

Correction to “Notch and cancer: a double-edged sword”

**by U. Koch and F. Radtke, CMLS 64, 2746–2762 (2007),
DOI: 10.1007/s00018-007-7164-1**

It has escaped our attention that in the review article “Notch and cancer: a double-edged sword” by U. Koch and F. Radtke, published in CMLS 64, 2746–2762 (2007), the proper acknowledgment for Figure 1 was missing. The Figure is a modification from figure 2 in the article “The Notch ‘gospel’ – Workshop on Notch Signalling in Development and Cancer” by F. Radtke, F. Schweisguth and W. Pear, EMBO reports 6, 1120–1125 (2005), which in turn was based on a figure in the review “Notch regulation of lymphocyte development and function” by F. Radtke, A. Wilson, S. J. C. Mancini and H. R. MacDonald, Nature Immunology 5, 247–253 (2004).
