

J. Michael McCarthy

# Geometric Design of Linkages

With 50 Illustrations

Springer

# Contents

<b>Preface</b>	<b>vii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Linkages . . . . .	2
1.2 Mobility . . . . .	3
1.2.1 Planar Linkages . . . . .	4
1.2.2 Spherical Linkages . . . . .	6
1.2.3 Spatial Linkages . . . . .	6
1.2.4 Platform Linkages . . . . .	7
1.3 Workspace . . . . .	8
1.4 Linkage Design . . . . .	9
1.4.1 Approximate Straight-Line Mechanisms . . . . .	9
1.5 Summary . . . . .	11
1.6 References . . . . .	11
1.7 Exercises . . . . .	12
<b>2 Analysis of Planar Linkages</b>	<b>13</b>
2.1 Coordinate Planar Displacements . . . . .	13
2.1.1 The PR Open Chain . . . . .	14
2.1.2 The RR Open Chain . . . . .	16
2.1.3 The RPR and 3R Chains . . . . .	17
2.2 Position Analysis of the RRRP Linkage . . . . .	18
2.2.1 The Output Slide . . . . .	18
2.2.2 The Range of Crank Rotation . . . . .	19

2.2.3	The Coupler Angle . . . . .	21
2.2.4	The Extreme Slider Positions . . . . .	21
2.2.5	The RRPR Linkage . . . . .	22
2.3	Position Analysis of the 4R Linkage . . . . .	23
2.3.1	Output Angle . . . . .	24
2.3.2	Coupler Angle . . . . .	25
2.3.3	Transmission Angle . . . . .	26
2.3.4	Coupler Curves . . . . .	27
2.4	Range of Movement . . . . .	29
2.4.1	Limits on the Input Crank Angle . . . . .	29
2.4.2	Limits on the Output Crank Angle . . . . .	31
2.4.3	The Classification of Planar 4R Linkages . . . . .	32
2.4.4	Grashof Linkages . . . . .	34
2.4.5	Folding Linkages . . . . .	35
2.5	Velocity Analysis . . . . .	35
2.5.1	Velocity of a Point in a Moving Link . . . . .	35
2.5.2	Instant Center . . . . .	37
2.6	Velocity Analysis of an RR Chain . . . . .	37
2.6.1	The Jacobian . . . . .	37
2.6.2	The Centrode . . . . .	38
2.7	Velocity Analysis of a Slider-Crank . . . . .	39
2.7.1	Mechanical Advantage . . . . .	40
2.8	Velocity Analysis of a 4R Chain . . . . .	41
2.8.1	Output Velocity Ratio . . . . .	41
2.8.2	Coupler Velocity Ratio . . . . .	43
2.8.3	Kennedy's Theorem . . . . .	43
2.8.4	Mechanical Advantage in a 4R Linkage . . . . .	45
2.9	Summary . . . . .	46
2.10	References . . . . .	46
2.11	Exercises . . . . .	46
<b>3</b>	<b>Graphical Synthesis in the Plane</b> . . . . .	<b>48</b>
3.1	Displacement of a Planar Body . . . . .	48
3.1.1	The Pole of a Displacement . . . . .	50
3.1.2	Determining the Position of a Point . . . . .	50
3.1.3	An Alternative Construction for the Pole . . . . .	51
3.1.4	The Pole Triangle . . . . .	51
3.2	The Geometry of an RR Chain . . . . .	53
3.2.1	The Dyad Triangle . . . . .	53
3.2.2	The Center-Point Theorem . . . . .	54
3.3	Finite-Position Synthesis of RR Chains . . . . .	55
3.3.1	Two Precision Positions . . . . .	56
3.3.2	Three Precision Positions . . . . .	57
3.3.3	Four Precision Positions . . . . .	59
3.3.4	Five Precision Positions . . . . .	61

3.4	The Geometry of the PR and RP Chains . . . . .	62
3.4.1	Finite-Position Synthesis of PR Chains . . . . .	62
3.4.2	Finite-Position Synthesis of RP Chains . . . . .	64
3.5	The Design of Four-Bar Linkages . . . . .	66
3.6	Summary . . . . .	67
3.7	References . . . . .	67
3.8	Exercises . . . . .	67
<b>4</b>	<b>Planar Kinematics</b>	<b>69</b>
4.1	Isometry . . . . .	69
4.1.1	Planar Translations . . . . .	70
4.1.2	Planar Rotations . . . . .	70
4.1.3	Planar Displacements . . . . .	72
4.1.4	The Composition of Two Displacements . . . . .	73
4.1.5	Relative Displacements . . . . .	74
4.1.6	Relative Inverse Displacements . . . . .	75
4.2	The Geometry of Displacement Poles . . . . .	76
4.2.1	The Pole of a Displacement . . . . .	76
4.2.2	Perpendicular Bisectors and the Pole . . . . .	77
4.2.3	Pole of a Relative Displacement . . . . .	78
4.2.4	The Pole of a Relative Inverse Displacement . . . . .	79
4.3	The Pole Triangle . . . . .	80
4.3.1	The Pole of a Composite Displacement . . . . .	80
4.3.2	The Triangle of Relative Displacement Poles . . . . .	82
4.3.3	The Image Pole Triangle . . . . .	82
4.3.4	The Circumscribing Circle . . . . .	83
4.4	Summary . . . . .	84
4.5	References . . . . .	84
4.6	Exercises . . . . .	85
<b>5</b>	<b>Algebraic Synthesis of Planar Chains</b>	<b>86</b>
5.1	A Single Revolute Joint . . . . .	86
5.2	The Geometry of RR Chains . . . . .	87
5.2.1	Perpendicular Bisectors . . . . .	87
5.2.2	The Dyad Triangle . . . . .	88
5.2.3	The Center-Point Theorem . . . . .	89
5.3	Finite Position Synthesis of RR Chains . . . . .	90
5.3.1	The Algebraic Design Equations . . . . .	90
5.3.2	Parameterized Form of the Design Equations . . . . .	92
5.3.3	Two Precision Positions . . . . .	92
5.3.4	Three Precision Positions . . . . .	93
5.3.5	Four Precision Positions . . . . .	95
5.3.6	Five Precision Positions . . . . .	101
5.4	The Design of PR Chains . . . . .	104
5.4.1	The Design Equations . . . . .	104

5.4.2	Two Positions . . . . .	106
5.4.3	Three Positions . . . . .	106
5.4.4	Four Positions . . . . .	107
5.5	The Design of RP Chains . . . . .	108
5.5.1	The Design Equations . . . . .	108
5.6	Planar Four-Bar Linkages . . . . .	109
5.6.1	Solution Rectification . . . . .	109
5.6.2	Function Generation . . . . .	112
5.7	Summary . . . . .	113
5.8	References . . . . .	114
5.9	Exercises . . . . .	114
<b>6</b>	<b>Analysis of Spherical Linkages</b>	<b>116</b>
6.1	Coordinate Rotations . . . . .	116
6.1.1	The Composition of Coordinate Rotations . . . . .	117
6.1.2	The RR Open Chain . . . . .	118
6.1.3	The 3R Open Chain . . . . .	119
6.2	Position Analysis of a 4R Linkage . . . . .	120
6.2.1	The Coordinates of <b>O</b> , <b>A</b> , <b>B</b> , and <b>C</b> . . . . .	120
6.2.2	The Output Angle . . . . .	121
6.2.3	The Coupler Angle . . . . .	123
6.2.4	Coupler Curves . . . . .	124
6.2.5	The Transmission Angle . . . . .	125
6.3	Range of Movement . . . . .	126
6.3.1	Limits on the Input Crank Angle . . . . .	126
6.3.2	Limits on the Output Crank Angle . . . . .	128
6.3.3	Classification of Spherical 4R Linkages . . . . .	130
6.3.4	Grashof Linkages . . . . .	132
6.3.5	Folding Linkages . . . . .	133
6.4	Angular Velocity . . . . .	133
6.5	Velocity Analysis of an RR Chain . . . . .	134
6.6	Velocity Analysis of the 4R Linkage . . . . .	134
6.6.1	The Output Velocity Ratio . . . . .	135
6.6.2	The Coupler Velocity Ratio . . . . .	136
6.6.3	Instantaneous Rotation Axis . . . . .	136
6.6.4	Mechanical Advantage . . . . .	137
6.7	Summary . . . . .	138
6.8	References . . . . .	138
6.9	Exercises . . . . .	139
<b>7</b>	<b>Spherical Kinematics</b>	<b>140</b>
7.1	Isometry . . . . .	140
7.1.1	Spatial Translations . . . . .	141
7.1.2	Spatial Rotations . . . . .	141
7.1.3	Spatial Displacements . . . . .	143

7.1.4	Composition of Rotations . . . . .	143
7.1.5	Relative Rotations . . . . .	144
7.1.6	Relative Inverse Rotations . . . . .	145
7.2	The Geometry of Rotation Axes . . . . .	146
7.2.1	The Rotation Axis . . . . .	146
7.2.2	Perpendicular Bisectors and the Rotation Axis . .	147
7.2.3	The Rotation Angle . . . . .	148
7.2.4	The Rotation Defined by $\phi$ and $\mathbf{S}$ . . . . .	150
7.2.5	Eigenvalues of a Rotation Matrix . . . . .	151
7.2.6	Rotation Axis of a Relative Rotation . . . . .	152
7.2.7	Rotation Axis of a Relative Inverse Rotation . .	153
7.2.8	Rotational Displacements . . . . .	153
7.3	The Spherical Pole Triangle . . . . .	154
7.3.1	The Axis of Composite Rotation . . . . .	154
7.3.2	The Triangle of Relative Rotation Axes . . . . .	158
7.3.3	The Spherical Image Pole Triangle . . . . .	158
7.4	Summary . . . . .	159
7.5	References . . . . .	160
7.6	Exercises . . . . .	160
<b>8</b>	<b>Algebraic Synthesis of Spherical Chains</b>	<b>162</b>
8.1	A Single Revolute Joint . . . . .	162
8.2	Spherical Displacements . . . . .	163
8.3	The Geometry of Spherical RR Chains . . . . .	165
8.3.1	Perpendicular Bisectors . . . . .	166
8.3.2	The Spherical Dyad Triangle . . . . .	166
8.3.3	The Center-Axis Theorem . . . . .	168
8.4	Finite Position Synthesis of RR Chains . . . . .	170
8.4.1	The Algebraic Design Equations . . . . .	170
8.4.2	Parameterized Form of the Design Equations . .	172
8.4.3	Two Specified Orientations . . . . .	172
8.4.4	Three Specified Orientations . . . . .	173
8.4.5	Four Specified Orientations . . . . .	175
8.4.6	Five Specified Orientations . . . . .	179
8.5	Spherical 4R Linkages . . . . .	182
8.5.1	Solution Rectification . . . . .	183
8.5.2	Function Generation . . . . .	186
8.6	Summary . . . . .	187
8.7	References . . . . .	187
8.8	Exercises . . . . .	188
<b>9</b>	<b>Analysis of Spatial Chains</b>	<b>189</b>
9.1	The Kinematics Equations . . . . .	189
9.1.1	Joint Axes . . . . .	190
9.1.2	The Common Normal . . . . .	190

9.1.3	Coordinate Screw Displacements . . . . .	191
9.1.4	The Denavit–Hartenberg Convention . . . . .	192
9.2	The Analysis of Spatial Open Chains . . . . .	193
9.2.1	The 3R Wrist (S-Joint) . . . . .	193
9.2.2	The RS Chain . . . . .	195
9.2.3	The TS Chain . . . . .	196
9.2.4	The TPS and TRS Chains . . . . .	197
9.2.5	The CC Chain . . . . .	198
9.3	Velocity Analysis of Spatial Open Chains . . . . .	200
9.3.1	Partial Twists of an Open Chain . . . . .	201
9.3.2	The Jacobian of a Spatial Open Chain . . . . .	202
9.4	The RSSR Linkage . . . . .	203
9.4.1	The Output Angle . . . . .	203
9.5	The RSSP Linkage . . . . .	206
9.6	The 4C Linkage . . . . .	207
9.6.1	The Kinematics Equations . . . . .	208
9.6.2	The Spherical Image . . . . .	209
9.6.3	The Vector Loop Equation . . . . .	210
9.7	The 5TS Spatial Linkage . . . . .	211
9.8	Summary . . . . .	213
9.9	References . . . . .	214
9.10	Exercises . . . . .	214
<b>10</b>	<b>Spatial Kinematics</b> . . . . .	<b>215</b>
10.1	Spatial Displacements . . . . .	215
10.1.1	Homogeneous Transforms . . . . .	216
10.1.2	Composition of Displacements . . . . .	216
10.1.3	Relative Displacements . . . . .	217
10.1.4	Screw Displacements . . . . .	218
10.1.5	The Screw Matrix . . . . .	219
10.2	Lines and Screws . . . . .	219
10.2.1	Plücker Coordinates of a Line . . . . .	220
10.2.2	Screws . . . . .	220
10.2.3	Dual Vector Algebra . . . . .	221
10.2.4	Orthogonal Components of a Line . . . . .	223
10.2.5	The Spatial Displacement of Screws . . . . .	226
10.3	The Geometry of Screw Axes . . . . .	227
10.3.1	The Screw Axis of a Displacement . . . . .	227
10.3.2	Perpendicular Bisectors and the Screw Axis . . . . .	228
10.3.3	Rodrigues’s Equation for Screws . . . . .	231
10.4	The Spatial Screw Triangle . . . . .	233
10.4.1	The Screw Axis of a Composite Displacement . . . . .	233
10.4.2	The Spatial Triangle . . . . .	234
10.4.3	The Composite Screw Axis Theorem . . . . .	235
10.4.4	Dual Quaternions and the Spatial Triangle . . . . .	236

10.4.5	The Triangle of Relative Screw Axes . . . . .	237
10.5	Summary . . . . .	237
10.6	References . . . . .	238
10.7	Exercises . . . . .	238
<b>11</b>	<b>Algebraic Synthesis of Spatial Chains</b>	<b>240</b>
11.1	The Geometry of a TS Spatial Chain . . . . .	240
11.1.1	Perpendicular Bisectors . . . . .	241
11.1.2	The Design Equations . . . . .	242
11.1.3	Four Specified Spatial Positions . . . . .	243
11.1.4	Seven Specified Spatial Positions . . . . .	243
11.2	The Geometry of a CC Chain . . . . .	245
11.2.1	Direction and Moment Equations . . . . .	246
11.2.2	Five Specified Spatial Positions . . . . .	248
11.2.3	The Transfer Principle . . . . .	248
11.2.4	The Spatial Dyad Triangle . . . . .	249
11.2.5	The Central-Axis Theorem . . . . .	250
11.2.6	Roth's Theorem . . . . .	251
11.2.7	The Spatial Compatibility Platform . . . . .	252
11.3	The Geometry of Spatial RR Chains . . . . .	254
11.3.1	The Constraint Equations . . . . .	254
11.3.2	Three Specified Spatial Positions . . . . .	257
11.3.3	Bennett Linkage Coordinates . . . . .	260
11.4	Platform Linkages . . . . .	262
11.4.1	The 4C Spatial Linkage . . . . .	263
11.4.2	The 5TS Spatial Linkage . . . . .	263
11.4.3	Function Generation . . . . .	263
11.5	Summary . . . . .	264
11.6	References . . . . .	264
11.7	Exercises . . . . .	265
<b>12</b>	<b>Platform Manipulators</b>	<b>266</b>
12.1	Introduction . . . . .	266
12.1.1	Twists and Wrenches . . . . .	267
12.1.2	Virtual Work . . . . .	270
12.2	The Jacobian of a Platform Manipulator . . . . .	270
12.3	Conditions for Line-Based Singularities . . . . .	272
12.3.1	Locating the Lines of Action . . . . .	272
12.4	Classification of Line-Based Singularities . . . . .	274
12.4.1	Type-1 Singularities . . . . .	275
12.4.2	Type-2 Singularities . . . . .	275
12.4.3	Type-3 Singularities . . . . .	278
12.4.4	Type-4 Singularities . . . . .	279
12.4.5	Type-5 Singularities . . . . .	282
12.5	Examples . . . . .	283

12.6	Summary . . . . .	284
12.7	References . . . . .	284
12.8	Exercises . . . . .	284
<b>A</b>	<b>Solving Constraint Equations</b>	<b>287</b>
