

Maia Berkane
Editor

**Latent Variable Modeling and
Applications to Causality**

Springer

Contents

Preface

Causality and Path Models

Embedding Common factors in a Path Model 1

Roderick P. McDonald

Measurement, Causation and Local Independence
in Latent Variable Models 11

Michael E. Sobel

On the Identifiability of Nonparametric Structural Models 29

Judea Pearl

Estimating the Causal effects of Time Varying Endogeneous Treatments
by G-Estimation of Structural Nested Models 69

James Robins

Latent Variables

Model as Instruments, with Applications to Moment Structure Analysis 119

Jan de Leeuw

Bias and Mean Square Error of the Maximum Likelihood Estimators
of the Parameters of the Intraclass Correlation Model 133

Maia Berkane and Peter M. Bentler

Latent Variable Growth Modeling with Multilevel Data 149

Bengt Muthen

High-Dimensional Full-Information Item Factor Analysis 163

Darrell R. Bock and Steven Shilling

Dynamic Factor Models for the Analysis of Ordered Categorical Panel data 177

Gerhard Arminger

Model Fitting Procedures for Nonlinear Factor Analysis Using
the Errors-in-Variables Parameterization 195

Yasuo Amemiya and Ilker Yalcin

Multivariate Regression with Errors in Variables: Issues
on Asymptotic Robustness 211

Albert Satorra

Non-Iterative fitting of the Direct Product Model for Multitrait-Multimethod
Correlation Matrices 229

Michael E. Browne and H. F. Strydom

An EM Algorithm for ML Factor Analysis with Missing Data 247

Mortaza Jamshidian

Optimal Conditionally Unbiased Equivariant Factor Score Estimators 259

Peter M. Bentler and Ke-Hai Yuan
