#### Part I INTRODUCTION

1.	INT	RODUCTION	3
	1.1	Characteristics of Inventory Systems	3
	1.2	Brief Historical Overview of Inventory Theory	5
	1.3	Examples of Markovian Demand Models	12
	1.4	Contributions	15
	1.5	Plan of the Book	16

#### Part II DISCOUNTED COST MODELS

2.	2. DISCOUNTED COST MODELS WITH BACKORDERS		
	2.1	Introduction	21
	2.2	Review of the Related Literature	22
	2.3	Formulation of the Model	23
	2.4	Dynamic Programming and Optimal Feedback Policy	26
	2.5	Optimality of $(s, S)$ -type Ordering Policies	31
	2.6	Nonstationary Infinite Horizon Problem	33
	2.7	Cyclic Demand Model	37
	2.8	Constrained Models	37
	2.9	Concluding Remarks and Notes	39

3.1   Introduction   41     3.2   Formulation of the Model   42     3.3   Dynamic Programming and Optimal Feedback Policy   44     3.4   Nonstationary Discounted Infinite Horizon Problem   49     3.5   Optimality of (s, S)-type Ordering Policies   55     3.6   Stationary Infinite Horizon Problem   57     3.7   Concluding Remarks and Notes   57     4.   DISCOUNTED COST MODELS WITH LOST SALES   59     4.1   Introduction   59     4.2   Formulation of the Model   60     4.3   Optimality of (s, S)-type Ordering Policies   63     4.4   Extensions   66     4.5   Numerical Results   69     4.6   Concluding Remarks and Notes   72     Part III AVERAGE COST MODELS     5.   AVERAGE COST MODELS WITH BACKORDERS   83     5.1   Introduction   83     5.2   Formulation of the Model   86     5.3   Discount Approach   98     5.6   Verification Theorem   102     5.7   Concluding Remarks and Notes	3.	DIS GR(	COUNT COST MODELS WITH POLYNOMIALLY DWING SURPLUS COST	41
3.2   Formulation of the Model   42     3.3   Dynamic Programming and Optimal Feedback Policy   44     3.4   Nonstationary Discounted Infinite Horizon Problem   49     3.5   Optimality of (s, S)-type Ordering Policies   55     3.6   Stationary Infinite Horizon Problem   57     3.7   Concluding Remarks and Notes   57     4.   DISCOUNTED COST MODELS WITH LOST SALES   59     4.1   Introduction   59     4.2   Formulation of the Model   60     4.3   Optimality of (s, S)-type Ordering Policies   63     4.4   Extensions   66     4.5   Numerical Results   69     4.6   Concluding Remarks and Notes   72     Part III AVERAGE COST MODELS     5.   AVERAGE COST MODELS WITH BACKORDERS   83     5.1   Introduction   83     5.2   Formulation of the Model   86     5.3   Discounted Cost Model Results from Chapter 2   89     5.4   Limiting Behavior as the Discount Factor Approaches 1   90     5.5   Vanishing Discount Approach   98		3.1	Introduction	41
3.3   Dynamic Programming and Optimal Feedback Policy   44     3.4   Nonstationary Discounted Infinite Horizon Problem   49     3.5   Optimality of (s, S)-type Ordering Policies   55     3.6   Stationary Infinite Horizon Problem   57     3.7   Concluding Remarks and Notes   57     4.   DISCOUNTED COST MODELS WITH LOST SALES   59     4.1   Introduction   59     4.2   Formulation of the Model   60     4.3   Optimality of (s, S)-type Ordering Policies   63     4.4   Extensions   66     4.5   Numerical Results   69     4.6   Concluding Remarks and Notes   72     Part III AVERAGE COST MODELS     S. AVERAGE COST MODELS WITH BACKORDERS     5.1   Introduction   83     5.2   Formulation of the Model   86     5.3   Discount Approach   98     5.6   Verification Theorem   102     5.7   Concluding Remarks and Notes   106     6.4   AVERAGE COST MODELS WITH POLYNOMIALLY   GROWING SURPLUS COST     6.6   AVERAGE C		3.2	Formulation of the Model	42
3.4   Nonstationary Discounted Infinite Horizon Problem   49     3.5   Optimality of (s, S)-type Ordering Policies   55     3.6   Stationary Infinite Horizon Problem   57     3.7   Concluding Remarks and Notes   57     4.   DISCOUNTED COST MODELS WITH LOST SALES   59     4.1   Introduction   59     4.2   Formulation of the Model   60     4.3   Optimality of (s, S)-type Ordering Policies   63     4.4   Extensions   66     4.5   Numerical Results   69     4.6   Concluding Remarks and Notes   72     Part III AVERAGE COST MODELS     5.   AVERAGE COST MODELS WITH BACKORDERS   83     5.1   Introduction   83     5.2   Formulation of the Model   86     5.3   Discounted Cost Model Results from Chapter 2   89     5.4   Limiting Behavior as the Discount Factor Approaches 1   90     5.5   Vanishing Discount Approach   98     5.6   Verification Theorem   102     5.7   Concluding Remarks and Notes   106     6<		3.3	Dynamic Programming and Optimal Feedback Policy	44
3.5   Optimality of (s, S)-type Ordering Policies   55     3.6   Stationary Infinite Horizon Problem   57     3.7   Concluding Remarks and Notes   57     4.   DISCOUNTED COST MODELS WITH LOST SALES   59     4.1   Introduction   59     4.2   Formulation of the Model   60     4.3   Optimality of (s, S)-type Ordering Policies   63     4.4   Extensions   66     4.5   Numerical Results   69     4.6   Concluding Remarks and Notes   72     Part III AVERAGE COST MODELS     5.   AVERAGE COST MODELS WITH BACKORDERS   83     5.1   Introduction   83     5.2   Formulation of the Model   86     5.3   Discounted Cost Model Results from Chapter 2   89     5.4   Limiting Behavior as the Discount Factor Approaches 1   90     5.5   Vanishing Discount Approach   98     5.6   Verification Theorem   102     5.7   Concluding Remarks and Notes   106     6. 	8.3	Assumptions and Preliminaries	162
	8.4	Structural Results	164
	8.5	Extensions	170
	8.6	Numerical Results	173
	8.7	Concluding Remarks and Notes	174
9.	VAN	VISHING DISCOUNT APPROACH VS. STATIONARY	170
	DIS	IRIBUTION APPROACH	179
	9.1	Introduction	1/9
	9.2	Statement of the Problem	182
	9.3	Review of Iglehart (1963b)	184
	9.4	An Example	187
	9.5	Asymptotic Bounds on the Optimal Cost Function	192
	9.6	Review of the Veinott and Wagner Paper	195
	9.7	Existence of Minimizing Values of $s$ and $S$	197
	9.8	Stationary Distribution Approach versus Dynamic Programming and Vanishing Discount Approach	203
	9.9	Concluding Remarks and Notes	206

## Part V CONCLUSIONS AND OPEN RESEARCH PROBLEMS

#### 10. CONCLUSIONS AND OPEN RESEARCH PROBLEMS 211

#### Part VI APPENDICES

ANA	ALYSIS	217
A.1	Continuous Functions on Metric Spaces	217
A.2	Convergence of a Sequence of Functions	219
A.3	The Arzelà-Ascoli Theorems	220
A.4	Linear Operators	222
A.5	Miscellany	223
PRC	BABILITY	225
B.1	Integrability	225
B.2	Conditional Expectation	226
B.3	Renewal Theorem	227
B.4	Renewal Reward Processes	227
B.5	Stochastic Dominance	228
<b>B.6</b>	Markov Chains	229
C. CONVEX, QUASI-CONVEX AND K-CONVEX		
FUN	ICTIONS	233
C.1	$PF_2$ Density and Quasi-convex Functions	233
C.2	Convex and $K$ -convex Functions	234
