All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

AB07-11																										

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

Table with columns for Sample, Distance, and various elements (MgO, SiO2, P2O5, K2O, CaO, TiO2, FeO, Rb, Sr, Zr, Ce, Nd, Sm, Eu, Gd, Dy, Er, Yb, Lu, Hf, Pb, Th, U). The table contains data for samples AB07-14 through AB07-15, with AB07-15 having a highlighted yellow row for its header.

B07-15

25mm

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

Table with columns: Sample, Distance (mm), and chemical elements (MgO, SiO2, P2O5, K2O, CaO, TiO2, Cr, FeO, Al2O3, Rb, Sr, Zr, Ce, Nd, Sm, Eu, Gd, Dy, Er, Yb, Lu, Hf, Pb, Th, U). The table contains numerous rows of data points for various sample IDs and distances.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

AB07-21																									

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.

All analyses, apart from AB07-27, are rim to rim garnet profiles, going as close to the center of the garnet as can be estimated from looking at the sections. AB07-27 is a rim to core analysis.
