Contents

CHAPTER 1	INTERPOLATION	1
1.	Lagrange Interpolation, 2	
2.	Hermite Interpolation, 12	
3.	Splines, 12	
4.	Tension Spline, 20	
5.	Parametric and Multidimensional Interpolation, 21	
	Problems, 23	
CHAPTER 2	INTEGRATION	24
1.	Newton-Cotes Formulas, 25	
2.	Richardson Extrapolation, 30	
3.	Romberg Integration, 32	
4.	Adaptive Quadrature, 37	
5.	Gauss Quadrature, 41	
6.	Singularities, 47	
7.	Concluding Remarks, 48	
	Problems, 49	
CHAPTER 3	ORDINARY DIFFERENTIAL EQUATIONS	50
1.	Numerical Differentiation, 51	
2.	Euler's Method, 57	
3.	Stability, 60	
4.	Backward or Implicit Euler Method, 69	
5.	Accuracy Improvement, 72	
6.	Predictor-Corrector and Runge-Kutta Methods, 76	
7.	Multistep Methods, 84	
8.	The Choice of Method and Automatic Error Control, 92	
9.	Systems of Equations—Stiffness, 95	

10. Systems of Equations—Inherent Instability, 104
11. Boundary Value Problems: I. Shooting, 105
12. Boundary Value Problems: II. Direct Methods, 110
13. Boundary Value Problems: III. Higher Order Methods, 115
14. Boundary Value Problems: IV. Nonuniform Grids, 120
15. Boundary Value Problems: V. Finite Element Methods, 124
16. Boundary Value Problems: VI. Eigenvalue Problems, 126

CHAPTER 4. PARTIAL DIFFERENTIAL EQUATIONS

135

1. Parabolic PDEs: I. Explicit Methods, 138
2. Parabolic PDEs: II. The Crank–Nicolson Method, 147
3. Parabolic PDEs: III. The Dufort–Frankel Method, 152
4. Parabolic PDEs: IV. The Keller Box Method and Higher Order Methods, 155
5. Parabolic PDEs: V. Two and Three Dimensions—Alternating Direction Implicit (ADI) Methods, 158
6. Parabolic PDEs: VI. Other Coordinate Systems and Nonlinearity, 167
7. Elliptic PDEs: I. Finite Differencing, 171
8. Elliptic PDEs: II. Jacobi Iteration Method, 177
9. Elliptic PDEs: III. Gauss-Seidel Method, 184
10. Elliptic PDEs: IV. Line Relaxation Method, 187
11. Elliptic PDEs: V. Successive Overrelaxation (SOR) Method, 189
12. Elliptic PDEs: VI. Alternating Direction Implicit (ADI) Methods, 197
13. Elliptic PDEs: VII. Finite Element Methods, 202
14. Discrete Fourier Transforms, 207
15. The Fast Fourier Transform (FFT) Algorithm, 212
16. Elliptic PDEs: VIII. Fourier Methods, 216
17. Elliptic PDEs: IX. Boundary Integral Methods, 218
18. Hyperbolic PDEs: I. Review of Theory, 221
19. Hyperbolic PDEs: II. Method of Characteristics, 224
20. Hyperbolic PDEs: III. Explicit Methods, 234
21. Hyperbolic PDEs: IV. Implicit Methods, 241
22. Hyperbolic PDEs: V. Splitting Methods, 244

APPENDIX A. SOLUTION OF TRIDIAGONAL SYSTEMS

253

APPENDIX B. THE NEWTON–RAPHSON METHOD
