Contents

1	INTRODUCTION	1
1.1	Statement of the Mathematical Programming Problem	1
1.2	Historical Survey of Sequential Unconstrained Methods for Solving Constrained Minimization Problems	4
2	MATHEMATICAL PROGRAMMING—THEORY	17
2.1	First-Order Necessary Conditions	17
2.2	Second-Order Necessary Conditions	25
2.3	Second-Order Sufficiency Conditions	30
2.4	Sensitivity Analysis in Nonlinear Programming	34
2.5	Historical Remarks	38
3	INTERIOR POINT UNCONSTRAINED MINIMIZATION TECHNIQUES	39
3.1	Introduction—Derivation of Algorithms from Sufficiency Conditions for Constrained Minima	39
3.2	General Statement of Interior Point Minimization Algorithms and Their Intuitive Basis	42
3.3	Convergence Proofs for Interior Point Algorithms	45
4	EXTERIOR POINT UNCONSTRAINED MINIMIZATION TECHNIQUES	53
4.1	General Statement of Exterior Point Algorithms and Their Intuitive Derivation	53
4.2	Convergence Theorem for Exterior Point Algorithms	57
4.3	Mixed Interior Point–Exterior Point Algorithms	59
4.4	Generalized Interior and Exterior Point Method	65
4.5	A Hierarchy of Penalty Functions	68

5	EXTRAPOLATION IN UNCONSTRAINED MINIMIZATION TECHNIQUES	72
5.1	Trajectory Analysis for Interior Point Techniques	72
5.2	Analysis of Isolated Trajectory	76
5.3	Analysis of Isolated Trajectory of Exterior Point Algorithm	82
5.4	Trajectory Analysis in Mixed Interior Point–Exterior Point Algorithms	84
6	CONVEX PROGRAMMING	86
6.1	Convexity—Definitions and Properties	87
6.2	Convex Programming—Theory	89
6.3	Solution of Convex Programming Problems by Interior Point Unconstrained Minimization Algorithms	94
6.4	Solution of Convex Programming Problem by Exterior Point Unconstrained Minimization Algorithms	102
6.5	Additional Results for the Convex Analytic Problem	110
7	OTHER UNCONSTRAINED MINIMIZATION TECHNIQUES	113
7.1	Using Weighted Penalty Functions	113
7.2	Q -Function Type Interior Point Unconstrained Minimization Algorithms	121
7.3	Continuous Version of Interior Point Techniques	126
7.4	Dual Method for Strictly Convex Problems	130
7.5	Generalized Lagrange Multiplier Technique for Resource Allocation Problems	137
7.6	Solution of Constrained Problem by a Single Unconstrained Minimization	143
7.7	Combined Unconstrained-Simplicial Algorithms	145
7.8	Gradient Projection Method	149
8	COMPUTATIONAL ASPECTS OF UNCONSTRAINED MINIMIZATION ALGORITHMS	156
8.1	Introduction—Summary of Computational Algorithm	156
8.2	Minimizing an Unconstrained Function	157
8.3	Minimizing the W Function for Convex Programming Problems with Special Structure	178
8.4	Acceleration by Extrapolation	188
8.5	Other Algorithmic Requirements	191
