Contents

| | |
|--|----------|
| Preface | xi |
| 1 Constitutive Models in Linear Viscoelasticity | 1 |
| 1.1 THE BOLTZMANN SUPERPOSITION PRINCIPLE | 2 |
| 1.2 THE SHORT-TERM RESPONSE IN PHYSICALLY AGED POLYMERS | 8 |
| 1.2.1 A MODEL OF ADAPTIVE LINKS | 9 |
| 1.2.2 A BALANCE EQUATION FOR THE NUMBER OF LINKS | 10 |
| 1.2.3 COMPARISON WITH EXPERIMENTS | 16 |
| 1.2.4 TIME-VARYING LOADING | 18 |
| 1.3 THE LONG-TERM RESPONSE IN PHYSICALLY AGED POLYMERS | 23 |
| 1.3.1 A MODEL OF ADAPTIVE LINKS | 25 |
| 1.3.2 A FREE VOLUME CONCEPT | 29 |
| 1.3.3 CONSTITUTIVE EQUATIONS | 41 |
| 1.3.4 COMPARISON WITH EXPERIMENTS | 47 |
| 1.4 CONSTITUTIVE RELATIONS FOR THREE-DIMENSIONAL LOADING | 56 |
| 1.5 THERMODYNAMIC POTENTIALS OF A TRANSIENT NETWORK | 63 |
| 1.5.1 STRAIN ENERGY DENSITY | 63 |
| 1.5.2 THERMODYNAMIC POTENTIALS AND CONSTI- TUTIVE EQUATIONS | 69 |
| 1.5.3 PROPERTIES OF RELAXATION FUNCTIONS | 73 |
| 1.6 VARIATIONAL PRINCIPLES IN VISCOELASTICITY | 83 |
| 1.6.1 VARIATIONAL PRINCIPLES AND GOVERNING EQUATIONS | 83 |
| 1.6.2 GIBBS' PRINCIPLE AND THE SECOND LAW OF THERMODYNAMICS | 88 |
| 1.6.3 DEBONDING OF A STRIP LINKED TO A RIGID FOUNDATION BY A VISCOELASTIC ADHESIVE LAYER | 90 |

| | | |
|----------|---|------------|
| 1.7 | PHASE TRANSITIONS IN VISCOELASTIC MEDIA | 106 |
| 1.7.1 | FORMULATION OF THE PROBLEM | 106 |
| 1.7.2 | AN INTEGRAL OVER A VARYING DOMAIN | 110 |
| 1.7.3 | INTERFACIAL EQUILIBRIUM EQUATIONS | 114 |
| 1.7.4 | LOCAL MELTING OF A VISCOELASTIC MEDIUM | 120 |
| | References | 125 |
| 2 | Constitutive Models in Nonlinear Viscoelasticity | 135 |
| 2.1 | A TRANSIENT NETWORK WITH NONLINEAR LINKS | 136 |
| 2.1.1 | CONSTITUTIVE EQUATIONS | 140 |
| 2.1.2 | COMPARISON WITH EXPERIMENTS | 145 |
| 2.1.3 | THREE-DIMENSIONAL LOADING | 148 |
| 2.1.4 | TORSION OF A CONICAL PIPE | 149 |
| 2.1.5 | THE CORRESPONDENCE PRINCIPLES | 155 |
| 2.2 | A NETWORK WITH AN EYRING-TYPE CLOCK | 157 |
| 2.2.1 | STRESS-STRAIN RELATIONS | 159 |
| 2.2.2 | THE GENERALIZED ARRHENIUS EQUATION | 161 |
| 2.2.3 | COMPARISON WITH EXPERIMENTS | 163 |
| 2.3 | A NETWORK WITH AN ENTROPY-DRIVEN CLOCK | 172 |
| 2.3.1 | THERMODYNAMIC POTENTIALS | 174 |
| 2.3.2 | A DISSIPATION-DRIVEN INTERNAL CLOCK | 177 |
| 2.3.3 | COMPARISON WITH EXPERIMENTS | 180 |
| 2.4 | CONSTITUTIVE RELATIONS IN VISCOELASTOPLAS- TICITY | 189 |
| 2.4.1 | A MODEL OF ADAPTIVE LINKS | 189 |
| 2.4.2 | COMPARISON WITH EXPERIMENTS | 196 |
| | References | 203 |
| 3 | Constitutive Models in Finite Viscoelasticity | 209 |
| 3.1 | OPERATOR LINEAR CONSTITUTIVE RELATIONS | 210 |
| 3.1.1 | KINETIC EQUATIONS | 210 |
| 3.1.2 | STRAIN ENERGY DENSITY | 211 |
| 3.1.3 | THERMODYNAMIC POTENTIALS | 217 |
| 3.1.4 | COMPARISON WITH EXPERIMENTS | 221 |
| 3.1.5 | THE PRINCIPLE OF MINIMUM FREE ENERGY | 225 |
| 3.1.6 | THERMODYNAMIC STABILITY | 233 |
| 3.2 | THE MOONEY-RIVLIN MODEL | 237 |
| 3.2.1 | DIFFERENTIAL CONSTITUTIVE EQUATIONS | 237 |
| 3.2.2 | UNIAXIAL EXTENSION | 239 |
| 3.2.3 | SIMPLE SHEAR | 245 |
| 3.2.4 | TORSION OF A CIRCULAR CYLINDER | 248 |
| 3.3 | STRAIN ENERGY DENSITY OF A NETWORK | 254 |
| 3.3.1 | UNIAXIAL EXTENSION | 256 |

| | | |
|----------|---|------------|
| 3.3.2 | BIAXIAL EXTENSION | 259 |
| 3.4 | CONSTITUTIVE EQUATIONS BASED ON THE FREE VOLUME CONCEPT | 271 |
| 3.4.1 | THE TIME-STRAIN SUPERPOSITION PRINCIPLE | 273 |
| 3.4.2 | A NEO-HOOKEAN VISCOELASTIC MEDIUM | 275 |
| 3.4.3 | UNIAXIAL EXTENSION | 276 |
| 3.4.4 | SIMPLE SHEAR | 284 |
| 3.4.5 | RADIAL DEFORMATION OF A SPHERICAL SHELL | 289 |
| 3.5 | A NETWORK WITH AN ENTROPY-DRIVEN CLOCK | 299 |
| 3.5.1 | A CONCEPT OF TRANSIENT NETWORKS | 300 |
| 3.5.2 | THERMODYNAMIC POTENTIALS | 313 |
| 3.5.3 | SIMPLE SHEAR | 317 |
| | References | 323 |
| 4 | Constitutive Models in Thermoviscoelasticity | 329 |
| 4.1 | THERMORHEOLOGICALLY SIMPLE MEDIA | 330 |
| 4.1.1 | TIME-TEMPERATURE SUPERPOSITION PRINCIPLE | 331 |
| 4.1.2 | THERMAL SHIFT FACTOR | 332 |
| 4.1.3 | NONISOTHERMAL LOADING | 337 |
| 4.2 | THERMORHEOLOGICALLY COMPLEX MEDIA | 340 |
| 4.2.1 | BASIC HYPOTHESES | 340 |
| 4.2.2 | A CONCEPT OF TRANSIENT NETWORKS (MODEL I) | 343 |
| 4.2.3 | A CONCEPT OF TRANSIENT NETWORKS (MODEL II) | 351 |
| 4.2.4 | NONISOTHERMAL LOADING | 358 |
| 4.3 | THE NONISOTHERMAL RESPONSE IN NONAGING POLYMERS | 364 |
| 4.3.1 | THREE-DIMENSIONAL LOADING | 371 |
| 4.3.2 | THE STANDARD THERMOVISCOELASTIC SOLID | 372 |
| 4.3.3 | COOLING OF A RECTILINEAR BAR | 378 |
| 4.3.4 | COOLING OF A CYLINDRICAL SHELL | 382 |
| 4.4 | LINEAR MEDIA SUBJECTED TO PHYSICAL AGING | 400 |
| 4.4.1 | CONSTITUTIVE EQUATIONS | 401 |
| 4.4.2 | COOLING OF A SPHERICAL PRESSURE VESSEL | 404 |
| 4.5 | NONLINEAR MEDIA SUBJECTED TO PHYSICAL AGING | 414 |
| 4.5.1 | STRAIN ENERGY DENSITY OF A NETWORK (ISOTHERMAL LOADING) | 415 |
| 4.5.2 | STRAIN ENERGY DENSITY OF A NETWORK (NONISOTHERMAL LOADING) | 417 |
| 4.5.3 | THERMODYNAMIC POTENTIALS | 419 |
| 4.5.4 | CONSTITUTIVE RELATIONS (FINITE STRAINS) | 421 |
| 4.5.5 | CONSTITUTIVE RELATIONS (SMALL STRAINS) | 425 |

| | | |
|-------|--|-----|
| 4.5.6 | CONSTITUTIVE RELATIONS FOR PHYSICALLY AGED POLYMERS | 427 |
| 4.5.7 | THE AGING SHIFT FACTOR | 434 |
| 4.5.8 | UNIAXIAL EXTENSION | 439 |
| 4.5.9 | COOLING OF A PLATE | 446 |
| | References | 459 |
| | Index | 465 |
