

Green Marketing Strategies: A Study of Selected Leading Companies

Deepak Kumar¹ & Suman Lata²

Abstract

Green marketing requires awareness not only from customer but also from the manufacture of goods which are consumer goods as well as industrial goods. The main objective of the present study is to understand the impact of green marketing on the companies. In the field of ethics and social responsibility, green marketing themes are core areas related to environmental safety and human wellbeing. Finding suggests that the companies have favorable attitude towards green product and green marketing because green marketing helps in improving the sales and the image of the companies.

Keywords: green marketing, green product, biodegradable

INTRODUCTION

Marketing is an ancient art and has since the days of Adam and Eve has practiced in one form or the other. In the modern world marketing is everywhere most of the task we do and most of the things we handle are linked to the marketing like your morning tea , coffee , newspaper , breakfast , the shirt you put for the day etc. has been touch by marketing . Thus, we have MRTP act 1969, CONSUMER PROTECTION act 1986 and other two contain the strength of manufacture and marketer to bend to the demand of

consumer friendly and environment friendly. From the very beginning the marketer produce only those products from those they gain profit by neglecting the consumer and environment. Since last few years a revolutionary change has been taken in a world of marketing by using the concept of 'green marketing'. As individuals become more committed to environment green product will gain a competitive edge, but because environment claims have been used to mislead customers, some firms are finding it difficult to successfully launch green marketing program me. This is happening due to rapidly increase in awareness among general public about the importance and urgency of the green issues.

'Green Marketing' is the marketing of product that are presumed to be environmentally safe. For the survival of the companies it is required to adopt green marketing and produce green product. Green products are those which are recyclable, reusable and biodegradable and those products which does not harm or pollute the environment. Green product are also called 'eco friendly product'. Under green marketing companies use eco friendly packaging also.

Green marketing strategy have various benefits to companies like increase in revenue , reduce cost , new product development , risk minimization , environment protection , global safety and brand reputation. Companies should adopt innovative methods for the sustainable development in the competitive environment through using the green marketing products.

According to the American Marketing Association, "green marketing is the marketing of products that are presumed to be environmentally safe." Green marketing definitions can be a little confusing, since green marketing can refer to anything from greening product development to the actual advertising campaign itself. Going by alternative names such as sustainable marketing, environmental marketing, green advertising, eco marketing, organic marketing, all of which point to similar concepts though perhaps in a more specific fashion, green marketing is essentially a way to brand your marketing message in order to capture more of the market by appealing to people's desire to choose products and services that are better for the environment.

OBJECTIVES OF THE STUDY

The present study has following objectives;

1. To analyze the impact of green marketing in various companies.
2. To examine whether the existing green marketing practices have any influence on the companies
3. To study the companies attitude towards the green product and green marketing.

LITERATURE PREVIEW

Environmental marketing more popularly known as ‘green marketing or sustainable marketing ‘ can be defined as effort by the company to design, promote, price and distribute product in a manner which protect environment (Polonsky, 2011). Unruh and ettenson (2010) publish their seminar work about going green marketing distribution method for executive who believe that developing green products makes sense for their organization.

Green marketing involves developing good quality products which can make customer needs and wants by focusing on quality, performance, pricing in an environmentally way (Dutta, 2009). According to popular survey it is 7% of the people from various nations have shown an interest in reducing their impact on environment (Mckinsey, 2007).

Newspapers, magazines and television as the main channel of information of green product in Malaysia and majority of the public relied on these media (Mohd Rafi and Azman, 2003). The greater awareness of environmental justice in green marketing and suggest to determine consumer awareness of environmental integrity and consumer willingness to bear the cost associated with it (Oyewole, 2001).

Charter (1999) argued that businesses are faced with increasing challenges of environme3ntal protection and demand for environmental friendly products and services.

According to Phillips (1999), consumers are willing to pay premium for green products because they prioritize green attributes in the green products.

Specially, green marketing leads to personal reverts of healthier and more fulfilled , lives, include organizational performance, better physical environment and ultimately

To sustainable development (OTTMAN, 1998, and Villums, 1998).

Marketing, just like other business functional areas, has a role to play in providing solution to in environmental problem of today a bringing sustainable development (Polonsky and Mintu, 1997). Green marketing should be more than either a green way of marketing, or the marketing so called Green products (Kangis, 1992).

METHODOLOGY

The present study is entirely based on secondary data. Secondary data was collected through the journals – online and printed, websites and books. This study is an attempt to test the factors and impact of green marketing among the various companies. Here sample was taken from three companies.
