A CHAPMAN & HALL BOOK

Contents

Preface.....	xi
Authors.....	xiii

Chapter 1	Introduction	1
1.1	Profile of Multiple Criterion Decision Making	1
1.2	Historical Development of Multiple Attribute Decision Making	2
1.3	Historical Development of Multiple Objective Decision Making	4
1.4	Introduction to Fuzzy Sets.....	7
1.4.1	Basic Concepts	7
1.4.2	Fuzzy Arithmetic Operations.....	9
1.4.3	Extension Principle	9
1.4.4	α -Cut Arithmetic	10
1.4.5	Ranking Fuzzy Numbers	11
1.5	Outline of this Book	11

Part I Concepts and Theory of MADM

Chapter 2	Analytic Hierarchy Process.....	15
2.1	Eigenvalue Method.....	15
2.2	Geometric Mean Method	20
2.3	Linear Programming Method.....	22
2.4	Fuzzy Lambda-Max Method.....	25
Chapter 3	Analytic Network Process and Fuzzy Analytic Network Process.....	29
3.1	Analytic Network Process.....	29
3.2	Fuzzy Analytic Network Process	35
3.3	Matrix Method for Fuzzy Analytic Network Process.....	44
Chapter 4	Simple Additive Weighting Method.....	55
4.1	Simple Additive Weighting Method	55
4.2	Fuzzy Simple Additive Weighting.....	57
4.3	Fuzzy Simple Additive Weighting for the Best Plan: Example of an Environment-Watershed Plan.....	60
4.3.1	Building a Hierarchical Structure of Environment-Watershed Evaluation Criteria.....	61

	4.3.1.1	Determining the Evaluation Criteria Weights	62
	4.3.2	Fuzzy Numbers	63
	4.3.3	Linguistic Variables	64
	4.3.4	Fuzzy Analytic Hierarchy Process	65
	4.4	Fuzzy Multiple Criteria Decision-Making	66
Chapter 5		TOPSIS and VIKOR	69
	5.1	TOPSIS	69
	5.2	VIKOR	71
	5.3	Comparing VIKOR and TOPSIS	75
	5.4	Fuzzy TOPSIS	76
Chapter 6		ELECTRE Method	81
	6.1	ELECTRE I	81
	6.2	ELECTRE II	82
	6.3	ELECTRE III	86
	6.4	ELECTRE IV	90
Chapter 7		PROMETHEE Method	95
	7.1	The Notion of the PROMETHEE Method	95
	7.2	PROMETHEE I, II, III, IV	96
	7.2.1	PROMETHEE I	98
	7.2.2	PROMETHEE II	99
	7.2.3	PROMETHEE III	99
	7.2.4	PROMETHEE IV	100
	7.3	Example for House Selection	102
Chapter 8		Gray Relational Model	103
	8.1	Concepts of Gray System and Gray Relation	103
	8.2	Gray Relation Model	104
	8.3	Gray Relation for Multiple Criteria Evaluation	105
	8.4	Example for Car Selection	107
Chapter 9		Fuzzy Integral Technique	109
	9.1	Fuzzy Integral	109
	9.2	Hierarchical Fuzzy Integral	114
Chapter 10		Rough Sets	123
	10.1	Information System	124
	10.2	Indiscernible Relation	124

10.3	Approximation of Sets and Approximation of Accuracy.....	125
10.4	Reduction of Attributes	126
10.5	Decision Table and Decision Rules	126
10.6	The Analytical Procedure of Data Analysis.....	127
Chapter 11	Structural Model	131
11.1	Interpretive Structural Modeling Method	131
11.2	DEMATEL Method.....	134
11.3	Fuzzy Cognition Maps	138
Part II Applications of MADM		
Chapter 12	AHP: An Application.....	143
12.1	Introduction	143
12.2	Planning and Design Alternatives Evaluation Model	144
12.2.1	Building Hierarchical Structure of Evaluation Criteria.....	144
12.2.2	Determining the Evaluation Criteria Weights.....	144
12.3	Case of Selecting the Engineering Service for Public Buildings.....	146
12.3.1	Weights Calculation of the Evaluation Criteria.....	146
12.3.2	Estimating the Performance Matrix.....	152
12.3.3	Ranking the Alternatives	154
12.4	Discussions	154
12.5	Conclusion	156
Chapter 13	VIKOR Technique with Applications Based on DEMATEL and ANP.....	157
13.1	Introduction	157
13.2	Novel Hybrid Multiple Criteria Decision Making model.....	158
13.2.1	DEMATEL.....	158
13.2.2	Analytic Network Process.....	161
13.2.3	VIKOR Method.....	164
13.3	Numerical Example with Applications	166
13.4	Discussions and Comparisons	169
13.5	Conclusions.....	171
Chapter 14	TOPSIS and VIKOR: An Application	173
14.1	Alternative Solutions	174
14.2	Evaluation Criteria.....	177
14.2.1	Establishing the Evaluation Criteria.....	177

14.2.2	Assessment of Criteria Weights	178
14.3	Evaluation of the Alternatives	179
14.4	Multicriteria Optimization	179
14.4.1	Comparison of TOPSIS and VIKOR	181
14.4.2	Compromise Solution.....	182
14.4.3	Discussions.....	183
14.5	Conclusions.....	184
Chapter 15	ELECTRE: An Application	187
15.1	Introduction	187
15.2	Multiple Objective Equilibrium Network Design Problem... ..	188
15.3	Modeling the Network Improvement Problem with Multiobjective Decision Making.....	190
15.4	Model and the Solution of the Bilevel Multiobjective Network Design.....	191
15.5	Evaluation and Group Decision Making for Network Improvement Project	194
15.5.1	Consensus Ranking of Cook and Seiford	194
15.5.2	Case Study of Metropolitan Taipei	195
15.5.3	Non-inferior Solutions of Network Improvement Alternatives	196
15.5.4	Evaluation Criteria of the Network Improvement Alternatives	197
15.5.4.1	Total Travel Time Saved	197
15.5.4.2	Total Investment Cost	198
15.5.4.3	Improvement of Air Pollution	198
15.5.4.4	Complexity of Underground Cables	199
15.6	Conclusions and Recommendations.....	200
Chapter 16	PROMETEE: An Application	203
16.1	Introduction	203
16.1.1	Solar Thermal Energy	203
16.1.2	Solar Photovoltaics	204
16.1.3	Fuel Cells.....	204
16.1.4	Wind Energy	205
16.1.5	Biofuels.....	205
16.1.6	Geothermal Energy	205
16.1.7	Ocean Energy	206
16.1.8	Hydrogen Energy.....	206
16.2	Evaluation of New Energy-Development Alternatives.....	207
16.2.1	Application of AHP.....	208
16.2.2	Application of PROMETHEE.....	208
16.3	Conclusions.....	216

Chapter 17 Fuzzy Integral and Gray Relation: An Application 217

- 17.1 Introduction 217
- 17.2 Non-additive Type Fuzzy Multicriteria Evaluation 219
- 17.3 Multicriteria Evaluation through the Fuzzy Integral..... 219
- 17.4 Multiple Criteria Evaluation of the Gray Relation Model 220
- 17.5 Constructing the Gray Relation Model with Non-Additive Measures 220
- 17.6 Empirical Analysis: A Case Study of Taiwan’s Junior Colleges 221
- 17.7 Problem Descriptions 221
- 17.8 Constructing Multiple Criteria Evaluation Systems 222
- 17.9 Analysis Procedures 222
- 17.10 Analysis Results and Discussions..... 224
- 17.11 Conclusions..... 227
- Appendices 228

Chapter 18 Fuzzy Integral: An Application..... 233

- 18.1 Introduction 233
- 18.2 Modeling the Hierarchical Structure of the Choquet Integral ... 234
- 18.3 Algorithm for Identifying λ 235
- 18.4 Empirical Case: Fuzzy Integral for Enterprise Intranet Websites 235
 - 18.4.1 Background and Problem Statement 235
 - 18.4.2 Constructing a Hierarchical Multiattribute Evaluation System 236
 - 18.4.2.1 Generating Aspects and Performance Scores for Criteria 236
 - 18.4.2.2 Determining the Grade of Criteria Importance..... 236
 - 18.4.2.3 Choquet Integral for Evaluating the Case Enterprise Intranet Websites 238
 - 18.4.3 Results and Discussions 238
- 18.5 Conclusions 240
- Appendix 18.1 241
- Appendix 18.2 241
- Appendix 18.3 243

Chapter 19 Rough Sets: An Application 245

- 19.1 Introduction 245
- 19.2 Illustrative Empirical Study: A Case for Making Insurance Marketing Decisions 246
 - 19.2.1 Problem Descriptions 246
 - 19.2.2 Empirical Process..... 247

19.3	Study of Customer Needs and Reason for No Purchase	247
19.4	Empirical Result	249
19.5	Discussions	251
19.6	Conclusions	255
Appendix 19.1	256
Appendix 19.2	256
Chapter 20	Extending the DEMATEL Method for Group Decision Making in Fuzzy Environments	257
20.1	Introduction	257
20.2	DEMATEL and Fuzzy Group Decision Making	258
20.2.1	DEMATEL Method	258
20.2.2	Fuzzy Group Decision Making	261
20.3	Analytical Procedure of the Proposed Methodology	264
20.4	Application of the Proposed Methodology.....	266
20.4.1	Empirical Study of an Application of the Proposed Methodology	266
20.4.2	Discussions	268
20.5	Conclusions.....	270
Appendix 20.1	Total-Relation Matrix T	271
Appendix	273
Bibliography	309
Index	333
