Preface to First Edition	v
Preface to Second Edition	vii
Glossary of Plant Species	xiii

Part I NUTRITIONAL PHYSIOLOGY

1 Introduction, Definition, and Classification of Mineral Nutrients	3
2 Ion Uptake Mechanisms of Individual Cells and Roots: Short Distance Transport	6
2.1 General	6
2.2 Pathway of Solutes from the External Solution into the Cells	7
2.3 Structure and Composition of Membranes	12
2.4 Solute Transport Across Membranes	18
2.5 Characteristics of Ion Uptake by Roots	30
2.6 Uptake of Ions and Water Along the Root Axis	63
2.7 Radial Transport of Ions and Water Across the Root	65
2.8 Release of Ions into the Xylem	70
2.9 Factors Affecting Ion Release into the Xylem and Exudation Rate	73
3 Long-Distance Transport in the Xylem and Phloem and its Regulation	79
3.1 General	79
3.2 Xylem Transport	81
3.3 Phloem Transport	92
3.4 Relative Importance of Phloem and Xylem for Long-Distance Transport of Mineral Nutrients	99
3.5 Remobilization of Mineral Nutrients	107
4 Uptake and Release of Mineral Elements by Leaves and Other Aerial Plant Parts	116
4.1 Uptake and Release of Gases and Other Volatile Compounds through Stomata	116

4.2	Uptake of Solutes	119
4.3	Foliar Application of Mineral Nutrients	123
4.4	Leaching of Mineral Elements from Leaves	128
5	Yield and the Source–Sink Relationships	131
5.1	General	131
5.2	Photosynthesis and Related Processes	131
5.3	Respiration and Oxidative Phosphorylation	142
5.4	Phloem Transport of Assimilates and its Regulation	144
5.5	Shift in the Sink–Source Relationship	152
5.6	Role of Phytohormones in the Regulation of Sink–Source Relationships	157
5.7	Source and Sink Limitations on Growth Rate and Yield	176
6	Mineral Nutrition and Yield Response	184
6.1	General	184
6.2	Leaf Area Index and Net Photosynthesis	186
6.3	Mineral Nutrient Supply, Sink Formation, and Sink Activity	190
6.4	Mineral Nutrition and the Sink–Source Relationships	196
7	Nitrogen Fixation	201
7.1	General	201
7.2	Biological Nitrogen-Fixing Systems	201
7.3	Biochemistry of Nitrogen Fixation	203
7.4	Symbiotic Systems	205
7.5	Amounts of Nitrogen Fixed in Symbiotic Systems, and Transfer in Mixed Stands	221
7.6	Free-Living and Associative Nitrogen-Fixing Microorganisms	222
7.7	Outlook	228
8	Functions of Mineral Nutrients: Macronutrients	229
8.1	Classification and Principles of Actions of Mineral Nutrients	229
8.2	Nitrogen	231
8.3	Sulfur	255
8.4	Phosphorus	265
8.5	Magnesium	277
8.6	Calcium	285
8.7	Potassium	299
9	Functions of Mineral Nutrients: Micronutrients	313
9.1	Iron	313
9.2	Manganese	324
9.3	Copper	333
9.4	Zinc	347
9.5	Nickel	364
9.6	Molybdenum	369

9.7	Boron	379
9.8	Chlorine	396
10	Beneficial Mineral Elements	405
10.1	Definition	405
10.2	Sodium	405
10.3	Silicon	417
10.4	Cobalt	426
10.5	Selenium	430
10.6	Aluminum	433
10.7	Other Mineral Elements	434
11	Relationships between Mineral Nutrition and Plant Diseases and Pests	436
11.1	General	436
11.2	Fungal Diseases	438
11.3	Bacterial and Viral Diseases	449
11.4	Soilborne Fungal and Bacterial Diseases	451
11.5	Pests	454
11.6	Direct and Indirect Effects of Fertilizer Application on Diseases and Pests	457
12	Diagnosis of Deficiency and Toxicity of Mineral Nutrients	461
12.1	Nutrient Supply and Growth Response	461
12.2	Diagnosis of Nutritional Disorders by Visible Symptoms	462
12.3	Plant Analysis	463
12.4	Histochemical and Biochemical Methods	477
12.5	Plant Analysis versus Soil Analysis	478
 Part II PLANT-SOIL RELATIONSHIPS		
13	Nutrient Availability in Soils	483
13.1	Chemical Soil Analysis	483
13.2	Movement of Nutrients to the Root Surface	484
13.3	Role of Root Density	498
13.4	Nutrient Availability and Distribution of Water in Soils	500
13.5	Role of Soil Structure	503
13.6	Intensity/Quantity Ratio, Plant Factors, and Consequences for Soil Testing	505
14	Effect of Internal and External Factors on Root Growth and Development	508
14.1	General	508
14.2	Carbohydrate Supply	509
14.3	Root Morphology, Hormonal Interactions	510
14.4	Soil Chemical Factors	513
14.5	Rhizosphere Microorganisms	525

14.6	Soil Physical Factors	527
14.7	Shoot/Root Ratio	535
15	The Soil–Root Interface (Rhizosphere) in Relation to Mineral Nutrition	537
15.1	General	537
15.2	Ion Concentration in the Rhizosphere	537
15.3	Rhizosphere pH and Redox Potential	541
15.4	Rhizodeposition and Root Exudates	547
15.5	Noninfecting Rhizosphere Microorganisms	561
15.6	Mycorrhizas	566
15.7	Role of Mycorrhizas in Mineral Nutrition of Their Host Plant	574
15.8	Role of Mycorrhizas in Heavy Metal Tolerance	585
15.9	Mycorrhizal Responsiveness	587
15.10	Other Mycorrhizal Effects	590
15.11	Mycorrhizas: Practical Implications	594
16	Adaptation of Plants to Adverse Chemical Soil Conditions	596
16.1	Natural Vegetation	596
16.2	High-Input versus Low-Input Approach	598
16.3	Acid Mineral Soils	605
16.4	Waterlogged and Flooded Soils	626
16.5	Alkaline Soils	641
16.6	Saline Soils	657
	References	681
	Index	862
