# Contents

<b>I. INTRODUCTION AND OVERVIEW</b>	<b>1</b>
§ 1. Introduction .....	1
§ 2. Elementary considerations and examples .....	2
§ 3. Processes with stationary independent increments .....	6
§ 4. Canonical representations .....	11
§ 5. The central limit problem .....	13
§ 6. Other types of divisibility .....	19
§ 7. Notes .....	21
<b>II. INFINITELY DIVISIBLE DISTRIBUTIONS ON THE NONNEGATIVE INTEGERS</b>	<b>23</b>
§ 1. Introduction .....	23
§ 2. Elementary properties .....	25
§ 3. Compound distributions .....	30
§ 4. Canonical representation .....	34
§ 5. Compound-exponential distributions .....	39
§ 6. Closure properties .....	43
§ 7. Moments .....	46
§ 8. Support .....	50
§ 9. Tail behaviour .....	54
§10. Log-convexity .....	59
§11. Examples .....	65
§12. Notes .....	75
<b>III. INFINITELY DIVISIBLE DISTRIBUTIONS ON THE NONNEGATIVE REALS</b>	<b>77</b>
§ 1. Introduction .....	77
§ 2. Elementary properties .....	79
§ 3. Compound distributions .....	84
§ 4. Canonical representation .....	89

§ 5. Compound-exponential distributions .....	99
§ 6. Closure properties .....	103
§ 7. Moments .....	106
§ 8. Support .....	109
§ 9. Tail behaviour .....	113
§10. Log-convexity .....	116
§11. Examples .....	124
§12. Notes .....	133

## **IV. INFINITELY DIVISIBLE DISTRIBUTIONS ON THE REAL LINE**

**135**

§ 1. Introduction .....	135
§ 2. Elementary properties .....	137
§ 3. Compound distributions .....	145
§ 4. Canonical representation .....	151
§ 5. Compound-exponential distributions .....	169
§ 6. Closure properties .....	175
§ 7. Moments .....	176
§ 8. Support .....	182
§ 9. Tail behaviour .....	189
§10. Log-convexity .....	201
§11. Examples .....	208
§12. Notes .....	218

## **V. SELF-DECOMPOSABILITY AND STABILITY**

**221**

§ 1. Introduction .....	221
§ 2. Self-decomposability on the nonnegative reals .....	224
§ 3. Stability on the nonnegative reals .....	241
§ 4. Self-decomposability on the nonnegative integers .....	246
§ 5. Stability on the nonnegative integers .....	262
§ 6. Self-decomposability on the real line .....	268
§ 7. Stability on the real line .....	286
§ 8. Self-decomposability and stability induced by semi-groups .....	300
§ 9. Examples .....	308
§10. Notes .....	325

<b>VI. INFINITE DIVISIBILITY AND MIXTURES</b>	<b>327</b>
§ 1. Introduction .....	327
§ 2. Two important types of mixtures .....	329
§ 3. Mixtures of exponential distributions .....	331
§ 4. Mixtures of gamma distributions .....	343
§ 5. Generalized gamma convolutions .....	349
§ 6. Mixtures of Poisson distributions .....	367
§ 7. Mixtures of negative-binomial distributions .....	378
§ 8. Generalized negative-binomial convolutions .....	387
§ 9. Mixtures of zero-mean normal distributions .....	394
§10. Mixtures of sym-gamma distributions .....	398
§11. Generalized sym-gamma convolutions .....	403
§12. Examples .....	409
§13. Notes .....	422
 <b>VII. INFINITE DIVISIBILITY IN STOCHASTIC PROCESSES</b>	 <b>425</b>
§ 1. Introduction .....	425
§ 2. First-passage times in Markov chains .....	426
§ 3. Waiting times in queueing processes .....	431
§ 4. Branching processes .....	433
§ 5. Renewal processes .....	439
§ 6. Shot noise .....	449
§ 7. Examples .....	450
§ 8. Notes .....	461
 <hr/>	
<b>Appendix A. Prerequisites from probability and analysis</b>	<b>465</b>
§ 1. Introduction .....	465
§ 2. Distributions on the real line .....	465
§ 3. Distributions on the nonnegative reals .....	477
§ 4. Distributions on the nonnegative integers .....	489
§ 5. Other auxiliaries .....	498
§ 6. Notes .....	502

---

<b>Appendix B. Selected well-known distributions</b>	<b>503</b>
§ 1. Introduction .....	503
§ 2. Distributions on the real line .....	503
§ 3. Distributions on the nonnegative reals .....	506
§ 4. Distributions on the nonnegative integers .....	509
§ 5. Notes .....	511
<b>Bibliography</b> .....	<b>513</b>
<b>Author index</b> .....	<b>535</b>
<b>Subject index</b> .....	<b>539</b>
<b>Notations and conventions</b> .....	<b>545</b>
