

Industrial Deployment of System Engineering Methods

Eds. **Alexander Romanovsky** [Newcastle University]
Martyn Thomas [Martyn Thomas Associates Ltd.]

ISBN 978-3-642-33169-5, ca. 300 pp., publication ca. 03/13, 84.95 Euros

Comment

"This book reports on a remarkable four-year experiment in the application of scientific method to the development and delivery of software products. Participants in the experiment included seven well-reputed universities, and four industries, spanning a range of sizes, and drawn from different industrial sectors. Over 157 person-years were expended in total.

This book conveys the fruits of the experience gained in the project. It gives a clear record of the successes of the project and of the challenges that remain. It should be studied by researchers who strive to advance the state of the art of programming in industry; also by innovative industries, wishing to judge the adequacy of the current state of the art to meet their future software development needs.

Above all, it should be read by all who are interested in a successful model of industrial and academic collaboration, and who wish such experiments to be repeated." [Tony Hoare, Microsoft Research]

Table of Contents

Foreword

[Michael Jackson]

Introduction

[Alexander Romanovsky, Martyn Thomas]

DEPLOY Integrated Project

[Alexander Romanovsky]

Experience of Deployment in the Automotive Industry

[Rainer Gmehlich, Cliff Jones]

Improving Railway Data Validation with ProB

[Jérôme Falampim, Hung Le-Dang, Michael Leuschel, Mikael Mokrani, Daniel Plagge]

Deployment in the Space Sector

[Dubravka Ilić, Linas Laibinis, Timo Latvala, Elena Troubitsyna, Kimmo Varpaaniemi]

Business Information Sector

[Sebastian Wieczorek, Vitaly Kozyura, Wei Wei, Andreas Roth, Alin Stefanescu]

Formal Methods as an Improvement Tool

[Aryldo G. Russo Jr.]

Critical Software Technologies' Experience with Formal Methods

[Alex Hill, Jose Reis, Paulo Carvalho]

Experiences Developing Event-B in an Industrial Microprocessor Development

[Stephen Wright, Kerstin Eder]

Industrial Deployment of Formal Methods: Trends and Challenges

[John S. Fitzgerald, Juan C. Bicarregui, Peter Gorm Larsen, Jim Woodcock]

Introducing Formal Methods into Existing Industrial Practices

[Martyn Thomas, Alexander Romanovsky]

Tooling

[Michael Butler, Laurent Voisin, Thomas Muller]

Technology Transfer

[David Basin, Thai Son Hoang]

After and Outside DEPLOY: the DEPLOY Ecosystem

[Alexander Romanovsky]

Industrial Software Engineering and Formal Methods

[Martyn Thomas, Alexander Romanovsky]

App. A – An Introduction to the Event-B Modelling Method

[Thai Son Hoang]

App. B – Evidence-Based Assistance for the Adoption of Formal Methods in Industry

[Jean-Christophe Deprez, Christophe Ponsard, Renaud De Landtsheer]
