Erratum

In the definition of f (beginning of Sect. 4, p. 72) we need $f(-5R/2)=1/9$, $f(-R/2)=8/9$ instead of $1/3$ and $2/3$. Proofs remain unchanged, only (34) turns into $Q_{32} \leqq 3R(1+d)S_3 + (8+2d)S_4$.
