic and lifestyle risks with incident cardiovascular disease and diabetes in the UK Biobank	93
Chapter 7	Genome-wide association studies and Mendelian randomization analyses for leisure sedentary behaviours	121
Chapter 8	Associations of observational and genetically determined caffeine intake with coronary artery disease and diabetes	159
Chapter 9	Summary and Discussion	201

APPENDICES

Nederlandse Samenvatting	221
Dankwoord	231
Curriculum Vitae	233
List of publications	235
