

**Lagrangian Formalism for a System of  $N$  Classical Particles  
in General Relativity.**

D. D. DIONYSIOU

*Department of Astronomy, University of Athens - Athens, Greece**(Nuovo Cimento, 33 B, 519 (1976))*

In this paper there are two misprints: The factor  $(\mathbf{n} \cdot \mathbf{u}_1)^2/r$  should be replaced by  $(\mathbf{n} \cdot \mathbf{u}_1)^2$  in eq. (3.2). Moreover, in the last line of Appendix the factor  $G^2$  should be replaced by  $G^3$ .
