# METHODS OF GENOME ANALYSIS IN PLANTS

---

Edited by

***Prem P. Jauhar, Ph.D.***

U.S. Department of Agriculture  
Agricultural Research Service  
Northern Crop Science Laboratory  
State University Station  
Fargo, North Dakota

CRC Press

Boca Raton New York London Tokyo

# Table of Contents

## Chapter 1

Genome Analysis: A Prologue .....	1
-----------------------------------	---

*Prem P. Jauhar*

### *Part I. Meiotic and Karyotypic Data in Genome Analysis*

## Chapter 2

Chromosome Pairing as a Tool in Genome Analysis: Merits and Limitations .....	9
---	---

*Prem P. Jauhar and Leonard R. Joppa*

## Chapter 3

Chromosome Banding and Genome Analysis in Diploid and Cultivated Polyploid Wheats .....	39
--	----

*Bernd Friebe and Bikram S. Gill*

## Chapter 4

Numerical Meiotic Models for the Inference of Genomic Affinity in Polyploids .....	61
---	----

*Charles F. Crane*

## Chapter 5

Limitations and Pitfalls in the Use of Quantitative Polyploid Meiotic Models for Genome Analysis .....	81
---	----

*J. Sybenga*

## Chapter 6

Molecular-Meiotic Analysis of Cotton .....	99
--	----

*David M. Stelly, Charles F. Crane, Robert E. Hanson, Thomas D. McKnight, and  
H. James Price*

### *Part II. Characteristics of Nuclear DNA and Genome Analysis*

## Chapter 7

Analysis of Plant DNA Content by Feulgen Microspectrophotometry and Flow Cytometry .....	115
---	-----

*H. James Price and J. Spencer Johnston*

## Chapter 8

Genome Analysis of Polyploid Species Employing Variation in Repeated Nucleotide Sequences .....	133
--	-----

*Jan Dvořák and Jorge Dubcovsky*

## Chapter 9

Development and Application of Simple Sequence Repeat (SSR) Loci for Plant Genome Analysis .....	147
---	-----

*Stuart M. Brown, A.K. Szewc-McFadden, and Stephen Kresovich*

### ***Part III. In Situ Hybridization and Genomic Painting***

#### **Chapter 10**

- Genomic Southern and *In Situ* Hybridization for Plant Genome Analysis ..... 163  
*J.S. Heslop-Harrison and Trude Schwarzacher*

#### **Chapter 11**

- Multicolor Fluorescence *In Situ* Hybridization: A New Tool for Genome Analysis ..... 181  
*Yasuhiko Mukai*

### ***Part IV. Isozyme and Molecular Markers in Genome Analysis***

#### **Chapter 12**

- Genome Analysis in the Triticeae Using Isozymes ..... 195  
*Gary E. Hart*

#### **Chapter 13**

- Linkage Analysis in Polyploids Using Molecular Markers ..... 211  
*Jorge A.G. da Silva and Mark E. Sorrells*

#### **Chapter 14**

- Barley Genome Mapping and Its Applications ..... 229  
*Patrick M. Hayes, F.Q. Chen, Andris Kleinhofs, Andrzej Kilian, and Diane E. Mather*

#### **Chapter 15**

- RAPD Analysis of Plant Genomes ..... 251  
*Greg A. Penner*

### ***Part V. Cytoplasmic Genome Analysis: Phylogenetic Inferences***

#### **Chapter 16**

- Plasmon Analysis as the Counterpart of Genome Analysis ..... 271  
*Koichiro Tsunewaki*

#### **Chapter 17**

- Chloroplast DNA Analysis of the Monogenomic Triticeae: Phylogenetic Implications and Genome-Specific Markers ..... 301  
*Roberta J. Mason-Gamer and Elizabeth A. Kellogg*

### ***Part VI. Specialized Techniques of Genome Analysis***

#### **Chapter 18**

- Chromosome Microdissection and Microcloning: Application to Genome Analysis ..... 329  
*Fa-Ten Kao*

#### **Chapter 19**

- Numerical Taxonomy and Genome Analysis ..... 345  
*Bernard R. Baum and Pushpendra K. Gupta*

*Part VII. Genomic Constitution of an Important Crop Plant as Revealed  
by Different Techniques*

**Chapter 20**

Genomic Constitution of Bread Wheat: Current Status ..... 359  
*Yang Yen, P. Stephen Baenziger, and Rosalind Morris*

**Index** ..... 375
