<i>Series Foreword</i>	xi
<i>Foreword</i>	xiii
<i>Perspective</i>	xv
<i>Preface</i>	xix
<i>Acknowledgments</i>	xxiii
<i>Advisory Board</i>	xxv
<i>About the Editor</i>	xxix
<i>Contributors</i>	xxx

## I: INTRODUCTION

1 Virtual Environments in the 21st Century <i>Kay M. Stanney and Michael Zyda</i>	1
2 Virtual Environments Standards and Terminology <i>Richard A. Blade and Mary Lou Padgett</i>	15

## II: SYSTEM REQUIREMENTS

### Hardware Requirements

3 Vision and Virtual Environments <i>James G. May and David R. Badcock</i>	29
4 Virtual Auditory Displays <i>Russell D. Shilling and Barbara Shinn-Cunningham</i>	65
5 Haptic Interfaces <i>S. James Biggs and Mandayam A. Srinivasan</i>	93
6 Haptic Rendering in Virtual Environments <i>Cagatay Basdogan and Mandayam A. Srinivasan</i>	117
7 User Requirements for Perceiving Body Acceleration <i>Ben D. Lawson, Stephanie A. Sides, and K. Amy Hickinbotham</i>	135
8 Motion Tracking Requirements and Technologies <i>Eric Foxlin</i>	163

<b>9</b>	Eye Tracking in Virtual Environments <i>Joseph Wilder, George K. Hung, Marilyn Mantei Tremaine, and Manpreet Kaur</i>	<b>211</b>
<b>10</b>	Gesture Recognition <i>Matthew Turk</i>	<b>223</b>
<b>11</b>	Locomotion Interfaces <i>John M. Hollerbach</i>	<b>239</b>
<b>Software Requirements</b>		
<b>12</b>	Virtual Environment Models <i>G. Drew Kessler</i>	<b>255</b>
<b>13</b>	Principles for the Design of Performance-oriented Interaction Techniques <i>Doug A. Bowman</i>	<b>277</b>
<b>14</b>	Technological Considerations in the Design of Multisensory Virtual Environments: The Virtual Field of Dreams Will Have to Wait <i>W. Todd Nelson and Robert S. Bolia</i>	<b>301</b>
<b>15</b>	Embodied Autonomous Agents <i>Jan M. Allbeck and Norman I. Badler</i>	<b>313</b>
<b>16</b>	Internet-based Virtual Environments <i>Charles E. Hughes, J. Michael Moshell, and Dean Reed</i>	<b>333</b>
<b>Application Requirements</b>		
<b>17</b>	Structured Development of Virtual Environments <i>John R. Wilson, Richard M. Eastgate, and Mirabelle D'Crux</i>	<b>353</b>
<b>18</b>	Influence of Individual Differences on Application Design for Individual and Collaborative Immersive Virtual Environments <i>David B. Kaber, John V. Draper, and John M. Usher</i>	<b>379</b>
<b>19</b>	Using Virtual Environments as Training Simulators: Measuring Transfer <i>Corinna E. Lathan, Michael R. Tracey, Marc M. Sebrecchts, Deborah M. Clawson, and Gerald A. Higgins</i>	<b>403</b>
<b>III: DESIGN APPROACHES AND IMPLEMENTATIONS STRATEGIES</b>		
<b>20</b>	Cognitive Aspects of Virtual Environments Design <i>Allen Munro, Robert Breaux, Jim Patrey, and Beth Sheldon</i>	<b>415</b>
<b>21</b>	Multimodal Interaction Modeling <i>George V. Popescu, Grigore C. Burdea, and Helmuth Trefftz</i>	<b>435</b>
<b>22</b>	Auditory–Visual Cross-Modality Interaction and Illusions <i>Russell L. Storms</i>	<b>455</b>
<b>23</b>	Illusory Self-motion in Virtual Environments <i>Lawrence J. Hettinger</i>	<b>471</b>
<b>24</b>	Spatial Orientation, Wayfinding, and Representation <i>Rudolph P. Darken and Barry Peterson</i>	<b>493</b>
<b>25</b>	Content Design for Virtual Environments <i>Jerry Isdale, Clive Fencott, Michael Heim, and Leonard Daly</i>	<b>519</b>
<b>26</b>	Technology Management and User Acceptance of Virtual Environment Technology <i>David Gross</i>	<b>533</b>

<b>27</b>	Virtual Environments and Product Liability <i>Robert S. Kennedy, Kristyne E. Kennedy, and Kathleen M. Bartlett</i>	<b>543</b>
<b>28</b>	Virtually a Market? Selling Practice and the Diffusion of Virtual Reality <i>G. M. Peter Swann and Robert J. Stone</i>	<b>555</b>
<b>IV: HEALTH AND SAFETY ISSUES</b>		
<b>29</b>	Direct Effects of Virtual Environments on Users <i>Erik Viirre and David Bush</i>	<b>581</b>
<b>30</b>	Signs and Symptoms of Human Syndromes Associated with Synthetic Experiences <i>Ben D. Lawson, David A. Graeber, Andrew M. Mead, and Eric R. Muth</i>	<b>589</b>
<b>31</b>	Adapting to Virtual Environments <i>Robert B. Welch</i>	<b>619</b>
<b>32</b>	Motion Sickness Neurophysiology, Physiological Correlates, and Treatment <i>Deborah L. Harm</i>	<b>637</b>
<b>33</b>	The Social Impact of Virtual Environment Technology <i>Sandra L. Calvert</i>	<b>663</b>
<b>V: EVALUATION</b>		
<b>34</b>	Usability Engineering of Virtual Environments <i>Deborah Hix and Joseph L. Gabbard</i>	<b>681</b>
<b>35</b>	Human Performance Measurement in Virtual Environments <i>Donald Ralph Lampton, James P. Bliss, and Christina S. Morris</i>	<b>701</b>
<b>36</b>	Virtual Environment Usage Protocols <i>Kay M. Stanney, Robert S. Kennedy, and Kelly Kingdon</i>	<b>721</b>
<b>37</b>	Measurement of Visual Aftereffects Following Virtual Environment Exposure <i>John P. Wann and Mark Mon-Williams</i>	<b>731</b>
<b>38</b>	Proprioceptive Adaptation and Aftereffects <i>Paul DiZio and James R. Lackner</i>	<b>751</b>
<b>39</b>	Vestibular Adaptation and Aftereffects <i>Thomas A. Stoffregen, Mark H. Draper, Robert S. Kennedy, and Daniel Compton</i>	<b>773</b>
<b>40</b>	Presence in Virtual Environments <i>Wallace Sadowski and Kay Stanney</i>	<b>791</b>
<b>41</b>	Ergonomics in Virtual Environments <i>Pamela R. McCauley Bell</i>	<b>807</b>
<b>VI: SELECTED APPLICATIONS OF VIRTUAL ENVIRONMENTS</b>		
<b>42</b>	Applications of Virtual Environments: An Overview <i>Robert J. Stone</i>	<b>827</b>
<b>43</b>	National Defense <i>Bruce W. Knerr, Robert Breaux, Stephen L. Goldberg, and Richard A. Thurman</i>	<b>857</b>
<b>44</b>	Team Training in Virtual Environments: An Event-based Approach <i>Eduardo Salas, Randall L. Oser, Janis A. Cannon-Bowers, and Eleni Daskarolis</i>	<b>873</b>

<b>45</b>	Virtual Environments As a Tool for Academic Learning <i>J. Michael Moshell and Charles E. Hughes</i>	<b>893</b>
<b>46</b>	Development and Evaluation of Virtual Environments for Education <i>Sue Cobb, Helen Neale, Joanna Crosier, and John R. Wilson</i>	<b>911</b>
<b>47</b>	Medical Applications of Virtual Environments <i>Richard M. Satava and Shaun B. Jones</i>	<b>937</b>
<b>48</b>	Virtual Environment–Assisted Teleoperation <i>Abderrahmane Kheddar, Ryad Chellali, and Philippe Coiffet</i>	<b>959</b>
<b>49</b>	Use of Virtual Environments in Motor Learning and Rehabilitation <i>Maureen K. Holden and Emanuel Todorov</i>	<b>999</b>
<b>50</b>	Virtual Environment Applications in Clinical Neuropsychology <i>Albert A. Rizzo, J. Galen Buckwalter, and Cheryl van der Zaag</i>	<b>1027</b>
<b>51</b>	Virtual Reality Therapy: An Effective Treatment for Psychological Disorders <i>Max M. North, Sarah M. North, and Joseph R. Coble</i>	<b>1065</b>
<b>52</b>	Applications of Systems Design Using Virtual Environments <i>Roy C. Davies</i>	<b>1079</b>
<b>53</b>	Information Visualization in Virtual Environments <i>Steve Bryson</i>	<b>1101</b>
<b>54</b>	Virtual Environments in Manufacturing <i>John P. Shewchuk, Kyung H. Chung, and Robert C. Williges</i>	<b>1119</b>
<b>55</b>	Entertainment Applications of Virtual Environments <i>Eric Badiqué, Marc Cavazza, Gudrun Klinker, Gordon Mair, Tony Sweeney, Daniel Thalmann, and Nadia M. Thalmann</i>	<b>1143</b>
<b>VII: CONCLUSION</b>		
<b>56</b>	Virtual Environments: History and Profession <i>Richard A. Blade and Mary Lou Padgett</i>	<b>1167</b>
