

Nonlinear Equations
Bisection and Inverse Linear Interpolation
Newton's Method
The Fixed Point Theorem
Quadratic Convergence of Newton's Method
Variants of Newton's Method
Brent's Method
Effects of Finite Precision Arithmetic
Newton's Method for Systems
Broyden's Method
Linear Systems
Gaussian Elimination with Partial Pivoting
The LU Decomposition
The LU Decomposition with Pivoting
The Cholesky Decomposition
Condition Numbers
The QR Decomposition
Householder Triangularization and the QR Decomposition
Gram-Schmidt Orthogonalization and the QR Decomposition
The Singular Value Decomposition
Iterative Methods
Jacobi and Gauss-Seidel Iteration
Sparsity
Iterative Refinement
Preconditioning
Krylov Space Methods
Numerical Eigenproblems
Polynomial Interpolation
Lagrange Interpolating Polynomials
Piecewise Linear Interpolation
Cubic Splines
Computation of the Cubic Spline Coefficients
Numerical Integration
Closed Newton-Cotes Formulas
Open Newton-Cotes Formulas and Undetermined Coefficients
Gaussian Quadrature
Gauss-Chebyshev Quadrature
Radau and Lobatto Quadrature
Adaptivity and Automatic Integration
Romberg Integration

Differential Equations
Numerical Differentiation
Euler's Method
Improved Euler's Method
Analysis of Explicit One-Step Methods
Taylor and Runge-Kutta Methods
Adaptivity and Stiffness
Multi-Step Methods
Nonlinear Optimization
One-Dimensional Searches
The Method of Steepest Descent
Newton Methods for Nonlinear Optimization
Multiple Random Start Methods
Direct Search Methods
The Nelder-Mead Method
Conjugate Direction Methods
Approximation Methods
Linear and Nonlinear Least Squares
The Best Approximation Problem
Best Uniform Approximation
Applications of the Chebyshev Polynomials
Afterword
Bibliography
