

Introducing Special Relativity

W. S. C. Williams

Contents

<i>Preface</i>	xi
<i>Acknowledgements</i>	xii
1 Introduction	1
2 Momentum and energy in special relativity	4
**2.1 <i>Introduction</i>	4
**2.2 <i>Momentum and energy</i>	4
**2.3 <i>More useful formulae</i>	6
**2.4 <i>Units</i>	8
**2.5 <i>Rest mass energy</i>	9
**2.6 <i>Nuclear binding energy</i>	10
**2.7 <i>Nuclear decays and reactions</i>	11
**2.8 <i>Gravitation and $E = Mc^2$</i>	13
**2.9 <i>Summary</i>	14
<i>Problems</i>	15
3 Relativistic kinematics I	17
**3.1 <i>Introduction</i>	17
**3.2 <i>Elementary particle physics</i>	18
**3.3 <i>Two-body decay of a particle at rest</i>	20
*3.4 <i>Three-body decays</i>	24
*3.5 <i>Two-stage three-body decay</i>	26
**3.6 <i>The decay of a moving particle</i>	28
3.7 <i>Kinematics of formation</i>	30
3.8 <i>Examples of formation</i>	33
**3.9 <i>Photons</i>	35
**3.10 <i>Compton scattering</i>	35
**3.11 <i>The centre-of-mass</i>	37

**3.12	<i>The centre-of-mass in two-body collisions</i>	41
*3.13	<i>Reaction thresholds in the laboratory</i>	42
*3.14	<i>Summary</i>	43
	<i>Problems</i>	43
4	Electrodynamics	46
**4.1	<i>Introduction</i>	46
**4.2	<i>Making contact with electromagnetism</i>	46
*4.3	<i>Relativistic mass</i>	49
**4.4	<i>Historical interlude</i>	50
*4.5	<i>Bucherer</i>	51
*4.6	<i>Accelerators</i>	54
*4.7	<i>The cyclotron frequency</i>	55
*4.8	<i>The cyclotron</i>	56
*4.9	<i>The limitations of the cyclotron</i>	57
4.10	<i>The synchrocyclotron</i>	58
4.11	<i>The synchrotron</i>	59
4.12	<i>Electron accelerators</i>	60
4.13	<i>Centre-of-mass energy at colliders</i>	60
*4.14	<i>Summary</i>	61
	<i>Problems</i>	62
5	The foundations of special relativity	64
**5.1	<i>Introduction</i>	64
**5.2	<i>Some definitions</i>	65
**5.3	<i>Galilean transformations</i>	68
**5.4	<i>Electromagnetism and Galilean relativity</i>	70
**5.5	<i>Einstein's relativity</i>	72
**5.6	<i>The rise and fall of simultaneity</i>	72
**5.7	<i>Time</i>	74
**5.8	<i>Einstein's electrodynamics</i>	76
**5.9	<i>Comments on Einstein's results</i>	78
**5.10	<i>Charge invariance</i>	80
**5.11	<i>Summary</i>	80
	<i>Problems</i>	81
6	Relativistic kinematics II	82
**6.1	<i>Introduction</i>	82
**6.2	<i>The Lorentz transformation of energy and momentum</i>	82
*6.3	<i>The Lorentz boost for optics: aberration</i>	87

*6.4	<i>The relativistic Doppler effect</i>	90
*6.5	<i>Aberration and the Doppler effect in astrophysics</i>	91
6.6	<i>Lorentz boosts and new variables</i>	93
+6.7	<i>Graphical representation of the Lorentz boost</i>	96
*6.8	<i>Lorentz boosts at work in particle decays</i>	99
**6.9	<i>Collision kinematics</i>	100
*6.10	<i>Summary</i>	102
	<i>Problems</i>	102
7	The Lorentz transformation of time–space coordinates	109
**7.1	<i>Introduction</i>	109
**7.2	<i>The Lorentz transformation of time–space coordinates</i>	109
**7.3	<i>Conformity with the postulates</i>	111
**7.4	<i>A simplification in notation</i>	112
*7.5	<i>A world line</i>	113
*7.6	<i>The interval</i>	115
**7.7	<i>The absence of simultaneity in special relativity</i>	117
**7.8	<i>The Lorentz–FitzGerald contraction</i>	119
7.9	<i>A diversion</i>	122
**7.10	<i>Time dilation</i>	122
**7.11	<i>The experimental tests of time dilation</i>	125
**7.12	<i>The travelling twin</i>	128
*7.13	<i>Proper time</i>	131
*7.14	<i>Time dilation and the Lorentz–FitzGerald contraction</i>	132
7.15	<i>The transformation of velocities</i>	132
7.16	<i>The composition of velocities</i>	134
+7.17	<i>Minkowski map</i>	136
+7.18	<i>The Lorentz–FitzGerald contraction and time dilation on the Minkowski map</i>	139
*7.19	<i>Summary</i>	140
	<i>Problems</i>	140
8	The formalities of special relativity	145
**8.1	<i>Introduction</i>	145
**8.2	<i>The derivation of the Lorentz transformation</i>	145
8.3	<i>Derivation using the k-calculus</i>	147
**8.4	<i>Derivation using a conventional method</i>	152
**8.5	<i>Derivation of the transformation of the transverse coordinates</i>	155
*8.6	<i>Summarising the Lorentz transformations</i>	157
8.7	<i>The general Lorentz boost</i>	158

x Contents

+8.8	<i>Two successive Lorentz boosts I</i>	159
+8.9	<i>Two successive Lorentz boosts II</i>	160
*8.10	<i>Four-vectors</i>	164
*8.11	<i>A classification of four-vectors</i>	169
+8.12	<i>Relativistic energy and momentum conservation validated</i>	169
+8.13	<i>The Thomas precession</i>	175
	<i>Problems</i>	178
9	Some developments in special relativity	182
*9.1	<i>Introduction</i>	182
*9.2	<i>Relativistic kinematics with four-vectors</i>	182
*9.3	<i>More on waves</i>	188
*9.4	<i>Einstein to de Broglie</i>	190
+9.5	<i>Schrödinger's wave equation</i>	192
+9.6	<i>The Dirac equation</i>	195
9.7	<i>Maxwell's equations</i>	198
9.8	<i>The Lorentz transformation of E and B</i>	200
+9.9	<i>The covariance of Maxwell's equations</i>	204
+9.10	<i>The electromagnetic four-vector potential</i>	206
+9.11	<i>Tensorland</i>	208
+9.12	<i>Electromagnetism with tensors</i>	215
*9.13	<i>What to remember</i>	219
*9.14	<i>What we have not discussed</i>	219
	<i>Problems</i>	220
10	A postponed prelude	226
**10.1	<i>Introduction</i>	226
**10.2	<i>Maxwell and the ether</i>	226
**10.3	<i>The hunt for the ether: Michelson and Morley</i>	227
**10.4	<i>The hunt for the ether: Trouton and Noble, Rayleigh, and Brace</i>	230
**10.5	<i>Saving the ether with Lorentz!</i>	230
**10.6	<i>Dragging the ether</i>	232
**10.7	<i>1905 and after</i>	234
	<i>Problem answers</i>	237
	<i>Bibliography</i>	239
	<i>Index</i>	243
