# Contents

Preface .....	xi
Chapter 1. Elements of the Probability Theory .....	1
1.1. Weak Convergence of Probability Measures .....	1
1.2. Random Elements .....	4
1.3. Distribution Functions, Characteristic Functions and other Transforms .....	7
1.4. The Haar Measure .....	11
1.5. Weak Convergence of Probability Measures on the Complex Plane .....	12
1.6. Elements of Ergodic Theory .....	18
1.7. Supports of Random Elements in the Space of Analytic Functions .....	20
Notes .....	25
Chapter 2. Dirichlet Series and Dirichlet Polynomials .....	26
2.1. Definition and Convergence of Dirichlet Series .....	26
2.2. Perron's Formula .....	29
2.3. The Euler Identity .....	32
2.4. The Bessel Functions .....	33
2.5. A Limit Theorem for Trigonometric Polynomial .....	35
2.6. The Besicovitch Spaces .....	38
2.7. Some Estimates for the Dirichlet Polynomials .....	48
2.8. Riemann Zeta-Function .....	52
2.9. Dirichlet $L$ -Functions .....	66
2.10. Asymptotics of the Dirichlet Polynomials .....	72
2.11. Inequality of Large Sieve Type .....	81
Notes .....	86

Chapter 3. Limit Theorems for the Modulus of the Riemann Zeta-Function	87
3.1. Limit Theorem for the Modulus of the Riemann Zeta-Function in the Half-Plane $\sigma > 1/2$	87
3.2. Moments of the Riemann Zeta-Function near the Critical Line	93
3.3. Necessity of the Power Norming	109
3.4. Limit Theorem for the Modulus of the Riemann Zeta-Function near the Critical Line	112
3.5. Limit Theorem for the Modulus of the Riemann Zeta-Function on the Critical Line	118
3.6. Limit Theorem for the Modulus of the Argument of the Riemann Zeta-Function	136
Notes	146
Chapter 4. Limit Theorems for the Riemann Zeta-Function on the Complex Plane	149
4.1. Limit Theorems for the Riemann Zeta-Function on the Half-Plane $\sigma > 1/2$	149
4.2. Limit Theorem on the Complex Plane for the Riemann Zeta-Function near and on the Critical Line	157
Notes	174
Chapter 5. Limit Theorems for the Riemann Zeta-Function in the Space of Analytic Functions	179
5.1. Definition of an $H(D)$ -valued Random Element	179
5.2. Limit Theorems for the Dirichlet Polynomials in the Space of Analytic Functions	184
5.3. Application of the Ergodic Theory	186
5.4. Approximation by Mean of the Function $\zeta(s)$ by Absolutely Convergent Series	190
5.5. Limit Theorem in the Space of Analytic Functions for the Absolutely Convergent Series	194
5.6. Proof of Theorem 1.8	198
Notes	202
Chapter 6. Universality Theorem for the Riemann Zeta-Function	203
6.1. Some Results on the Hilbert Spaces	203

6.2. The Space $H^2$ on the Unit Disk .....	212
6.3. The Space $H^2$ over General Domains .....	214
6.4. Elements of the Theory of Entire Functions .....	218
6.5. The Universality Theorem .....	224
6.6. Functional Independence of the Riemann Zeta-Function ..	232
Notes .....	234
Chapter 7. Limit Theorem for the Riemann Zeta-Function in the Space of Continuous Functions .....	237
7.1. Limit Theorem for the Sum $S_T(s)$ in the Space $C(\mathbb{R})$ ....	238
7.2. Limit Theorem for the Riemann Zeta-Function near the Critical Line in the Space of Continuous Functions .....	246
Notes .....	250
Chapter 8. Limit Theorems for Dirichlet $L$ -Functions .....	251
8.1. Limit Theorem for the Dirichlet $L$ -Functions on the Half-Plane $\sigma > 1/2$ .....	251
8.2. Limit Theorem for the Dirichlet $L$ -Functions near the Critical Line .....	254
8.3. Limit Theorem for the Dirichlet $L$ -functions with an Increasing Modulus .....	261
Notes .....	274
Chapter 9. Limit Theorem for the Dirichlet Series with Multiplicative Coefficients .....	276
9.1. Limit Theorem for $Z(s)$ .....	276
9.2. The Universality of the Function $Z(s)$ .....	281
9.3. Functional Independence of the Function $Z(s)$ .....	283
Notes .....	284
References .....	286
Notation .....	291
Subject Index .....	295
