Table of Contents

Preface	vii
Introduction	xiii
Guidelines for the Reader, Abbreviations	xvii
1 Elements of Nonsmooth Analysis. Hemivariational Inequalities	1
1.1 Generalized Directional Derivative and the Generalized Gradient of Clarke	1
1.2 Subdifferentiation of Composite Mappings and Restrictions	9
1.3 Subdifferentiation of Integral Functionals	13
1.4 Hemivariational Inequalities and Generalized Critical Point Problem	18
1.5 Elements of the Theory of Hemivariational Inequalities	24
1.6 Historical and Bibliographical Notes	29
References	31
2 Nonsmooth Critical Point Theory	35
2.1 Nonsmooth Deformation Results	35
2.2 Equivariant Version of Deformation Result	41
2.3 A General Minimax Theorem	43
2.4 A General Critical Point Setting	47
2.5 Applications to Nonsmooth Boundary Value Problems	51
References	57
3 Minimax Methods for Variational-Hemivariational Inequalities	59
3.1 Motivation and Introduction	59
3.2 The General Setting	64
3.3 A Deformation Result	65
3.4 Minimax Principles for Functionals of Type (H)	73
3.5 A Variational - Hemivariational Inequality	80
3.6 Semicoercive Unilateral Problems and Periodic Solutions	86

References	91
4 Eigenvalue Problems for Hemivariational Inequalities	93
4.1 Formulation of the First Problem and Prerequisites	93
4.2 The Existence of Solutions of the Eigenvalue Problem in $L^2(\Omega)$.	96
4.3 The Existence of Solutions of the Eigenvalue Problem in $L^{2+d}(\Omega)$	100
4.4 Eigenvalue Problem for a Hemivariational Inequality involving a Nonlinear Compact Operator	105
4.5 Applications	111
4.5.1 An Eigenvalue Inclusion Problem	111
4.5.2 On the Buckling of Adhesively Connected von Kármán Plates	111
4.5.3 Mathematical Study of the Buckling Problem	117
4.6 The Timoshenko Plate Buckling. The Nonconvex Superpotential Problem	122
4.7 The Buckling of Cylindrical Shells Subjected to Adhesive Contact Conditions	124
4.8 Eigenvalue Problems for Hemivariational Inequalities. The Me- chanical Approach	125
References	131
5 Multiple Solutions of Eigenvalue Problems for Hemivariational Inequal- ities	133
5.1 A Minimax Approach to the Problem	133
5.2 Multiplicity Results for Even Nonlinearities. Prerequisites	144
5.3 Multiplicity Results: The Lipschitz Case	150
5.4 Multiplicity Results: The Locally Lipschitz Case	154
5.5 Buckling of Beams on Adhesive Supports	157
5.6 Eigenvalue Problems for Linear Elastic Bodies Subjected to Non- monotone Multivalued Boundary Conditions	159
5.7 Hemivariational Eigenvalue Problems for Boundary Conditions of Fuzzy-type	162
5.8 Nonmonotone Multivalued Relations in Structural Analysis and the Corresponding Eigenvalue Problem	164
References	167
6 Eigenvalue Problems for Hemivariational Inequalities on the Sphere	169
6.1 An Existence Result	169
6.2 Multiplicity of Solutions for a Special Case	176
6.3 Another Type of Eigenvalue Problem on the Sphere	179
6.4 Applications	187
6.4.1 Generalities	187
6.4.2 Buckling of Beams and Plates with Prescribed Weight on Adhesive Supports	188

6.4.3	The Optimum Weight for the Buckling Shell problem Subjected to Loading and to Adhesive Contact Conditions	189
6.5	The case of the Constraint $\langle Lu, u \rangle = r$	189
References		195
7	Resonant Eigenvalue Problems for Hemivariational Inequalities	197
7.1	Formulation of the Resonant Problem	197
7.2	Buckling of Sandwich Beams	200
7.3	Existence of Solutions	202
7.4	Landesman-Lazer conditions	209
References		217
8	Double Eigenvalue Problems for Hemivariational Inequalities	219
8.1	Double Eigenvalue Problems in L^2 -spaces	219
8.2	The Case of L^p -spaces with $p > 2$	225
8.3	The Eigenvalue Problem (P)	230
8.4	Multiple Solutions for a Double Eigenvalue Hemivariational Inequality	237
8.5	Applications	246
8.5.1	Mathematical Examples	246
8.5.2	Adhesively Connected Plates, Buckling for Given Cost or Weight	247
8.5.3	Sandwich Beams with Double Buckling Load	249
8.5.4	Sandwich Timoshenko Plates, Cylindrical Shells and Their Buckling	250
8.6	A Perturbation Result for a Double Eigenvalue Hemivariational Inequality	250
8.6.1	The Mathematical Theory	250
8.6.2	Applications: Fuzzy Perturbations	260
References		261
9	Periodic and Dynamic Problems	263
9.1	A Hyperbolic Hemivariational Inequality	263
9.2	Homoclinic solutions	273
9.3	Periodic solutions	285
References		307
