List of Figures	xxxiii

PART I: HISTORY AND FUNDAMENTALS

1 Karl Pearson and the Chi-Squared Test 3

D. R. Cox

- 1.1 Karl Pearson 1857–1937: Background to the
Chi-Squared Paper 3
- 1.2 K. P.: After Chi-Squared 5
- 1.3 The 1900 Paper 5
- 1.4 Importance of the Chi-Squared Test 6
- References 8

2 Karl Pearson Chi-Square Test—The Dawn of Statistical Inference 9

C. R. Rao

- 2.1 Introduction 9
- 2.2 Large Sample Criteria: The Holy Trinity 11
 - 2.2.1 Likelihood ratio criterion 11
 - 2.2.2 Wald test 12
 - 2.2.3 Rao's score test 12
- 2.3 Specification Tests for a
Multinomial Distribution 13
 - 2.3.1 Test of a simple hypothesis 13
 - 2.3.2 Tests of a composite hypothesis 14
 - 2.3.3 Test for goodness-of-fit in a subset of cells 15
 - 2.3.4 Analysis of chi-square 17
 - 2.3.5 Some applications of the chi-square test 18
- 2.4 Other Tests of Goodness-of-Fit 18

2.5	Specification Tests for Continuous Distributions	20
	References	22
3	Approximate Models	25
	<i>Peter J. Huber</i>	
3.1	Models	25
3.2	Bayesian Modeling	27
3.3	Mathematical Statistics and Approximate Models	29
3.4	Statistical Significance and Relevance	31
3.5	Composite Models	32
3.6	The Role of Simulation	38
3.7	Summary Conclusions	40
	References	40
PART II: CHI-SQUARED TEST		
4	Partitioning the Pearson-Fisher Chi-Squared Goodness-of-Fit Statistic	45
	<i>G. D. Rayner</i>	
4.1	Introduction	45
4.2	Neyman Smooth Goodness-of-Fit Tests	46
	4.2.1 Smooth goodness-of-fit tests for categorized data	47
	4.2.2 Partitioning the Pearson-Fisher chi-squared statistic	48
4.3	Constructing the Pearson-Fisher Decomposition	49
4.4	Simulation Study	50
4.5	Results and Discussion	51
	References	55
5	Statistical Tests for Normal Family in Presence of Outlying Observations	57
	<i>Aïcha Zerbet</i>	
5.1	The Chi-Squared Test of Normality in the Univariate Case	57
	5.1.1 Example: Analysis of the data of Milliken	59
5.2	Bol'shev Test for Outliers	59
	5.2.1 Stages of applications of the test of Bol'shev	60
	5.2.2 Example 2: Analysis of the data of Daniel (1959)	60
5.3	Power of the Chi-Squared Test	61
	References	63

**6 Chi-Squared Test for the Law of Annual Death Rates:
Case with Censure for Life Insurance Files** 65
Léo Gerville-Reache

- 6.1 Introduction 65
- 6.2 Chi-Squared Goodness-of-Fit Test 66
 - 6.2.1 Statistics with censure 66
 - 6.2.2 Goodness-of-fit test for a composite hypothesis 67
- 6.3 Demonstration 68
- References 69

PART III: GOODNESS-OF-FIT TESTS FOR
PARAMETRIC DISTRIBUTIONS

**7 Shapiro-Wilk Type Goodness-of-Fit Tests for
Normality: Asymptotics Revisited** 73
Pranab Kumar Sen

- 7.1 Introduction 73
- 7.2 Preliminary Notion 74
- 7.3 SOADR Results for BLUE and LSE 77
- 7.4 Asymptotics for W_n^* 81
- 7.5 Asymptotics Under Alternatives 85
- References 87

**8 A Test for Exponentiality Based on Spacings for
Progressively Type-II Censored Data** 89
N. Balakrishnan, H. K. T. Ng, and N. Kannan

- 8.1 Introduction 89
- 8.2 Progressive Censoring 91
- 8.3 Test for Exponentiality 92
 - 8.3.1 Null distribution of T 93
- 8.4 Power Function Approximation and Simulation
Results 95
 - 8.4.1 Approximation of power function 95
 - 8.4.2 Monte Carlo power comparison 97
- 8.5 Modified EDF and Shapiro-Wilk Statistics 98
- 8.6 Two-Parameter Exponential Case 99
- 8.7 Illustrative Examples 100
 - 8.7.1 Example 1: One-parameter exponential case 100
 - 8.7.2 Example 2: Two-parameter exponential case 101
- 8.8 Multi-Sample Extension 102
- 8.9 Conclusions 103
- References 103

9	Goodness-of-Fit Statistics for the Exponential Distribution When the Data are Grouped	113
	<i>Sneh Gulati and Jordan Neus</i>	
9.1	Introduction	113
9.2	The Model and the Test Statistics	115
9.3	Asymptotic Distribution	116
9.4	Power Studies	119
	References	122
10	Characterization Theorems and Goodness-of-Fit Tests	125
	<i>Carol E. Marchetti and Govind S. Mudholkar</i>	
10.1	Introduction and Summary	126
10.2	Characterization Theorems	127
10.2.1	Entropy characterizations	127
10.2.2	Statistical independence	128
10.3	Maximum Entropy Tests	130
10.4	Four Z Tests	131
10.5	Byproducts: The G-IG Analogies	134
	References	137
11	Goodness-of-Fit Tests Based on Record Data and Generalized Ranked Set Data	143
	<i>Barry C. Arnold, Robert J. Beaver, Enrique Castillo, and Jose Maria Sarabia</i>	
11.1	Introduction	143
11.2	Record Data	144
11.3	Generalized Ranked Set Data	144
11.4	Power	150
11.5	Composite Null Hypotheses	154
11.6	Remarks	156
	References	156
PART IV: REGRESSION AND GOODNESS-OF-FIT TESTS		
12	Gibbs Regression and a Test of Goodness-of-Fit	161
	<i>Lynne Seymour</i>	
12.1	Introduction	161
12.2	The Motivation and the Model	162
12.3	Application and Evaluation of the Model	165
12.4	Discussion	169
	References	170

13 A CLT for the L₂ Norm of the Regression Estimators Under α-Mixing: Application to G-O-F Tests	173
<i>Cheikh A. T. Diack</i>	
13.1 Introduction	173
13.2 Estimators	174
13.3 A Limit Theorem	175
13.4 Inference	177
13.5 Proofs	178
References	183
14 Testing the Goodness-of-Fit of a Linear Model in Nonparametric Regression	185
<i>Zaher Mohdeb and Abdelkader Mokkadem</i>	
14.1 Introduction	185
14.2 The Test Statistic	186
14.3 Simulations	189
References	193
15 A New Test of Linear Hypothesis in Regression	195
<i>Y. Baraud, S. Huet, and B. Laurent</i>	
15.1 Introduction	195
15.2 The Testing Procedure	196
15.2.1 Description of the procedure	197
15.2.2 Behavior of the test under the null hypothesis	198
15.2.3 A toy framework: The case of a known variance	198
15.3 The Power of the Test	198
15.3.1 The main result	198
15.3.2 Rates of testing	199
15.4 Simulations	201
15.4.1 The simulation experiment	201
15.4.2 The testing procedure	202
15.4.3 The test proposed by Horowitz and Spokoiny (2000)	202
15.4.4 Results of the simulation study	203
15.5 Proofs	203
15.5.1 Proof of Theorem 15.3.1	203
15.5.2 Proof of Corollary 15.3.1	204
References	206

PART V: GOODNESS-OF-FIT TESTS IN SURVIVAL ANALYSIS
AND RELIABILITY

16 Inference in Extensions of the Cox Model for Heterogeneous Populations	211
<i>Odile Pons</i>	
16.1 Introduction	211
16.2 Non-Stationary Cox Model	212
16.3 Varying-Coefficient Cox Model	219
References	224
17 Assumptions of a Latent Survival Model	227
<i>Mei-Ling Ting Lee and G. A. Whitmore</i>	
17.1 Introduction	227
17.2 Latent Survival Model	228
17.3 Data and Parameter Estimation	229
17.4 Model Validation Methods	230
17.5 Remedies to Achieve a Better Model Fit	233
References	235
18 Goodness-of-Fit Testing for the Cox Proportional Hazards Model	237
<i>Karthik Devarajan and Nader Ebrahimi</i>	
18.1 Introduction	237
18.2 Goodness-of-Fit Testing for the Cox PH Model	240
18.3 Comparison of the Proposed Goodness-of-Fit Test with Existing Methods	242
18.4 Illustration of the Goodness-of-Fit Test using Real-Life Data	249
18.5 Concluding Remarks	250
References	251
19 A New Family of Multivariate Distributions for Survival Data	255
<i>Shulamith T. Gross and Catherine Huber-Carol</i>	
19.1 Introduction	255
19.2 Frailty Models: An Overview	255
19.3 The Model	257
19.4 An Application to Skin Grafts Rejection	261
19.4.1 Description of the data	261
References	264

20 Discrimination Index, the Area Under the ROC Curve 267
Byung-Ho Nam and Ralph B. D'Agostino

- 20.1 Introduction 268
- 20.2 Nonparametric Confidence Interval for Area under the ROC Curve 269
 - 20.2.1 Discrimination in logistic regression 269
 - 20.2.2 Estimation of the shift parameter Δ under the shift model 271
 - 20.2.3 Confidence interval for the area under the ROC curve 272
- 20.3 Extension of C Statistic to Survival Analysis 273
 - Appendix 277
 - References 279

21 Goodness-of-Fit Tests for Accelerated Life Models 281
Vilijandas Bagdonavičius and Mikhail S. Nikulin

- 21.1 Introduction 281
- 21.2 Generalized Sedyakin's Model 282
- 21.3 Alternatives to the GS Model 286
 - 21.3.1 Proportional hazards model 286
 - 21.3.2 Model including influence of switch-up's of stresses on reliability 287
- 21.4 Test Statistic for the GS Model 287
- 21.5 Asymptotic Distribution of the Test Statistic 288
- 21.6 The Test 293
- 21.7 Consistency and the Power of the Test Against Approaching Alternatives 293
 - References 296

PART VI: GRAPHICAL METHODS AND
 GENERAL GOODNESS-OF-FIT TESTS

22 Two Nonstandard Examples of the Classical Stratification Approach to Graphically Assessing Proportionality of Hazards 301
Niels Keiding

- 22.1 Introduction 301
- 22.2 Some Approaches to Testing Proportionality of Hazards 302
- 22.3 "Proportionality" in Discrete-Time Regression for Retro-Hazard 303

22.4	The Renewal Assumption in Modulated Renewal Processes	304	
	References	308	
23	Association in Contingency Tables, Correspondence Analysis, and (Modified) Andrews Plots		311
	<i>Ravindra Khattree and Dyanand N. Naik</i>		
23.1	Introduction	311	
23.2	(Modified) Andrews Plots in Correspondence Analysis	313	
23.3	Some Examples	314	
23.4	Modified Andrews Plots and Rao's Correspondence Analysis	320	
23.5	Conclusions	325	
	References	325	
24	Orthogonal Expansions and Distinction Between Logistic and Normal		327
	<i>Carles M. Cuadras and Daniel Cuadras</i>		
24.1	Introduction	327	
24.2	Orthogonal Expansion in Principal Components	328	
24.3	Maximum Correlation for the Logistic Distribution	331	
24.4	Distinction Between Logistic and Normal	333	
	References	339	
25	Functional Tests of Fit		341
	<i>Denis Bosq</i>		
25.1	Introduction	341	
25.2	Behaviour of $\ T_n\ $ in Distribution	342	
25.3	Consistency of FTF Tests and Rate of Convergence	344	
25.4	Adjacent Hypothesis	346	
25.5	Choosing a Kernel	347	
25.6	Local Efficiency of FTF Tests	348	
25.7	Indications Concerning the Proofs	351	
25.8	Simulations	352	
	References	355	
26	Quasi Most Powerful Invariant Tests of Goodness-of-Fit		357
	<i>Gilles R. Ducharme and Benoît Frichot</i>		
26.1	Introduction	357	
26.2	Laplace Approximation	358	
26.3	Quasi Most Powerful Invariant Test	359	
	References	360	

PART VII: MODEL VALIDITY IN QUALITY OF LIFE

27 Test of Monotonicity for the Rasch Model **365***Jean Bretagnolle*

- 27.1 Results of the Literature 365
- 27.2 Extension of Hoeffding Result 366
- 27.3 A Questionnaire Model 366
- 27.4 Simulations about the Level in the
Conditional Test Case 368
- 27.5 Simulations about the Power under H_A 369
- 27.6 Conclusion 369
- References 369

**28 Validation of Model Assumptions in Quality of
Life Measurements** **371***A. Hamon, J. F. Dupuy, and M. Mesbah*

- 28.1 Introduction 371
- 28.2 Classical Theory 372
- 28.3 SIP Mobility Data (I) 373
- 28.4 The Rasch Model 375
 - 28.4.1 Goodness-of-fit tests 375
 - 28.4.2 A graphical method 378
- 28.5 SIP Mobility Data (II) 378
- 28.6 Conclusion 382
- References 382

PART VIII: TESTS OF HYPOTHESES AND ESTIMATION
WITH APPLICATIONS**29 One-Sided Hypotheses in a Multinomial Model** **387***Richard M. Dudley and Dominique M. Haughton*

- 29.1 Introduction 387
- 29.2 Putting Multiple Data Sets Into an i.i.d. Form 388
- 29.3 Model Selection Criteria 388
- 29.4 Application to 2×2 Contingency Tables 390
- 29.5 Common Odds Ratio Profile Likelihoods 391
- 29.6 Jeffreys Priors for Mixture Models 391
- 29.7 Posterior Probabilities that Models are Best 393
- 29.8 Data on Long-Term Aspirin Therapy after an MI 394
- 29.9 Numerical Results 395
- 29.10 Discussion and Conclusions 396
- References 397

30 A Depth Test for Symmetry	401
<i>Peter J. Rousseeuw and Anja Struyf</i>	
30.1 Introduction	401
30.2 Location Depth and Angular Symmetry	402
30.3 A Test for Angular Symmetry	405
30.4 Regression Depth and Linearity of the Conditional Median	407
References	411
31 Adaptive Combination of Tests	413
<i>Yadolah Dodge and Jana Jurečková</i>	
31.1 Introduction	413
31.2 Adaptive Combination of Estimators	415
31.3 Adaptive Combination of Tests	417
31.3.1 Adaptive combination of F -test and median-type test	420
31.3.2 Adaptive combination of M -test and median-type test	421
References	423
32 Partially Parametric Testing	425
<i>J. C. W. Rayner</i>	
32.1 Partially Parametric Inference	425
32.2 S -Sample Smooth Tests for Goodness-of-Fit	426
32.3 Partially Parametric Alternatives to the t -Test	428
32.4 Tests for the Location of Modes	430
References	432
33 Exact Nonparametric Two-Sample Homogeneity Tests	435
<i>Jean-Marie Dufour and Abdeljelil Farhat</i>	
33.1 Introduction	435
33.2 Test Statistics	437
33.3 Exact Randomized Permutation Tests	440
33.4 Simulation Study	442
33.5 Conclusion	444
References	447
34 Power Comparisons of Some Nonparametric Tests for Lattice Ordered Alternatives in Two-Factor Experiments	449
<i>Thu Hoàng and Van L. Parsons</i>	
34.1 Introduction	449
34.2 Hypotheses and Test Statistics	450
34.3 Test Statistic Power Evaluations	452

34.4 Results and Conclusions	455	
Appendix	461	
References	461	
35 Tests of Independence with Exponential Marginals		463
<i>Paul Deheuvels</i>		
35.1 Introduction	463	
35.2 Karhunen-Loeve Expansions	465	
35.3 Applications to Tests of Independence	470	
References	472	
36 Testing Problem for Increasing Function in a Model with Infinite Dimensional Nuisance Parameter		477
<i>M. Nikulin and V. Soley</i>		
36.1 Introduction	477	
36.2 Consistency of the Estimator $\hat{\theta}_n$	483	
36.3 Asymptotic Behavior of Kernel Estimators of Densities	486	
References	492	
37 The Concept of Generalized Asymptotic Deficiency and its Application to the Minimum Discrepancy Estimation		495
<i>M. Akahira</i>		
37.1 Introduction	495	
37.2 The Concept of Generalized Asymptotic Deficiency	496	
37.3 An Application to the Minimum Discrepancy Estimation	500	
References	502	
Index		505
