Contents

Preface	ix
1. Introduction to Forecasting	1
1.1 The Nature and Uses of Forecasts, 1	
1.2 Some Examples of Time Series, 5	
1.3 The Forecasting Process, 12	
1.4 Resources for Forecasting, 14	
Exercises, 15	
2. Statistics Background for Forecasting	18
2.1 Introduction, 18	
2.2 Graphical Displays, 19	
2.2.1 Time Series Plots, 19	
2.2.2 Plotting Smoothed Data, 22	
2.3 Numerical Description of Time Series Data, 25	
2.3.1 Stationary Time Series, 25	
2.3.2 Autocovariance and Autocorrelation Functions, 28	
2.4 Use of Data Transformations and Adjustments, 34	
2.4.1 Transformations, 34	
2.4.2 Trend and Seasonal Adjustments, 36	
2.5 General Approach to Time Series Modeling and Forecasting, 46	
2.6 Evaluating and Monitoring Forecasting Model Performance, 49	
2.6.1 Forecasting Model Evaluation, 49	
2.6.2 Choosing Between Competing Models, 57	
2.6.3 Monitoring a Forecasting Model, 60	
Exercises, 66	

3. Regression Analysis and Forecasting	73
3.1 Introduction, 73	
3.2 Least Squares Estimation in Linear Regression Models, 75	
3.3 Statistical Inference in Linear Regression, 84	
3.3.1 Test for Significance of Regression, 84	
3.3.2 Tests on Individual Regression Coefficients and Groups of Coefficients, 87	
3.3.3 Confidence Intervals on Individual Regression Coefficients, 93	
3.3.4 Confidence Intervals on the Mean Response, 94	
3.4 Prediction of New Observations, 96	
3.5 Model Adequacy Checking, 98	
3.5.1 Residual Plots, 98	
3.5.2 Scaled Residuals and PRESS, 100	
3.5.3 Measures of Leverage and Influence, 105	
3.6 Variable Selection Methods in Regression, 106	
3.7 Generalized and Weighted Least Squares, 111	
3.7.1 Generalized Least Squares, 112	
3.7.2 Weighted Least Squares, 114	
3.7.3 Discounted Least Squares, 119	
3.8 Regression Models for General Time Series Data, 133	
3.8.1 Detecting Autocorrelation: The Durbin–Watson Test, 134	
3.8.2 Estimating the Parameters in Time Series Regression Models, 139	
Exercises, 161	
4. Exponential Smoothing Methods	171
4.1 Introduction, 171	
4.2 First-Order Exponential Smoothing, 176	
4.2.1 The Initial Value, \tilde{y}_0 , 177	
4.2.2 The Value of λ , 178	
4.3 Modeling Time Series Data, 180	
4.4 Second-Order Exponential Smoothing, 183	
4.5 Higher-Order Exponential Smoothing, 193	
4.6 Forecasting, 193	
4.6.1 Constant Process, 193	
4.6.2 Linear Trend Process, 198	
4.6.3 Estimation of σ_e^2 , 207	

4.6.4	Adaptive Updating of the Discount Factor, 208	
4.6.5	Model Assessment, 209	
4.7	Exponential Smoothing for Seasonal Data, 210	
4.7.1	Additive Seasonal Model, 210	
4.7.2	Multiplicative Seasonal Model, 214	
4.8	Exponential Smoothers and ARIMA Models, 217	
	Exercises, 220	
5.	Autoregressive Integrated Moving Average (ARIMA) Models	231
5.1	Introduction, 231	
5.2	Linear Models for Stationary Time Series, 231	
5.2.1	Stationarity, 232	
5.2.2	Stationary Time Series, 233	
5.3	Finite Order Moving Average (MA) Processes, 235	
5.3.1	The First-Order Moving Average Process, MA(1), 236	
5.3.2	The Second-Order Moving Average Process, MA(2), 238	
5.4	Finite Order Autoregressive Processes, 239	
5.4.1	First-Order Autoregressive Process, AR(1), 240	
5.4.2	Second-Order Autoregressive Process, AR(2), 242	
5.4.3	General Autoregressive Process, AR(p), 246	
5.4.4	Partial Autocorrelation Function, PACF, 248	
5.5	Mixed Autoregressive–Moving Average (ARMA) Processes, 253	
5.6	Nonstationary Processes, 256	
5.7	Time Series Model Building, 265	
5.7.1	Model Identification, 265	
5.7.2	Parameter Estimation, 266	
5.7.3	Diagnostic Checking, 266	
5.7.4	Examples of Building ARIMA Models, 267	
5.8	Forecasting ARIMA Processes, 275	
5.9	Seasonal Processes, 282	
5.10	Final Comments, 286	
	Exercises, 287	
6.	Transfer Functions and Intervention Models	299
6.1	Introduction, 299	
6.2	Transfer Function Models, 300	
6.3	Transfer Function–Noise Models, 307	

- 6.4 Cross Correlation Function, 307
- 6.5 Model Specification, 309
- 6.6 Forecasting with Transfer Function–Noise Models, 322
- 6.7 Intervention Analysis, 330
- Exercises, 338

7. Survey of Other Forecasting Methods 343

- 7.1 Multivariate Time Series Models and Forecasting, 343
 - 7.1.1 Multivariate Stationary Process, 343
 - 7.1.2 Vector ARIMA Models, 344
 - 7.1.3 Vector AR (VAR) Models, 346
- 7.2 State Space Models, 350
- 7.3 ARCH and GARCH Models, 355
- 7.4 Direct Forecasting of Percentiles, 359
- 7.5 Combining Forecasts to Improve Prediction Performance, 365
- 7.6 Aggregation and Disaggregation of Forecasts, 369
- 7.7 Neural Networks and Forecasting, 372
- 7.8 Some Comments on Practical Implementation and Use of Statistical Forecasting Procedures, 375
- Exercises, 378

Appendix A. Statistical Tables 387

Appendix B. Data Sets for Exercises 407
