Contents

<i>Preface</i>	vii
<i>Acknowledgments</i>	xi

Chapter 6 Markov Chains in Discrete Time—General Techniques

6.1 Determination of the n -Step Transition Probabilities $p_{ij}^{(n)}$	1
6.2 Determination of the n -Step First Passage Time Probabilities $f_{ij}^{(n)}$	29
6.3 Determination of the Reaching Probabilities f_{ij}	46

Chapter 7 Markov Chains in Discrete Time—Limiting Behavior

7.1 Limiting and Stationary Distributions	67
7.2 Techniques for Obtaining Stationary Distributions	96
7.3 Moments of the First Passage Time Distributions	113
7.4 Occupation Times	139

Chapter 8 Applications of Discrete Time Markov Chains

8.1 Branching Chains	167
----------------------	-----

Chapter 9 Discrete Time Queueing Models

9.1 Introduction	189
9.2 The Geometric/Geometric/1 Model	192
9.3 The Geometric/G/1 Model	205
9.4 The GI/Geometric/1 Model	237
9.5 Further Models and Generalizations	259

References	279
