

Nitrogen Fixation in Agriculture, Forestry, Ecology, and the Environment

Edited by

Dietrich Werner

*Philipps-University,
Marburg, Germany*

and

William E. Newton

*Department of Biochemistry,
Virginia Polytechnic Institute and State University,
Blacksburg, Virginia, U.S.A.*

Springer

TABLE OF CONTENTS

Series Preface.....	ix
Preface.....	xiii
List of Contributors.....	xvii
Chapter 1. Production and Biological Nitrogen Fixation of Tropical Legumes	
<i>D. Werner</i>	1
1. Introduction	1
2. <i>Phaseolus</i> sp. and <i>Vigna</i> sp. (Beans)	2
3. <i>Arachis hypogaea</i> (Groundnut, Peanut)	7
4. <i>Cicer arietinum</i> (Chickpea)	8
5. <i>Cajanus cajan</i> (Pigeon pea)	9
6. <i>Mucuna pruriens</i> (Velvet bean) and Other Legumes	10
Acknowledgements	12
References	12
Chapter 2. Nitrogen Fixation by Soybean in North America	
<i>S. G. Pueppke</i>	15
1. Soybean: Pathways to North America and Establishment as a Crop	15
2. Soybean Production in North America	17
3. Major Soybean Cropping Systems	20
4. Biological Nitrogen Fixation by Soybean in North America	20
5. Perspectives	21
Acknowledgements	22
References	22
Chapter 3. The Importance of Nitrogen Fixation to Soybean Cropping in South America	
<i>M. Hüngría, J. C. Franchini, R. J. Campa and P. H. Graham.</i>	25
1. Introduction	25
2. Taxonomy, Origins, and Importance of Soybean	25
3. Biological Nitrogen Fixation	29
4. Economic Importance of Biological Nitrogen Fixation (BNF) in South America	32
5. Crop Management in South America	34
6. Final Considerations	38
Acknowledgement	39
References	39
Chapter 4. Production, Regional Distribution of Cultivars, and Agricultural Aspects of Soybean in India	
<i>S. K. Mahna</i>	43
1. Introduction and Historical Background	43

2. All-India Area Coverage, Productivity, and Production of Soybean between 1970-2003	45
3. All-India State-wise Area Coverage, Productivity, and Production of Soybean	46
4. Regional Distribution of Soybean Cultivars	49
5. Regional Agricultural Aspects of Soybean Cultivation	59
Acknowledgements	64
References	64

Chapter 5. Soybean Cultivation and BNF in China

<i>J. E. Ruiz Sainz, J. C. Zhou, D.-N. Rodriguez-Navarro, J. M. Vinardell and J. E. Thomas-Oates</i>	67
1. Summary	67
2. Soybean Cultivation in China: Historical Aspects and Current Situation	68
3. Nitrogen-Fixing Bacteria that Nodulate Soybean	75
4. The Soybean Germplasm Collection in China	81
5. Soybean in Crop Rotation and in Continuous Cultivation	82
6. Conclusions	84
Acknowledgement	85
References	85

Chapter 6. Soil Stress Factors Influencing Symbiotic Nitrogen Fixation

<i>M. J. Sadowsky</i>	89
1. Introduction	89
2. Importance of Symbiotic Nitrogen Fixation	89
3. Symbiotic Interaction of Legumes with Rhizobia	90
4. Nodulation and Nitrogen-Fixation Genetics in the Rhizobia and Bradyrhizobia	92
5. Rhizobia in the Soil Environment	94
6. Stress Factors in the Soil Environment that Influence N ₂ Fixation ..	95
7. Concluding Remarks	101
References	102

Chapter 7. Nodulated Legume Trees

<i>J. I. Sprent</i>	113
1. Introduction	113
2. Leguminosae	113
3. Rhizobia that Nodulate Legume Trees	133
4. Types of Nodule formed on Trees	134
5. Mycorrhizas and Other Nutrient-Acquisition Systems	135
6. Measurement of Nitrogen Fixation by Trees	136
7. Role of Legume Trees in Natural and Managed Systems	137
References	139

Chapter 8. Nitrogen Fixing Trees with Actinorhiza in Forestry and Agroforestry	
<i>R. O. Russo</i>	143
1. Introduction	143
2. General Characteristics of the Actinorhizal Symbiosis	144
3. Host Botanical Families	148
4. Nitrogen Fixation in Actinorhizal Trees	149
5. Mycorrhizal Associations with Actinorhizal Trees	153
6. Actinorhizal Trees in Agroforestry	157
7. The Genus <i>Casuarina</i>	158
8. The Experience of the Central America Fuelwood Project	159
9. The Case of <i>Alnus acuminata</i> in Tropical Highlands	161
10. Other Uses of Actinorhizal Trees	163
11. Concluding Considerations	164
References	165
Chapter 9. Molecular Ecology of N ₂ -fixing Microbes Associated with Gramineous Plants: Hidden Activities of Unknown Bacteria	
<i>T. Hurek and B. Reinhold-Hurek</i>	173
1. Introduction	173
2. The Problem of Identifying Key Diazotrophic Bacteria in Gramineous Plants: The Classical Approach	174
3. The Significance of Diazotrophic Grass Endophytes	176
4. The Significance of Culture-Independent Methods	179
5. The Significance of <i>nifH</i> -Targeted Methods	180
6. Limitations of <i>nifH</i> -Targeted Methods	181
7. Many Diazotrophs Defy Cultivation	183
8. Diazotrophic Grass Endophytes as Key Organisms for BNF in Gramineous Plants	185
9. Summary and Outlook	189
References	191
Chapter 10. Interactions of Arbuscular Mycorrhiza and Nitrogen-Fixing Symbiosis in Sustainable Agriculture	
<i>J. M. Barea, D. Werner, C. Azcón-Guilar and R. Azcón</i>	199
1. Introduction	199
2. Purpose of Review	200
3. Nitrogen-Fixing Symbioses	201
4. Arbuscular Mycorrhiza	202
5. Interactions between AM Fungi and Rhizobia to Improve Legume Productivity in Agriculture	205
6. Conclusions	214
Acknowledgements	215
References	215

Chapter 11. Inoculant Preparation, Production and Application

<i>M. Hungria, M. F. Loureiro, I. C. Mendes, R. J. Campo and P. H. Graham . . .</i>	223
1. Introduction	223
2. Strain Selection	224
3. Inoculant Production	230
4. Inoculant Application	237
5. Factors Affecting the Success of Inoculation	240
6. Main Conclusions	245
Acknowledgements	246
References	246

Chapter 12. Nitrifying Bacteria

<i>C. Fiencke, E. Spieck and E. Bock</i>	255
1. Nitrification as Part of the Nitrogen Cycle	255
2. Two Physiological Groups of Bacteria Contribute to Nitrification	257
3. Ecology and Detection of Nitrifying Bacteria	258
4. Metabolism of Nitrifying Bacteria	260
References	270

Chapter 13. The Nitrogen Cycle: Denitrification and its Relationship to N₂ Fixation

<i>R. J. M. van Spanning, M. J. Delgado and D. J. Richardson</i>	277
1. Introduction	277
2. The Nitrogen Cycle	279
3. Denitrification	281
4. Bacterial Respiratory Nitrate Reductases	282
5. Nitrite Reductases	296
6. Nitric Oxide Reductases	301
7. Nitrous Oxide Reductase	306
8. Linkage of the Denitrification Gene Clusters	307
9. Bioenergetics of Denitrification	310
10. Regulation of Transcription of Denitrification Genes	312
11. Regulation of Denitrification by Environmental Factors	320
12. Diversity of Denitrification	321
13. Yeast and Fungal Denitrification	325
14. Concluding Remarks	327
Acknowledgements	327
References	327

Subject Index	343
