ABSTRACT

During the 1981 Spring Semester, the Memphis State University (MSU) Libraries asked representative groups of library users to give their views about the services, personnel, and facilities of the library system in order to evaluate the effectiveness of the libraries in the MSU community. This study indicates that the MSU Libraries are effectively meeting the needs of their users. The responses most often received to the items in the questionnaire were used to draw profiles of the populations being surveyed--faculty, graduate students, undergraduate students, and special privilege users. According to these data, these respondents use the MSU Libraries to find and read books and periodicals for academic interests and requirements, and believe that the MSU Libraries play an important role in the university community. They regard the libraries' facilities and collections as adequate for their needs and the personnel as willing and able to help them. The data upon which these summaries are based are included in this report along with a copy of the survey instrument. (Author)

## ABSTRACT

During the 1981 Spring Semester, the Memphis State University Libraries asked representative groups of library users to give their views about the services, personnel and facilities of the library system in order to evaluate the effectiveness of the libraries in the MSU community. This study indicates that the MSU Libraries are effectively meeting the needs of their users. The responses most often received to the items in the questionnaire were used to draw profiles of the populations being surveyed: faculty, graduate students, undergraduate students, and special privilege users. According to these data, these respondents use the MSU Libraries to find and read books and periodicals for academic interests and requirements and believe that the MSU Libraries play an important role in the university community. They regard the libraries' facilities and collections as adequate for their needs and the personnel as willing and able to help them. The data upon which these summaries are based are included in this report along with a copy of the survey instrument.

Mission

In 1980, the Director of Libraries asked the Coordinator of Public Services to appoint a Committee to make an evaluation study of the MSU Libraries and to submit the results in a report to the Office of Academic Affairs. In keeping with the idea that the best measure of library effectiveness is the degree to which the library is meeting the needs of those who use the library, the appointed committee decided to survey through questionnaires the four major groups of persons who use the MSU Libraries: faculty, graduate students, undergraduate students and special privilege users. The purpose of the survey, therefore, was to ask the users of the MSU Libraries to evaluate the quality of library service provided to the MSU community. The objectives of the questionnaire were to (1) identify the persons who use the library system through academic or professional association; (2) reveal why these persons used the MSU Libraries, when they used them and whether they were able to get what they needed through the system; and (3) elicit attitudes of these users concerning service affected by library personnel and facilities.

Methodology

The questionnaire was designed in three parts. All survey participants were given the first two parts: questions to be answered by all respondents and questions to be answered only by those who use branch libraries. The third part consisted of questions that were different for each of the four survey groups. During construction of the questionnaire, the committee met with the manager of Statistical Services to ensure a format that could be processed by computer services personnel. The Director of Institutional Research reviewed the survey instrument in terms of its stated purpose and

Figure 1  
Selected Sample

agreed to assist the committee in the distribution and collection of the questionnaires. Having approval of the final form of the questionnaire from Statistical Services, the committee requested and received permission from the Director of Information Systems and Analysis to use the Computer Center to tabulate the survey data. Mailing of the questionnaires was arranged with the Manager of Postal Services for the 15th and 16th of February, 1981.

Because of the large number of persons in the survey population, a representative sample, approximately 20%, was chosen from each group to receive the questionnaire. Though the committee recognized the value of pretesting the survey instrument, the questionnaire was sent out without prior trial because of the extra cost and personnel time that would have been necessary. The names of the faculty, graduate and undergraduate recipients were selected at random by the computer. The Office of Institutional Research coordinated the activities relating to the computer

selection and label printing for mailing, based upon selection criteria requested by the committee. The special privilege recipients were randomly chosen from a list kept by the library Circulation Department. The questionnaires were mailed with return envelopes addressed to the Office of Institutional Research, where they were collected and forwarded to the library committee. Of the 4,207 questionnaires thus distributed (Figure 1), 818 (19.4%) were returned (Figure 2) by the collection deadline date, March 16, 1981--61 from faculty (F), 206 from graduate students (G), 514 from undergraduate students (U), and 37 from special privilege users (S). The Libraries' Special Projects Department helped to code the returned questionnaires before they were sent to the Computer Center for processing. By the end of June 1981, the computer analysis of the data requested by the survey was completed and sent to the survey committee.

The members of the committee spent much time individually going over the voluminous results of the survey. This report is a distillation of the information that has been accumulated, an attempt to summarize concisely but accurately the mass of data in terms of the mission objectives. The data upon which this summary is based as well as a record of committee activity in designing and implementing this study are available for examination in the Mississippi Valley Collection of the MSU Libraries.

### Survey Summary

Basically, the questionnaire has generated the desired information about the effectiveness of the MSU Libraries in meeting the needs of their users. This information is summarized in terms of the modal values assigned by respondents in each of the survey groups to pertinent survey items and is presented in the following group profiles.

Faculty Survey Summary

The answers most often received from faculty respondents show a pattern of faculty use and attitudes toward the role of the library on campus. According to these sample responses, faculty library users most frequently:

1. Are from the College of Arts and Sciences
2. Visit MSU Libraries to read for self-improvement and to borrow materials for later use.
3. Make frequent but shorter visits to the library
4. Seldom use the library after 10 p.m. and never after midnight during extended library hours
5. Use periodicals, circulating books and reference materials
6. Rarely photocopy books, but will frequently photocopy periodicals
7. Have not taken the cassette tape library tour
8. Believe the library is very important on campus and that the MSU library system plays an important role in the education of MSU students
9. Require their students to use the library for their courses, but rarely instruct them in using the library
10. Do not prefer that a librarian instruct the class and have never asked a librarian for such instruction
11. Are aware of the credit course taught on the use of library materials and feel that such a course should be taught
12. Order books and periodicals for the library and believe that the responsibility for ordering library materials should be shared by faculty, librarians and administrators
13. Rate the MSU Libraries system as effectively meeting their overall needs
14. Find that the materials they need for research and study are usually available through MSU Libraries, but they also use off-campus libraries for this purpose
15. Rate the library collections in their subject fields as adequate and show concern about the quality of the book and and periodical collections
16. Believe their students get the help they need at the library, though they think that librarians should make a greater effort to show students how to use the library effectively
17. Rate the communication from librarians to teaching faculty about library service and materials as average
18. Say that library personnel are willing and able to help them and give assistance with interest when needed
19. Judge the physical facilities of the library to be average, though the quantity and quality of study space is good
20. Prefer individual carrels for study
21. Are undecided about expansion of the main library building automating library circulation processes and card catalog information

Graduate Survey Summary

Modal responses from graduate respondents suggest certain patterns of use and attitudes for that population. According to these figures, most

graduate students who use MSU Libraries:

1. Are from the College of Education
2. Are part-time students working toward a master's degree
3. Have no thesis in progress
4. Use MSU Libraries for required reading and term paper research
5. Visit MSU Libraries up to four times a month and stay from one to two hours each time
6. Use periodicals, reference materials and circulating books
7. Seldom use the library after 10:00 p.m. and rarely after midnight
8. Usually photocopy periodicals but not books
9. Believe that MSU Libraries is important on campus and in student education
10. Are unaware of the credit course offered on library use, but agree that such a course should be taught
11. Have not taken the cassette tour of the library
12. Think librarians should make greater efforts to teach students to use the library
13. Prefer individual carrels for library study
14. Have mixed reactions toward automating circulation and the card catalog
15. Have found MSU Libraries to be effective in meeting their needs, though they also need to use other libraries for research and study as well
16. Usually find needed materials readily available
17. Rate most used departments or adequate or excellent
18. Seldom if ever use MVC, Maps or Government Documents areas of the Library
19. Rate physical facilities as average or above, with good study space
20. Found MSU Libraries to be comparable to other college and university libraries in ease of use
21. Did not offer comments, but most of those who did expressed a need for improved services and or concern about personal safety in the stacks.

Undergraduate Survey Summary

The lowest response ratio came from the undergraduate students, a 17% return. Because of this smaller sample, and perhaps because of the greater diversity within the population, the modal responses may less accurately reflect central tendencies for the undergraduate population who use MSU Libraries. However, some generalizations may be made regarding this group of library users based on the number who did respond. These statistics show that undergraduate students who use MSU Libraries most frequently:

1. Are from the College of Business
2. Are full-time students at the senior level
3. Use MSU Libraries to find and read materials required for a course
4. Tend to use the library in the evenings, but rarely after 10 p.m.
5. Visit the library ten times a month, often staying up to two hours
6. Use circulating books, reference material and periodicals
7. Photocopy periodicals more often than books
8. Will try to locate library materials by using the card catalog first, other location aids next and a librarian last
9. Have not taken the cassette tape tour of the library
10. Are aware of the credit course in library use and agree that such a course should be taught, but say they are not interested in taking the course
11. Are able to locate books if they have the call number
12. Believe that the role of the library on campus is very important and that MSU Libraries plays an important role in the education of MSU students
13. Are required to use library resources for their courses
14. Believe librarians should make greater efforts to show students how to use the library effectively
15. Found library personnel willing and interested in helping students
16. Often found what they needed for research and study at MSU Libraries but frequently use off-campus libraries to find needed materials for this purpose
17. Rate MSU Libraries as effective in meeting their needs
18. Found assistance received from library personnel in various departments excellent to adequate
19. Tend not to use Government Documents, MVC or Branch Libraries
20. Rate the overall physical facilities of the library as average
21. Prefer individual carrels for library use
22. Judge the quantity and quality of study space to be good and do not have difficulty concentrating when studying in the library
23. Are undecided about funding priorities for library expansion
24. Believe that the library should automate circulation and the card catalog, but don't know how they would feel about using an on-line catalog.

Special Privilege Users Survey Summary

MSU Libraries grants special library privileges to persons not formally affiliated with the university. At the end of FY 1980-81 there were 1,037 current SP card holders from a wide variety of community organizations.

The survey results show that these respondents most frequently:

1. Are employed by small and large corporations in the area
2. Consider their research at MSU job-related
3. Depend more on MSU Libraries than other libraries in the area for these needs
4. Use MSU Libraries to read for self-improvement and to check books out and in
5. Tend to make infrequent visits to the library, an average of once a month, and stay from 30 minutes to 3 hours

6. Do not use the library after 10 p.m.
7. Will rarely photocopy books or periodicals
8. Believe that the library plays an important role on campus and in the education of MSU students
9. Believe that librarians should make greater efforts to show students how to use the library effectively
10. Are not aware of the credit course in library use but believe that such a course should be taught
11. Have not taken the cassette tour of the library
12. Oppose funding for automated circulation and an on-line catalog though they generally are not knowledgeable about on-line catalogs.
13. Are unaware of temporary parking passes and never use a parking pass
14. Found the library material that they needed readily available in the library
15. Rate MSU Libraries as effective in meeting their needs
16. Use reference materials, microforms, periodicals and books and consider those collections to be adequate for their needs
17. Think that the library physical facilities are average
18. Rate library study space as good and prefer individual carrels for study
19. Found library personnel able and willing to help with interest
20. Rate service as adequate in the departments they use
21. Suggest that the library should re-examine details of its policy for Special Privilege Users

#### Branch Library Survey Summary

Although everyone received the questions relating to branch libraries, only those who used them were asked to answer the questions. A total of 32.19% of all respondents, 253 of the 818 valid cases, reported using branch libraries at some time. Because of this restricted response, modal replies are determined by adjusted frequencies rather than relative frequency distributions. According to these statistics, branch library users most frequently:

1. Have not decided on a major field of study
2. Use the Engineering Library more often than the other branches
3. Visit a branch library from 1-3 times a month and stay 30 minutes to an hour each time
4. Attend classes during the day
5. Consider branch hours to be adequate
6. Use books, periodicals and reference materials more than other types
7. Usually find materials needed in the branches
8. Did not choose to offer comments, but of those who did, the most frequent suggestions were for longer hours and more holdings

## Statistical Summaries

### A. Statistical Summary: General Questionnaire (% Relative Frequencies)

The following statistics are given to show the frequency distribution of the values sought by the general questionnaire, the first two parts sent to all of the sample groups. They are presented according to the basic categories suggested by the survey objectives: to derive information leading to a user profile and library profile. Within this broader perspective, the Tables I and II are drawn first to show the composite responses to each question in descending order of relative frequency and then the responses of the four groups as they compare with each other and with the composite relative frequencies. Therefore, one should be able to easily determine from the following tabulation (1) the questions used to shape the profiles, (2) the mode of all library user responses for each question, (3) the mode of each group of library user responses for each question, and (4) relative responses to specific questions for purposes of comparisons.

ACKNOWLEDGEMENT

The survey committee wishes to acknowledge the assistance given in this study by many people outside the library as well as by many others on the library staff. The task was made much easier by the many meetings and conversations with Virginia Weymouth, Manager of Statistical Services, who patiently advised and answered questions in committee sessions and who helped individuals to interpret the data from the computer analysis. Valuable assistance also was given by Dr. Walter Jones, Assistant Professor of Political Science, who served as consultant for the report summary of the statistical data. The committee is also grateful to Mary Gardiner Gruenewald, Director of Institutional Research, who advised the committee in the implementation of the survey, and to Lou Alvarado, who coordinated the mailing and collection of the questionnaires through the Office of Institutional Research.

## JOHN BRISTER LIBRARY

Memphis State Libraries would like your opinion regarding its facilities and services in order to serve its users better. Therefore, the following questionnaire is being sent to you and other MSU faculty, students and special privilege users of MSU Libraries. Your responses will be confidential since you are not asked to give your name.

The results of this survey will be reported to the Director of Libraries and to the University community and will form part of the data on which decisions about future development of the library system will be based.

Thank you for your cooperation in this research. Please answer all questions as directed and return the questionnaire in the enclosed envelope to the Office of Institutional Research no later than Monday, March 9, 1981.

The numbers on the right of the response line are for data processing purposes.
