## TABLE OF CONTENTS

|   |    |
|---|----|
| Preface.....  | ix |
| <br><b>Plenary Lecture</b>  |    |
| The control of selectivity and stability of catalysts by spillover processes<br>B. Delmon (Belgium).....  | 1  |
| Catalyst design based on spillover theory<br>K. Fujimoto (Japan).....   | 9  |
| Spillover effect as the key concept for realizing rapid catalytic reactions<br>T. Inui (Japan).....   | 17 |
| <br><b>Special Lecture</b>  |    |
| The history and perspectives of spillover<br>S.J. Teichner (France).....  | 27 |
| <br><b>Invited Lecture</b>  |    |
| Synergism in the catalysis of supported gold<br>M. Haruta, S. Tsubota, A. Ueda, and H. Sakurai (Japan).....                                       | 45 |
| The effect of spillover hydrogen on coke formation catalyzed by HY zeolite and pillared montmorillonite<br>E. Kikuchi and T. Matsuda (Japan)..... | 53 |
| Spectroscopic insight into spillover<br>Wm. C. Conner, Jr. (U.S.A.).....  | 61 |
| Molecular hydrogen-originated solid acid catalysts<br>H. Hattori (Japan).....   | 69 |
| Hydrocracking of residual oils with iron supported zeolite containing catalyst<br>I. Nakamura, R. Iwamoto, and A. I-ino (Japan).....              | 77 |

|  |     |
|--|-----|
| Attempt at the characterization of spillover adsorbed species during catalysis<br>G.M. Pajonk (France).....  | 85  |
| Oxygen spillover for the design of industrial oxidation catalysts<br>Y. Moro-oka (Japan).....  | 95  |
| <b>Oral Presentation</b>   |     |
| Surface-to-bulk spillover of hydrogen (proton) in the catalysis of solid heteropoly compounds<br>M. Misono, H. Igarashi, K. Katamura, T. Okuhara, and N. Mizuno (Japan).....                                     | 105 |
| Ion spillover as the origin of the NEMCA effect<br>C. G. Vayenas, S. Bebelis, I. V. Yentekakis, S. Neophytides, and J. Yi (Greece).....  | 111 |
| Reduction of nitrous oxide by electrochemically-generated spillover hydrogen<br>K. Otsuka and H. Yamagata (Japan).....   | 117 |
| Hydrogen spillover on bimetallic supported Pt-Re particles<br>D.T. On, M. Che*, and L. Bonneviot (France*/Canada).....   | 125 |
| The role of irreversible and reversible spillover hydrogen in reforming reactions<br>S. Chen, Y. Sun, and S. Peng (P.R. China).....  | 131 |
| New experimental evidence of the long distance hydrogen back spillover (LD-HBS) mechanism in the paraffins aromatization on Zn and Ga ZSM-5 catalysts<br>Gr. Pop, D. Ivanescu, and R. Ganea (Rumania).....       | 137 |
| Hydrogen back spillover phenomena in the aromatization of light alkanes over hybrid catalysts. Mechanistic considerations<br>R. Le van Mao, J. Yao, L. Dufresne, R. Carli*, and V. Ragaini* (Canada/Italy*)..... | 143 |
| Hydrogen spillover in the conversion of cyclohexane on ZSM-5 zeolites<br>F. Roessner, U. Mroczek, and A. Hagen (Germany).....  | 151 |
| New active sites induced by hydrogen spillover in reduced Pt-Ga/HZSM-5 aromatization catalysts<br>E. S. Shpiro, D. P. Shevchenko, R. V. Dmitriev, O. P. Tkachenko, and Kh.M. Minachev (Russia).....              | 159 |

|  |     |
|--|-----|
| Hydroisomerization of n-pentane over hybrid catalysts containing supported hydrogenation catalyst<br>K. Aimoto, K. Fujimoto, and K. Maeda (Japan).....   | 165 |
| The role of spillover in the hydrogenation of oxygenates adsorbed on Ni/Al <sub>2</sub> O <sub>3</sub><br>B. Chen and J.L. Falconer (U.S.A.).....  | 171 |
| Hydrogenation active sites of molybdenum sulfide catalysts enhanced by Ni and Co organometallics<br>A. Nishijima, S. Yoshitomi, T. Sato, Y. Yoshimura, H. Shimada, and N. Matsubayashi (Japan).....                      | 177 |
| Electrical conductivity study of hydrogen spillover on TiO <sub>2</sub><br>Th. Braunschweig, U. Roland, and H. Winkler (Germany).....  | 183 |
| Direct observation of surface mobility with microscopic techniques: photoemission electron- and field electron microscopy<br>J. H. Block, M. Ehsasi, V. Gorodetskii*, A. Karpowicz, and M. Berdau (Germany/Russia*)..... | 189 |
| Selective hydrogen permeation through metal-dispersed porous alumina membrane<br>K. Eguchi, M.-R. Chai, Y. Yamashita, M. Machida, and H. Arai (Japan).....   | 195 |
| Surface migration of oxygen and of hydrogen in supported metal catalysts<br>D. Martin and D. Duprez (France).....  | 201 |
| Catalysis and spillover<br>E. P. S. Barrett, A. J. Blackburn, M. A. Yates, Y. Wang, and P. A. Sermon (U.K.).....   | 207 |
| Oxidative conversion of methane on Cu and Ag-Ni electrodes at artificial unsteady-state mode of the SOFC reactor operation<br>V.D. Belyaev, V.A. Sobyenin, and O.A. Mar'ina (Russia).....                                | 213 |
| Spillover of atomic oxygen and reverse spillover of dioxygen species on Pt/CeO <sub>2</sub> catalyst<br>C. Li, Y. Chen, W. Li, and Q. Xin (P.R. China).....  | 217 |
| Methoxy formation/spillover on Pd/Al <sub>2</sub> O <sub>3</sub> studied by <sup>13</sup> C, <sup>1</sup> H NMR<br>O.H. Han, G. Larsen, K.W. Zilm, and G.L. Haller (U.S.A.).....   | 223 |
| A surface structure model with allowance for spillover<br>R.K. Edvinsson, R.R. Hudgins and, P.L. Silveston (Canada).....   | 229 |
| A mathematical model for spillover<br>Y.W. Nam* and P.L. Silveston (Korea*/Canada).....  | 235 |

|   |     |
|---|-----|
| Promoting effect and hydrogen spillover in supported $\text{SeRh}_6$ -cluster catalysts<br>Y. Izumi and Y. Iwasawa (Japan).....   | 241 |
| Heterogeneous catalytic ammoximation of cyclohexanone with ammonia and molecular oxygen<br>G. Busca, E. Giamello, D. Pinelli, and F. Trifiro` (Italy).....  | 247 |
| <b>Poster Presentation</b>  |     |
| CO chemisorption and CO-TPR in $\text{H}_2$ stream with Rh/NaY and Rh-Zn/NaY zeolite catalysts<br>Y. -D. Xu, A. -M. Liu, D. -M. Li, J. -S. Huang, and L. Huang (P.R.China).....   | 253 |
| Plasma-induced chemisorption of nitrogen and hydrogen on alumina-supported platinum catalysts<br>S. Kameoka, S. Ito, and K. Kunimori (Japan).....   | 257 |
| Characterization of palladium catalyst supported on zeolite<br>T. Matsuzaki, K. Abe, K. Ohdan, S. Tanaka, K. Nishihira, and A. Nakamura (Japan).....  | 261 |
| Surface treatments of silica support for nickel catalyst: effects on hydrogen adsorption/desorption and ethane hydrogenolysis<br>M. Arai, K. Suzuki, and Y. Nishiyama (Japan).....  | 265 |
| Coadsorption of CO and NO on Co-Rh cluster-derived bimetallic catalysts and NO spillover phenomenon<br>Q. Xin, Z. Cao, Y. Q. Chen, Y. Chen, H. Zhang, and C. Li (P.R. China).....   | 269 |
| IR study of Rh-Sn bimetallic system and spillover of oxygen<br>S. Nishiyama, M. Akemoto, I. Yamamoto, H. Yanagi, S. Tsuruya, and M. Masai (Japan).....  | 273 |
| Spillover to form $\text{CH}_3\text{O}$ on $\text{Pt}/\text{Al}_2\text{O}_3$ and $\text{Pd}/\text{La}_2\text{O}_3$<br>R. L. Flesner, K. B. Kester, B. Chen, and J. L. Falconer (U.S.A.).....                                      | 277 |
| Nature of Brønsted-acid sites in $\text{Ag}_3\text{PW}_{12}\text{O}_{40}$ in the presence of hydrogen and reversible interconversion of protons and hydrogen<br>T. Baba, M. Nomura, Y. Ohno, Y. Hiroyama, and Y. Ono (Japan)..... | 281 |
| A new concept of hydrogen storage: a $\text{Pt}/\text{SO}_4^{2-}\text{-ZrO}_2$ material<br>T. Tanaka, K. Ebitani, H. Hattori, and S. Yoshida (Japan).....   | 285 |
| Hydrogenation of isobutylene by spiltover hydrogen from Pt/KA-zeolite to NaY-zeolite<br>S. Ohgoshi, I. Nakamura, and Y. Wakushima (Japan).....  | 289 |

|   |     |
|---|-----|
| Influence of support modification on hydrogen spillover in ethylene hydrogenation over Pt/Al <sub>2</sub> O <sub>3</sub> catalyst<br>G. Lu (P.R.China).....   | 293 |
| Hydrogenation of sodium fumarate in the solid phase over fine nickel powder<br>T. Harada and T. Osawa (Japan).....  | 297 |
| New active site for CO hydrogenation formed on promoted Rh catalyst by spillover hydrogen<br>H. Kato, T. Mori, M. Nakajima, Y. Mori, T. Hattori, and Y. Murakami (Japan).....   | 301 |
| Spillover effect for the reducing reaction of CO <sub>2</sub> with CH <sub>4</sub> over SiO <sub>2</sub> -supported transition metal catalysts physically mixed with MgO<br>O. Takayasu, N. Hongo, and I. Matsuura (Japan)..... | 305 |
| Acceleration of dehydrogenation reactions by hydrogen spillover<br>H. Imamura, Y. Sakata, and S. Tsuchiya (Japan).....  | 309 |
| Carbon-supported dehydrogenation catalysts composed of platinum and ruthenium metals<br>Y. Ando, X. Li, E. Ito, M. Yamashita, and Y. Saito (Japan).....   | 313 |
| Diffusion of oxygen atoms from active sites during the catalytic oxidation of carbon monoxide with oxygen molybdenum trioxide<br>Y. Iizuka (Japan).....   | 317 |
| Spillover in catalyses over Co-phthalocyanines supported on titania<br>I. Mochida, T. Higashiizumi, Y. Ishihara, and H. Fujitsu (Japan).....  | 321 |
| CO oxidation over gold supported on TiO <sub>2</sub><br>S. Tsubota, D. Cunningham, Y. Bando, and M. Haruta (Japan).....   | 325 |
| Platinum metals-ceria synergism in autoexhaust catalyst<br>T. Yamada, K. Kayano, and M. Funabiki (Japan).....   | 329 |
| Hysteresis and self-oscillation in a selective catalytic reduction of nitric oxide by hydrocarbons on alumina<br>A. Obuchi, A. Ogata, K. Mizuno, A. Ohi, and H. Ohuchi (Japan).....   | 333 |
| The effect of electrochemical pumping of oxygen on catalytic behaviour of metal electrodes in methane oxidation<br>O. A. Marina, V. A. Sobyenin, V. D. Belyaev, and V. N. Parmon (Russia).....                                  | 337 |

|   |     |
|---|-----|
| Possibility of sulfur spillover on hydrodesulfurization catalysts using radioactive $^{35}\text{S}$<br>T. Kabe, A. Ishihara, W. Qian, S. Ogawa, and H. Sakuno (Japan).....  | 341 |
| New evidence of the promotion of activity and selectivity through hydrogen spill-over activation of biphasic sulfided hydrotreating catalysts<br>S. Giraldo de León*, P. Grange, and B. Delmon<br>(Colombia*/Belgium) ..... | 345 |
| Interaction between Co species and Mo species in $\text{CoO-MoO}_3/\text{Al}_2\text{O}_3$<br>M. Yamada, S. Kasahara, and K. Kawahara (Japan).....   | 349 |
| Hydrogen spillover on ruthenium promoted molybdenum catalysts for hydrodesulfurization<br>X.S. Li, Z.S. Hou, and Q. Xin (P.R.China).....  | 353 |
| Development of hydrodesulfurization catalysts prepared using metal carbonyls<br>A. Ishihara, M. Nomura, M. Azuma, M. Matsushita, K. Shirouchi, and T. Kabe (Japan).....   | 357 |
| Transfer hydrocracking of heavy oils with metal-supported carbon catalyst<br>I. Nakamura, K. Aimoto, and K. Fujimoto (Japan) .....  | 361 |
| Enhancing effect of hydrogen sulfide for cracking of n-hexane over alkali and alkaline earth metal zeolites<br>M. Sugioka, M. Amisawa, K. Sato, and H. Abe (Japan).....   | 365 |
| Spillover effect in methane reforming reactions on Ni-based composite catalysts modified with precious metals<br>T. Inui, K. Fujioka, W. Tanakulrungsank, and T. Takeguchi (Japan).....                                     | 369 |
| Behavior of surface oxygen on a $\text{Rh}/\text{SiO}_2$ catalyst in oxidation of methane<br>J. Nakamura, K. Kubushiro, and T. Uchijima (Japan).....  | 373 |
| Utilization of oxide ion transfer for oxidative coupling of methane with membrane reactors<br>T. Nozaki, K. Omata, and K. Fujimoto (Japan).....   | 377 |
| Highly dispersed cobalt catalysts modified with transition metals and their applications to CO hydrogenation<br>Y. Sugi, T. Matsuzaki, H. Arakawa, K. Takeuchi, and T.Hanaoka (Japan).....                                  | 381 |

|   |     |
|---|-----|
| Continuous catalysis on oxides in the presence of spillover hydrogen<br>M.S.W. Vong and P.A. Sermon (UK).....   | 385 |
| Promoting effect of TiO <sub>2</sub> addition to CuO-ZnO catalyst on methanol<br>synthesis by catalytic hydrogenation of CO <sub>2</sub><br>H. Arakawa, K. Sayama, K. Okabe, and A. Murakami (Japan)..... | 389 |
| Spillover effect on the stabilization of Cu-Zn catalyst for CO <sub>2</sub><br>hydrogenation to methanol<br>K. Fujimoto and Y. Yu (Japan).....  | 393 |
| Hydrogenation of CO <sub>2</sub> over metal supported fine particles<br>T. Uematsu, M. Fukuda, T. Iijima, and S. Shimazu (Japan).....   | 397 |
| Spillover effects of hydrogen on the reduction of CO <sub>2</sub> over supported<br>metal catalysts<br>T. Sodesawa, S. Sato, and F. Nozaki (Japan).....   | 401 |
| Synergistic effect of Pd and Mn <sub>2</sub> O <sub>3</sub> in combustion reactions<br>Y. Tsuji and S. Imamura (Japan).....   | 405 |
| Catalytic gasification activity of iron enhanced by spilt-over<br>hydrogen<br>S. Matsumoto and S. Sakagami (Japan).....   | 409 |
| Catalytic behavior of iron in the gasification of coal with hydrogen<br>K. Asami and Y. Ohtsuka (Japan).....  | 413 |
| Liquid-phase hydroxylation of xylene with hydrogen peroxide over<br>zeolite catalysts<br>T. Yashima, S. Nagase, T. Komatsu, and S. Namba (Japan).....   | 417 |
| Promoting effects of noble metals on the detection of ammonia by<br>semiconductor gas sensor<br>T. Maekawa, J. Tamaki, N. Miura, and N. Yamazoe (Japan).....  | 421 |
| Manganese oxide and niobium oxide catalysts prepared by a<br>proton exchange and elimination method<br>Y. Inoue, K. Sato, H. Takahashi, and S. Yasukawa (Japan).....                                      | 425 |
| Promoting role of metal additives in modified Pd catalysts for<br>selective hydrodechlorination of CFC-113<br>R. Ohnishi, H. Suzuki, W.-L. Wang and M. Ichikawa (Japan).....                              | 429 |
| Author Index.....   | 433 |
