

Contents

Part I Overview and System Technologies

1 Social Demand of New Generation Information Network: Introduction to High Spectral Density Optical Communication Technology	3
Takeshi Kamiya, Tetsuya Miyazaki, and Fumito Kubota	
2 Coherent Optical Communications: Historical Perspectives and Future Directions	11
Kazuro Kikuchi	
3 Ultrahigh Spectral Density Coherent Optical Transmission Technologies	51
Masataka Nakazawa	
4 “Quasi Ultimate” Technique	81
Tetsuya Miyazaki	
5 High-Speed and High-Capacity Optical Transmission Systems	103
Peter J. Winzer and Rene-Jean Essiambre	

Part II Advanced Modulation Formats

6 Multilevel Signaling with Direct Detection	131
Nobuhiko Kikuchi	
7 High Spectral Efficiency Coherent Optical OFDM	141
William Shieh and Xingwen Yi	

8 Polarization Division-Multiplexed Coherent Optical OFDM Transmission Enabled by MIMO Processing	167
Sander L. Jansen and Itsuro Morita	
9 No-Guard-Interval Coherent Optical OFDM with Frequency Domain Equalization	179
Yutaka Miyamoto and Yasuyuki Takatori	
10 QPSK-Based Transmission System: Trade-Offs Between Linear and Nonlinear Impairments	191
Takeshi Hoshida and Jens C. Rasmussen	
11 Real-Time Digital Coherent QPSK Transmission Technologies	203
Timo Pfau and Reinhold Noé	
12 Challenge for Full Control of Polarization in Optical Communication Systems	215
Shiro Ryu	
 Part III Opto-electronics Devices	
13 Semiconductor Lasers for High-Density Optical Communication Systems	229
Hiroyuki Uenohara	
14 Monolithic InP Photonic Integrated Circuits for Transmitting or Receiving Information with Augmented Fidelity or Spectral Efficiency	251
C.R. Doerr	
15 Integrated Mach–Zehnder Interferometer-Based Modulators for Advanced Modulation Formats	273
Tetsuya Kawanishi	
16 Key Devices for High-Speed Optical Communication and Their Application to Transceiver Module	287
Hiroyuki Matsuura	
17 Forward Error Correction	303
Takashi Mizuochi	
Index	335
