CONTENTS

PREFACE	xvii
CUMULATIVE LISTING OF VOLUMES IN SERIES	xix

INSTRUMENTATION

CHAPTER 1 PRINCIPLE, APPARATUS, AND METHODOLOGY OF HIGH-SPEED COUNTERCURRENT CHROMATOGRAPHY	3
<i>Yoichiro Ito</i>	
1.1. Introduction	3
1.2. Principle of High-Speed Countercurrent Chromatography	5
1.2.1. Two-Phase Distribution in a Rotating Coil in Unit Gravity	5
1.2.2. Flow-Through Coil Planet Centrifuge Free of Rotary Seals	11
1.2.3. Mechanism of High-Speed Countercurrent Chromatography	13
1.3. High-Speed Countercurrent Chromatograph Instrumentation	16
1.3.1. Multilayer Coil Planet Centrifuge (Type J)	16
1.3.2. Cross-Axis Synchronous Flow-Through Coil Planet Centrifuge	22
1.4. Phase Distribution Diagrams	26
1.4.1. Retention of Stationary Phase in Type J Coil Planet Centrifuge	28
1.4.2. Retention of Stationary Phase in Cross- Axis Coil Planet Centrifuges	31
1.4.3. Settling Time	34
1.5. General Methodology of High-Speed Countercurrent Chromatography	36
1.5.1. Partition Coefficient	36
1.5.2. Preparation of Sample Solution	39

1.5.3. Elution	40
1.5.4. Detection	41
References	42
CHAPTER 2 ANALYTICAL HIGH-SPEED COUNTERCURRENT CHROMATOGRAPHY	45
<i>Daniel E. Schaufelberger</i>	
2.1. Introduction	45
2.2. Development of Analytical High-Speed Countercurrent Chromatography	45
2.3. Theory	46
2.4. Practical Considerations	51
2.4.1. Instrumentation	51
2.4.2. Solvent Systems	56
2.4.3. Handling	56
2.4.4. Detection	57
2.5. Applications	60
2.5.1. Methods Development	60
2.5.2. Measurement of Partition Coefficients	62
2.5.3. Natural Products Isolation	63
2.6. Discussion	66
References	68
SPECIAL TECHNIQUES	
CHAPTER 3 HIGH-SPEED COUNTERCURRENT CHROMATOGRAPHY/MASS SPECTROMETRY	73
<i>Hisao Oka</i>	
3.1. Introduction	73
3.2. Previous Interfacing of HSCCC With Thermospray Mass Spectrometry	75
3.3. Direct Interfacing of HSCCC With Frit Electron Ionization, Chemical Ionization, and Fast Atom Bombardment Mass Spectrometry	75
3.4. HSCCC/Frit EIMS of Indole Auxins	78
3.5. HSCCC/Frit CIMS of Mycinamicins	80
3.6. HSCCC/Frit FABMS of Colistin Complex	85
3.7. Conclusion	90
References	90

CHAPTER 4	DUAL COUNTERCURRENT CHROMATOGRAPHY	93
	<i>Y. W. Lee</i>	
	4.1. Introduction	93
	4.2. Principles and Mechanism	94
	4.3. Methods and Apparatus	95
	4.4. Applications	97
	4.5. Conclusion	104
	References	104
CHAPTER 5	FOAM COUNTERCURRENT CHROMATOGRAPHY OF BACITRACIN COMPLEX	107
	<i>Hisao Oka</i>	
	5.1. Introduction	107
	5.2. Apparatus of Foam Countercurrent Chromatography	108
	5.3. Previous Foam Countercurrent Chromatography Work	109
	5.4. Separation of Bacitracin Components With Nitrogen and Additive-Free Water	110
	5.5. Continuous Enrichment and Stripping of Bacitracin Components	117
	5.6. Conclusion	118
	References	120
CHAPTER 6	pH-PEAK-FOCUSING AND pH-ZONE- REFINING COUNTERCURRENT CHROMATOGRAPHY	121
	<i>Yoichiro Ito</i>	
	6.1. Introduction	121
	6.2. pH-Peak-Focusing Countercurrent Chromatography	121
	6.2.1. Research for the Causative Agent Sharpening the BrAcT ₃ Peak	121
	6.2.2. Chemohydrodynamic Mechanism of pH- Peak-Focusing	126
	6.2.3. Advanced Peak-Focusing Technique	136
	6.2.4. Conclusion	140
	6.3. pH-Zone-Refining Countercurrent Chromatography	141

6.3.1. Characteristic Features of pH-Zone-Refining CCC	141
6.3.2. Chemohydrodynamic Mechanism of pH-Zone-Refining CCC	143
6.3.3. Simple Mathematical Model of pH-Zone-Refining CCC	147
6.3.4. Displacement pH-Zone-Refining CCC	155
6.3.5. pH-Zone-Refining CCC versus Displacement Chromatography	158
6.3.6. Applications of pH-Zone-Refining CCC	163
6.3.7. Conclusion	173
References	174

APPLICATIONS

CHAPTER 7 HIGH-SPEED COUNTERCURRENT CHROMATOGRAPHY OF NATURAL PRODUCTS 179

Marc Maillard, Andrew Marston, and Kurt Hostettmann

7.1. Introduction	179
7.1.1. Instruments	181
7.1.2. Solvent Systems	184
7.2. Preparative Applications	189
7.2.1. Flavonoids	190
7.2.2. Xanthones	195
7.2.3. Tannins	195
7.2.4. Lignans	198
7.2.5. Monoterpene Glycosides	200
7.2.6. Saponins	202
7.2.7. Alkaloids	203
7.2.8. Carotenoids	204
7.2.9. Gingerols	204
7.2.10. Polyacetylenic Alcohols	205
7.2.11. Marine Natural Products	206
7.2.12. Antibiotics	210
7.3. Analytical Applications	211
7.3.1. Alkaloids	212
7.3.2. Anthraquinones	215
7.3.3. Coumarins	215
7.3.4. Flavonoids	215

7.3.5. Lignans	216
7.3.6. Macrolides	216
7.3.7. Triterpenoids	217
7.4. Conclusions	218
References	218

CHAPTER 8 HIGH-SPEED COUNTERCURRENT CHROMATOGRAPHY ON MEDICINAL HERBS **225**

Tian-You Zhang

8.1. Introduction	225
8.2. The Present Status of High-Speed Countercurrent Chromatography on Isolation of Medicinal Herbs	226
8.3. Separations of Substances Prepared From Medicinal Herbs by the Horizontal Flow-Through Coil Planet Centrifuge	227
8.3.1. Apparatus and Experimental Procedures	227
8.3.2. Separations of a Group of Similar Substances	228
8.3.3. Studies on the Preparative Capability of CPC and HPLC in the Separation of Polar Compounds	231
8.4. Separation of Alkaloids, Hydroxyanthraquinones, and Flavonoids by Analytical HSCCC	236
8.4.1. Apparatus and Experimental Procedures	236
8.4.2. Separation of Alkaloids Extracted from <i>Stephania tetrandia</i> S. Moore	236
8.4.3. Separation of Hydroxyanthraquinone Derivatives Extracted from Rhubarb	240
8.4.4. Rapid Separation of Flavonoids Extracted from Sea Buckthorn (<i>Hippophae rhamnoides</i>)	242
8.5. Separations of Flavonoids and Alkaloids by Multilayer Coil Separator and Extractor	245
8.5.1. Apparatus and Experimental Procedures	245

8.5.2. Separation of <i>Daphne genkwa</i> Flavonoids	247
8.5.3. Separation of Flavonoids from Crude Extracts of Sea Buckthorn (<i>Hippophae rhamnoides</i>)	249
8.5.4. Separation of Alkaloids from <i>Anisodus tangulicus</i> (Maxin) Pasch	250
8.6. Semipreparative Separation of Alkaloids by GS-10A HSCCC	252
8.6.1. Apparatus and Experimental Procedures	252
8.6.2. Separation of Alkaloids from <i>Sophora flavescens</i> Ait and <i>Datura mete</i> L.	252
8.6.3. Separation of Alkaloids from <i>Cephalotaxus fortunei</i> Hook F.	255
8.6.4. Separation of Alkaloids from <i>Senecio fuberi</i> Hemsl	256
8.6.5. Separation of Vincamine and Vincine	259
8.7. Conclusion	262
References	263

**CHAPTER 9 ISOLATION OF MARINE NATURAL
PRODUCTS BY HIGH-SPEED
COUNTERCURRENT CHROMATOGRAPHY 265**

Nancy L. Fregeau and Kenneth L. Rinehart

9.1. Introduction	265
9.2. Alternative Separation Techniques	267
9.3. Countercurrent Chromatography	268
9.4. Examples of Marine Natural Product Isolations Using High-Speed Countercurrent Chromatography	268
9.4.1. Macrolides	269
9.4.2. Polyethers	273
9.4.3. Other Acetate-Derived Metabolites	275
9.4.4. Terpenes and Steroids	276
9.4.5. Peptides	278
9.4.6. Nitrogen-Containing Heterocycles	280
9.5. Conclusion	296
References	297

CHAPTER 10	SEPARATION OF COMPLICATED ANTIBIOTICS BY HIGH-SPEED COUNTERCURRENT CHROMATOGRAPHY	301
	<i>Ken-Ichi Harada</i>	
10.1.	Introduction	301
10.2.	Selected Antibiotics	302
10.3.	Operation of HSCCC	304
10.4.	Establishment of HPLC for SVD and BC	304
10.5.	Selection of Proper Two-Phase Solvent System	307
10.6.	Separation of SVD and BC Components by HSCCC	314
10.7.	Comparison of Elution Behavior of SVD and BC between HPLC and HSCCC	314
10.8.	Conclusion	317
	References	318
CHAPTER 11	<i>N</i>-BROMOACETYL-3,3',5'-TRIIODO-L-THYRONINE AND <i>N</i>-BROMOACETYL-L-THYROXINE: SYNTHESIS AND CHARACTERIZATION	321
	<i>Hans J. Cahnmann</i>	
11.1.	Introduction	321
11.2.	Synthesis	322
	11.2.1. Synthesis of BrAcT ₃	324
	11.2.2. Synthesis of BrAcT ₄	325
11.3.	Purification	326
	11.3.1. High-Speed Countercurrent Chromatography	326
	11.3.2. Solvents	328
	11.3.3. Elution	330
	11.3.4. Eluate Scanning	330
	11.3.5. Storage of HSCCC-Purified BrAcT ₃ and BrAcT ₄	330
11.4.	Verification of Identity and Purity	331
	11.4.1. HPLC	331
	11.4.2. TLC	331
	11.4.3. Absorption Spectra in the Near UV	333
11.5.	Summary	334
	References	335

CHAPTER 12	SEPARATION AND PURIFICATION OF DYES BY CONVENTIONAL HIGH-SPEED COUNTERCURRENT CHROMATOGRAPHY AND pH-ZONE-REFINING COUNTERCURRENT CHROMATOGRAPHY	337
	<i>Adrian Weisz</i>	
12.1.	Introduction	337
12.2.	Instrumentation	338
12.3.	Conventional HSCCC Separations	338
12.3.1.	Sulforhodamine B	338
12.3.2.	Tetrabromotetrachlorofluorescein and Phloxine B	340
12.3.3.	Complementary Use of HSCCC and Preparative HPLC in the Separation of a Synthetic Mixture of Dyes	342
12.4.	pH-Zone-Refining Countercurrent Chromatography	347
12.4.1.	Introduction	347
12.4.2.	Principle	347
12.4.3.	Preliminary Requirements for pH-Zone-Refining CCC	350
12.4.4.	Preparative Separations of Brominated and Chlorinated Fluoresceins	352
12.4.5.	Preparative Separations of Iodinated Fluoresceins	375
12.5.	Conclusions	381
	References	382
CHAPTER 13	SEPARATION OF PROTEINS BY HIGH-SPEED COUNTERCURRENT CHROMATOGRAPHY	385
	<i>Yoichi Shibusawa</i>	
13.1.	Introduction	385
13.2.	Apparatus	386
13.3.	Polymer Phase Systems for Protein Separation	391
13.4.	Countercurrent Chromatography Fractionation of Proteins	391
13.4.1.	PEG-Potassium Phosphate Systems	391
13.4.2.	PEG-Dextran Polymer Phase System	404
13.5.	Conclusion	412
	References	413

CHAPTER 14 SEPARATION OF RARE EARTH AND CERTAIN INORGANIC ELEMENTS BY HIGH-SPEED COUNTERCURRENT CHROMATOGRAPHY	415
<i>Eiichi Kitazume</i>	
14.1. Introduction	415
14.2. Separation of Rare Earth Elements by High-Speed Countercurrent Chromatography	416
14.2.1. Description of the Instrument	416
14.2.2. Preparation of Two-Phase Solvent and Sample Solutions	419
14.2.3. Separation Procedure	419
14.2.4. Measurement of Partition Coefficients K_T and K_E	419
14.2.5. Partition Efficiencies	422
14.2.6. Gradient Elution of Fourteen Rare Earth Elements	426
14.3. Analytical Capability of High-Speed Countercurrent Chromatography for Rare Earth Elements	427
14.3.1. Reproducibility of Chromatogram	428
14.3.2. Quantitative Determination of Cerium Impurities in Erbium Chloride	430
14.4. Separation of Other Inorganic Elements by High-Speed Countercurrent Chromatography	430
14.4.1. Separation of Ortho- and Pyrophosphate Ions	431
14.4.2. Separation of Cesium and Strontium	432
14.4.3. Separation of Zirconium and Hafnium	432
14.4.4. Separation of Cadmium and Zinc	435
14.4.5. Separation of Nickel, Cobalt, Magnesium, and Copper	435
14.4.6. Separation of Copper, Cadmium, and Manganese	437
14.4.7. Separation of Iron(II) and Iron(III)	438
14.4.8. Preconcentration of Trace Elements from Certain Rock Macrocomponents	438
References	441
INDEX	445
