Contents

Preface v

PART I: Jordan Algebras and Their State Spaces 1

Chapter 1: JB-algebras 3

Introduction 3
Quotients of JB-algebras 16
Projections and compressions in JB-algebras 22
Operator commutativity 26
Order derivations on JB-algebras 30
Appendix: Proof of Proposition 1.3 32
Notes 34

Chapter 2: JBW-algebras 37

Introduction 37
Orthogonality and range projections 42
Spectral resolutions 46
The lattices of projections and compressions 48
σ-weakly closed hereditary subalgebras 54
Center of a JBW-algebra 55
The bidual of a JB-algebra 58
The predual of a JBW-algebra 62
JW-algebras 70
Order automorphisms of a JB-algebra 73
Abstract characterization of compressions 75
Notes 76

Chapter 3: Structure of JBW-algebras 79

Equivalence of projections 79
Comparison theory 83
Global structure of type I JBW-algebras 85
Classification of type I JBW-factors 87
Atomic JBW-algebras 96
Notes 101

Chapter 4: Representations of JB-algebras 103

Representations of JBW-factors as JW-algebras 103
Representations of JB-algebras as Jordan operator algebras . . 108
Reversibility 113
The universal C*-algebra of a JB-algebra 120
Cartesian triples 127
Notes 137

Chapter 5: State Spaces of Jordan Algebras 139

Carrier projections 139
The lattice of projective faces 143
Dual maps of Jordan homomorphisms 144
Traces on JB-algebras 147
Norm closed faces of JBW normal state spaces 157
The Hilbert ball property 168
The σ-convex hull of extreme points 172
Trace class elements of atomic JBW-algebras 178
Symmetry and ellipticity 183
Notes 188

Chapter 6: Dynamical Correspondences 191

Connes orientations 191
Dynamical correspondences in JB-algebras 196
Comparing notions of orientation 205
Notes 206

PART II: Convexity and Spectral Theory 209

Chapter 7: General Compressions 211

Projections in cones 211
Definition of general compressions 222
Projective units and projective faces 227
Geometry of projective faces 241
Notes 249

Chapter 8: Spectral Theory 251

The lattice of compressions 251
The lattice of compressions when $A = V^*$ 260
Spaces in spectral duality 271
Spectral convex sets 291
Appendix. Proof of Theorem 8.87 303
Notes 311

PART III: State Space Characterizations 313

Chapter 9: Characterization of Jordan Algebra State Spaces 315

The pure state properties 315
The Hilbert ball property 319
Atomicity 323
The type I factor case 325
Characterization of state spaces of JB-algebras 339
Characterization of normal state spaces of JBW algebras . . . 343
Notes 354

Chapter 10: Characterization of Normal State Spaces of von Neumann Algebras 357

The normal state space of $\mathcal{B}(H)$ 357
3-frames, Cartesian triples, and blown up 3-balls 358
The generalized 3-ball property 365
Notes 373

Chapter 11: Characterization of C*-algebra State Spaces . 375

States and representations of JB-algebras 376
Reversibility of JB-algebras of complex type 382
The state space of the universal C*-algebra of a JB-algebra . . 393
Orientability 402
Characterization of C*-algebra state spaces among JB-algebra state spaces 406
Characterization of C*-algebra state spaces among convex sets 414
Notes 417

Appendix 419

Bibliography 451
