GREEN'S FUNCTIONS AND BOUNDARY VALUE PROBLEMS

IVAR STAKGOLD University of Delaware

A WILEY-INTERSCIENCE PUBLICATION

JOHN WILEY & SONS, New York • Chichester • Brisbane • Toronto

Contents

0.	Pre	eliminaries	1
	1.	Heat Conduction, 2	
	2.	Diffusion, 7	
	3.	Chemical Engineering Problems, 9	
	4.	The Motion of Rods and Strings, 14	
	5.	Neutron Transport, 25	
	6.	Notes on Convergence, 30	
	7.	The Lebesgue Integral, 36	
1.	Gr	een's Functions (Intuitive Ideas)	42
	Ì.	Introduction and General Comments, 42	
	2.	The Finite Rod, 51	
	3.	Maximum Principle, 64	
	4.	Examples of Green's Functions, 68	
2.	Th	e Theory of Distributions	86
	1.	Basic Ideas, Definitions, Examples, 86	
	2.	Convergence of Sequences and Series of Distributions, 106	
	3.	Fourier Series, 125	
	4.	Fourier Transforms and Integrals, 143	
	5.	Differential Equations in Distributions, 164	
3.	One-Dimensional Boundary Value Problems		185
	1.	Review, 185	
	2.	Boundary Value Problems for Second-Order Equations, 191	
	3.	Boundary Value Problems for Equations of Order p, 203	
	4.	Alternative Theorems, 207	
	5.	Modified Green's Functions, 215	

	4.	Metric Spaces and Hilbert Spaces	221
		1. Functions and Transformations, 221	
		2. Linear Spaces, 225	
		3. Metric Spaces, 233	
		4. Contractions, 243	
		5. Norm, Inner Product, Banach Space, Hilbert Space, 259	
		6. Separable Hilbert Spaces and Orthonormal Bases, 275	
		7. Linear Functionals, 290	
	5.	Operator Theory	295
		1 Basic Ideas and Examples 295	
		2 Closed Operators 303	
		3. Invertibility—the State of an Operator, 308	
		4. Adjoint Operators, 313	
		5. Solvability Conditions, 319	
		6. The Spectrum of an Operator, 324	
		7. Compact Operators, 335	
		8. Extremal Properties of Operators, 339	
	6	Integral Equations	247
	υ.	Integral Equations	34/
		1. Introduction, 347	
		2. Fredholm Integral Equations, 356	
		3 The Spectrum of a Self-Adjoint Compact Operator 360	
		J. The Spectrum of a ben-Adjoint Compact Operator, 509	
		 4. The Inhomogeneous Equation, 378 5. Variational Principles and Palated Approximation Mathematical Principles and Palated Approximation Pal	202
		 The Spectrum of a Scherkdjoint Compact Operator, 309 The Inhomogeneous Equation, 378 Variational Principles and Related Approximation Methods, 3 	392
	7.	 The Spectrum of a Scherkdjoint Compact Operator, 309 The Inhomogeneous Equation, 378 Variational Principles and Related Approximation Methods, 3 Spectral Theory of Second-Order Differential Operators 	392 411
	7.	 The Spectrum of a Scherkdjoint Compact Operator, 309 The Inhomogeneous Equation, 378 Variational Principles and Related Approximation Methods, 1 Spectral Theory of Second-Order Differential Operators Introduction: the Regular Problem, 411 	392 411
	7.	 The Spectrum of a Scherktjoint Compact Operator, 309 The Inhomogeneous Equation, 378 Variational Principles and Related Approximation Methods, 3 Spectral Theory of Second-Order Differential Operators Introduction; the Regular Problem, 411 Weyl's Classification of Singular Problems, 438 	392 411
•	7.	 The Spectrum of a Scherkhjohnt Compact Operator, 309 The Inhomogeneous Equation, 378 Variational Principles and Related Approximation Methods, 3 Spectral Theory of Second-Order Differential Operators Introduction; the Regular Problem, 411 Weyl's Classification of Singular Problems, 438 Spectral Problems with a Continuous Spectrum, 451 	392 411
	7.	 The Spectrum of a Scherkhjohnt Compact Operator, 309 The Inhomogeneous Equation, 378 Variational Principles and Related Approximation Methods, 3 Spectral Theory of Second-Order Differential Operators Introduction; the Regular Problem, 411 Weyl's Classification of Singular Problems, 438 Spectral Problems with a Continuous Spectrum, 451 	392 4 11
•	7. 8 .	 The Spectrum of a Scherkhjohnt Compact Operator, 309 The Inhomogeneous Equation, 378 Variational Principles and Related Approximation Methods, 3 Spectral Theory of Second-Order Differential Operators Introduction; the Regular Problem, 411 Weyl's Classification of Singular Problems, 438 Spectral Problems with a Continuous Spectrum, 451 Partial Differential Equations 	392 411 467
1	7. 8.	 The Spectrum of a Scherkhjohnt Compact Operator, 309 The Inhomogeneous Equation, 378 Variational Principles and Related Approximation Methods, 3 Spectral Theory of Second-Order Differential Operators Introduction; the Regular Problem, 411 Weyl's Classification of Singular Problems, 438 Spectral Problems with a Continuous Spectrum, 451 Partial Differential Equations Classification of Partial Differential Equations, 467 	392 411 467
1	7. 8.	 The Spectrum of a Scherkholm Compact Operator, 309 The Inhomogeneous Equation, 378 Variational Principles and Related Approximation Methods, 3 Spectral Theory of Second-Order Differential Operators Introduction; the Regular Problem, 411 Weyl's Classification of Singular Problems, 438 Spectral Problems with a Continuous Spectrum, 451 Partial Differential Equations Classification of Partial Differential Equations, 467 Typical Well-Posed Problems for Hyperbolic and Parabolic Equations, 482 	392 411 467
•	7. 8.	 The Spectrum of a Scherkholm Compact Operator, 309 The Inhomogeneous Equation, 378 Variational Principles and Related Approximation Methods, 3 Spectral Theory of Second-Order Differential Operators Introduction; the Regular Problem, 411 Weyl's Classification of Singular Problems, 438 Spectral Problems with a Continuous Spectrum, 451 Partial Differential Equations Classification of Partial Differential Equations, 467 Typical Well-Posed Problems for Hyperbolic and Parabolic Equations, 482 Elliptic Equations, 501 	392 411 467
•	7. 8.	 The Spectrum of a Scherkholm Compact Operator, 309 The Inhomogeneous Equation, 378 Variational Principles and Related Approximation Methods, 3 Spectral Theory of Second-Order Differential Operators Introduction; the Regular Problem, 411 Weyl's Classification of Singular Problems, 438 Spectral Problems with a Continuous Spectrum, 451 Partial Differential Equations Classification of Partial Differential Equations, 467 Typical Well-Posed Problems for Hyperbolic and Parabolic Equations, 482 Elliptic Equations, 501 Variational Principles for Inhomogeneous Problems, 520 	392 411 467

xiv

CONTENTS

9. Nonlinear Problems

- 1. Introductory Concepts, 563
- 2. Branching Theory, 582
- 3. Perturbation Theory for Linear Problems, 591
- 4. Techniques for Nonlinear Problems, 603
- 5. The Stability of the Steady State, 621
