Nanoscale Characterization of Surfaces and Interfaces

N. John DiNardo

Department of Physics and Atmospheric Science, Drexel University,
Philadelphia, PA, U.S.A.

List of Symbols and Abbreviations	3
1 Introduction	6
2 Scanning Tunneling Microscopy (STM)	12
2.1 Historical Perspective	12
2.2 Theory	16
2.2.1 Electron Tunneling and STM Imaging	17
2.2.2 Scanning Tunneling Spectroscopy (STS)	22
2.2.3 Inelastic Tunneling Spectroscopy	27
2.2.4 Ballistic Electron Emission Microscopy (BEEM)	29
2.3 Instrumentation	31
2.3.1 Microscope Design: STM Heads	32
2.3.2 Tips	38
2.3.3 Vibration and Shock Isolation	39
2.3.4 Electronics	40
2.3.5 Microcomputer Control	43
2.4 Semiconductor Surfaces	43
2.4.1 Si(111)	43
2.4.2 Si(100)	47
2.4.3 GaAs(110)	50
2.4.4 Photoinduced Processes	50
2.5 Metal–Semiconductor Interfaces	51
2.5.1 Alkali-Metal–Semiconductor Interfaces	52
2.5.2 Growth of Trivalent Metals on Si(001)	53
2.5.3 Ambiguities in Structural Determinations	54
2.5.4 Electron Localization at Defects in Epitaxial Layers	56
2.5.5 E_F Pinning, Mid-Gap States, and Metallization	58
2.5.6 The Insulator → Metal Transition in Metallic Fe Clusters Grown on Semiconductor Surfaces	60
2.5.7 Microscopy and Spectroscopy of Buried Interfaces – BEEM	60
2.6 Metal Surfaces	64
2.6.1 Close-Packed Surfaces	66
2.6.2 Surface Diffusion	67
2.6.3 Stepped Surfaces	68
2.6.4 Adsorbate-Induced Reconstructions of Metal Surfaces	70
2.6.5 Growth of Metallic Adlayers	74

2.6.6	Resistivity in Polycrystalline Metals – Scanning Tunneling Potentiometry...	74
2.7	Insulators	75
2.8	Layered Compounds	79
2.9	Charge Density Wave Systems	86
2.10	Superconductors	92
2.11	Molecular Films, Adsorbates, and Surface Chemistry	96
2.11.1	Molecular Imaging	96
2.11.2	Adsorption and Surface Chemistry	97
2.12	Electrochemistry at Liquid–Solid Interfaces	108
2.13	Biological Systems	111
2.14	Metrological Applications	115
3	Atomic Force Microscopy	118
3.1	Atomic Force Imaging	123
3.1.1	Graphite	124
3.1.2	Insulators	125
3.1.3	Metals	125
3.1.4	Films	126
3.1.5	Polymer Surfaces and Metal Films on Polymer Substrates	127
3.1.6	Biological Molecules	128
3.1.7	Adsorption Dynamics of Biological Molecules in Real Time	129
3.2	Nanoscale Surface Forces	130
3.3	Nanotribology	132
3.4	Non-Contact Imaging	133
3.4.1	Van der Waals Forces	133
3.4.2	Electrostatic Forces	134
3.4.3	Magnetic Forces	135
4	Manipulation of Atoms and Atom Clusters on the Nanoscale	137
4.1	Transfer of Atoms and Atom Clusters Between Tip and Sample	138
4.2	Tip-Induced Lateral Motion of Atoms on Surfaces	139
4.3	Nanoscale Modification by Tip-Induced Local Electron-Stimulated Desorption	141
4.4	Nanoscale Chemical Modification	142
4.5	High-Temperature Nanofabrication	142
4.6	Nanoscale Surface Modification Using the AFM	142
4.7	Towards Nanoscale Devices	143
5	Spin-Offs of STM – Non-Contact Nanoscale Probes	144
5.1	Scanning Near-Field Optical Microscope (SNOM)	144
5.2	Photon Scanning Tunneling Microscope (PSTM)	145
5.3	Scanning Thermal Profiler (STP)	146
5.4	Scanning Chemical Potential Microscope (SCPM)	147
5.5	Optical Absorption Microscope (OAM)	149
5.6	Scanning Ion Conductance Microscope (SICM)	150
6	Acknowledgements	151
7	References	151
