SECTION I

1 The Basics (math, waves, etc.) for the Nonphysical Scientist 3

1.1 General Properties of Waves and Coordinates 4
1.2 Trigonometry 6
1.3 Imaginary Numbers 7
1.4 The Exponential *e* 8
1.5 Infinite Series 10
1.6 Differentiation 11
1.7 Integration 14
1.8 Differential Equations 15
1.9 Vectors and Scalars 16
1.10 Unit Vector 17
1.11 Scalar and Vector Fields 18

1.12 Matrices and Linear Algebra 18
1.13 Waves 19
1.14 Combining Waves of Two Wavelengths 21
1.15 Fourier Series and Integrals 23
1.15.1 Fourier Series 24
1.15.2 Fourier Integral 26
1.16 Dirac Delta Function 27
1.17 Miscellaneous Basic Physics 27
References 28
Appendix 1-1 29

2 Light and Electromagnetic Waves 31

2.1 General 32
2.2 Electromagnetic Spectrum 32
2.3 Vector Calculus 34
2.3.1 Divergence 34
2.3.2 Curl 34
2.3.3 Gradient 35
2.4 Maxwell's Equations 35
2.4.1 Faraday's Law 36
2.4.2 Gauss's Law for Electrical Fields 38
2.4.3 Gauss's Law for a Magnetic Field 38
2.4.4 Ampere's Law 38
2.5 Polarization 39
2.6 Reflection 42
2.7 Refraction 44
2.8 Optical Components 45
2.9 Lens 45
2.10 Grin Lens 46
2.11 Optical Fiber 47
2.12 Energy Propagation 51
2.13 Doppler Shifts 51
References 51
Appendix 2-1 53

3 Light in Matter 57

3.1 Oscillating Dipole Moment 61
3.2 Dispersion 65
3.3 Absorption 65
3.4 Scattering 66
3.5 Summary 69
References 69

4 Interference, Coherence, Diffraction, and Transfer Functions 71

4.1 Coherence and Interference 71
- 4.1.1 Coherence 72
- 4.1.2 Interferometry and the Michelson Interferometer 74
- 4.1.3 Partial Coherence Using a Source with Continuous Frequencies 78

4.2 Diffraction 80
- 4.2.1 Huygens and Huygens-Fresnel Principle 81
- 4.2.2 Fraunhofer and Fresnel Diffraction 82
- 4.2.3 Diffraction Limited 83

4.3 Convolution and Transfer Functions 85
- 4.3.1 Transfer Function 88

References 91
Appendix 4-1 93

SECTION II

5 Optical Coherence Tomography Theory 97

5.1 General 98
5.2 Time Domain OCT (TD-OCT) 98
- 5.2.1 Interferometry with a Monochromatic Source 98
- 5.2.2 Low Coherence Interferometry with OCT 101
- 5.2.3 Determination of Axial Resolution 106
- 5.2.4 Transfer Function 112

5.3 Dispersion 116
5.4 Lateral Resolution 123
- 5.4.1 Light Beam 123
- 5.4.2 Paraxial Wave Equation 124
- 5.4.3 Relationship between the Paraboloidal and Gaussian Wave 125
- 5.4.4 The Gaussian Wave 125
- 5.4.5 Properties of a Gaussian Wave 126
- 5.4.6 Important Points of a Gaussian Beam Relevant to OCT 127
- 5.4.7 Speckle 129

5.5 Spectral Radar or Fourier Domain OCT (FD-OCT) 130
5.6 Swept Source (SS-OCT) 134
- 5.6.1 The Resolution 136

References 137
Bibliography 139
Appendix 5-1 141

6 Optoelectronics and Optical Components 147

6.1 General 148
6.2 Sources 148
6.2.1 Semiconductor Sources 148
6.2.2 Femtosecond Lasers 149
6.2.3 Doped Fiber Amplifiers 149
6.2.4 Wavelength Scanning 150
6.3 Interferometers 150
6.4 Delay Lines 151
6.4.1 Galvonometer Retroreflector 152
6.4.2 Piezoelectric Fiber Stretcher 152
6.4.3 Grating Based Delay Lines 153
6.4.4 Rotating Elements 156
6.5 Detectors 156
6.5.1 CCD 156
6.6 Detection Electronics 157
6.6.1 TD-OCT 158
6.6.2 FD-OCT 158
6.6.3 A-D Conversion/Frame Grabbers 160
6.7 Light Delivery Devices 160
6.7.1 Rotational Catheters/Guidewires 160
6.7.2 Translational Devices 163
6.7.3 Forward Imaging 164
6.7.4 MEMS 164
References 165
Appendix 6-1 169

7 Noise and System Performance with TD-OCT and SD-OCT 175

7.1 Introduction 175
7.2 Definitions 177
7.3 Noise 178
7.3.1 Overview 178
7.4 Noise in CCD versus Photodiode 182
7.5 A-D Conversion in SD-OCT and TD-OCT 184
7.6 Embodiment and Theory 184
7.6.1 TD-OCT 184
7.6.2 SD-OCT 186
7.6.3 Detector Array Signal Integration 188.
7.6.4 SS-OCT 190
7.7 Conclusion 191
References 193

8 Polarization and Polarization Sensitive OCT 197

8.1 General 198
8.2 Polarization Properties of Tissue 198
8.3 Collagen 199
8.4 Single Detector PS-OCT 204
8.4.1 SDPS-OCT Theoretical Model 207
8.4.2 Simulations with Layered Birefringent Phantoms 215
8.4.3 Varying Differential Group Index (Layer Birefringence) 215
8.4.4 Different Intra-Layer Medium 215
8.4.5 Varying Layer Concentration 217
8.4.6 Periodical Rotation of Polarization State in Reference Arm 217
8.4.7 Use of the Fast Fourier Transform 217
8.4.8 SDPS-OCT of Human Tissue 223
8.5 Dual Detector PS-OCT 228
8.5.1 Measurement of the Stokes Vector, Mueller Matrix, and Poincare's Sphere 234
References 237
Appendix 8-1 241

9 Adjuvant Techniques: Absorption Spectroscopy, Contrast Probes, Phase Contrast, Elastography, and Entangled Photons 245

9.1 General 246
9.2 Absorption Spectroscopy 246
9.2.1 Absorption 246
9.2.2 Intrinsic Absorption 247
9.2.3 Dual Source 247
9.2.4 Single Source Same Frequency (Spectroscopic OCT) 247
9.2.5 Second Harmonic Generation 248
9.2.6 OCT Dyes/Probes 250
9.3 Elastography 252
9.3.1 Basic Concepts 252
9.3.2 Ultrasound Elastography 252
9.3.3 OCT Elastography 253
9.3.4 Limitations of the Elastography Techniques 254
9.4 Differential Phase Measurements 256
9.4.1 Embodiment 256
9.4.2 Limitations 262
9.5 Entangled Photons 262
9.5.1 General 263
9.5.2 Entangled States Generation 263
9.5.3 Interference Experiments 264
9.5.4 Ghost Imaging 267

9.5.5 Entanglement and OCT 269
9.6 Conclusion 272
References 272

10 Doppler Optical Coherence Tomography
Bin Liu PhD 277

10.1 The Principle of Doppler OCT 278
10.1.1 Doppler Shift and Laser Doppler Velocimetry 278
10.1.2 Optical Signal Evolution in Doppler OCT 281
10.1.3 Interferogram Detection in Doppler OCT 285
10.2 Signal Processing in Doppler OCT 289
10.2.1 Signal Processing in Time Domain Doppler OCT 290
10.2.2 Signal Processing in Spectral Domain Doppler OCT 297
10.3 Applications of Doppler OCT 298
References 300

11 Digital Image Processing Techniques for Speckle Reduction, Enhancement, and Segmentation of Optical Coherence Tomography (OCT) Images
Jadwiga Rogowska PhD 305

11.1 Introduction 306
11.2 Speckle Reduction Techniques 307
11.2.1 Mean, Median, and Hybrid Median Filters 308
11.2.2 Adaptive Filtering 309
11.2.3 Other Techniques 312
11.2.4 Evaluation of Image Enhancement Results 313
11.3 Image Segmentation Techniques 314
11.3.1 Thresholding 315
11.3.2 Region Growing 317
11.3.3 Watershed Algorithm 318
11.3.4 Edge-Based Segmentation Techniques 319
11.3.5 Other Segmentation Techniques 322
11.4 Summary 324
References 325

SECTION III

12 Application of OCT to Clinical Imaging: Introduction 333

12.1 Introduction 334

12.2 Areas Where OCT Shows Promise as a Clinical Imaging Device 334
12.2.1 When Biopsy Cannot Be Performed 334
12.2.2 Where Sampling Errors with Conventional Biopsy Are Likely 335
12.2.3 Guiding Surgical and Microsurgical Procedures 335
12.2.4 Three-Dimensional Reconstruction of *In Vitro* Pathology 335
12.3 Factors That Influence Decisions on the Clinical Relevance of OCT 336
12.4 OCT Imaging of Human Tissue 337
12.5 Methods for Validating the Structure in OCT Images 339
12.5.1 General 339
12.5.2 Histopathology 339
12.5.3 Immunohistochemistry 343
12.5.4 Enzymatic Assay 343
12.5.5 High-Performance Liquid Chromatography 345
12.5.6 Scanning Electron Microscopy 345
12.6 Animal Models 346
12.6.1 Justification of Need for Animals 346
12.6.2 Justification for the Species 347
12.6.3 Justification of the Total Number of Animals 347
12.6.4 Drugs and Their Dosages Used for Anesthesia and Euthanasia 347
12.6.5 Will the Animal Experience Discomfort and Is a Survival Model Utilized? 348
12.6.6 Use of Experienced Personnel 348
12.6.7 Registration 348
12.6.8 Example Rat Protocol 348
12.7 Statistical Analysis 349
12.8 Role of Human Perception on Image Interpretation 350
12.9 Conclusion 351
References 351

13 Other Technologies 353

13.1 General 353
13.2 Structural Imaging 354
13.2.1 Confocal Microscopy 354
13.2.2 High Frequency Ultrasound 356
13.2.3 Magnetic Response Imaging 358
13.2.4 Computer Tomography 359
13.2.5 Light-Scattering Spectroscopy 361
13.3 Spectroscopic Techniques 361
13.3.1 Fluorescence 362
13.3.2 Two-Photon Laser Scanning Microscopy 365
13.3.3 Near Infrared Absorption Spectroscopy 366
13.3.4 Raman Scattering 367
References 368

14 Introduction to Clinical Research Design and Analysis
Kelly Jenkins MD, PhD and Kimberlee Gauvreau ScD 369

14.1 Elements of Study Design 371
14.1.1 Choosing a Primary Research Question 371
14.1.2 Descriptive versus Analytical Studies 371
14.1.3 Threats to Validity 372
14.1.4 Random Variability 372
14.1.5 Bias 373
14.1.6 Confounding 374
14.1.7 Effect Modification 374
14.1.8 Evaluating Threats to Validity 376
14.2 Choice of Study Design 376
14.2.1 Randomized, Blinded, Controlled Clinical Trials 376
14.3 Other Study Designs 378
14.3.1 Longitudinal Studies 379
14.3.2 Cohort Studies 379
14.3.3 Cross-Sectional Studies 380
14.3.4 Case-Control Studies 380
14.3.5 Nested Case-Control Studies 381
14.3.6 Secondary Data 381
14.3.7 Diagnostic Test Evaluation 381
14.4 Elements of Data Analysis 382
14.4.1 Types of Numerical Data 382
14.4.2 Summarizing and Describing Data 383
14.4.3 Variability in Data 384
14.4.4 Making an Inference from Data 385
14.4.5 Common Statistical Tests for Comparing Two Groups 386
14.4.6 Power and Sample Size 387
14.4.7 Evaluating Relationships among Continuous Measurements 389
14.4.8 Multivariate Models 389
References 389
Appendix 14-1 391

15 OCT in Cardiovascular Medicine 393

15.1 General 394
15.2 Acute Coronary Syndromes 394
15.2.1 General 394
15.2.2 Epidemiology 395
15.2.3 Coronary Circulation 397
15.2.4 Classification of Plaque 398

15.2.5 Unstable Plaque Histopathology 400
15.2.6 Triggers of Plaque Rupture 401
15.2.7 Interventions 403
15.2.8 Imaging Modalities 409
15.2.9 OCT for Coronary Imaging 414
15.2.10 Limitations 420
15.2.11 Current State of Intravascular OCT Imaging 427
15.2.12 Current OCT Markers for *In Vivo* Studies 427
15.2.13 Potential Additional OCT Markers 430
15.2.14 Technological Investigations 434
15.2.15 Other Coronary Areas 434
15.3 Stroke 434
15.3.1 General 434
15.3.2 Epidemiology 435
15.3.3 Risk Factors 435
15.3.4 Cerebral Circulation 436
15.3.5 Carotid Plaque 436
15.3.6 Imaging Approaches 438
15.3.7 Treatment 439
15.4 Pulmonary Hypertension 440
15.5 Atrial Fibrillation 443
15.6 Conclusion 445
References 446

16 OCT in the Musculoskeletal Disease 459

16.1 Osteoarthritis 460
16.1.1 General 460
16.1.2 Cartilage Structure 460
16.1.3 Osteoarthritis Cartilage 461
16.1.4 Knee Anatomy 461
16.1.5 Current Imaging Modalities 462
16.1.6 Serum and Urine Markers 463
16.1.7 Chondroprotection and Cartilage Repair 464
16.1.8 *In Vitro* and *In Vivo* Human Data 466
16.2 Current OA Animal Models 473
16.2.1 Canine Anterior Cruciate Ligament Transection Model 474
16.2.2 Rabbit Partial Medial Meniscectomy 474
16.2.3 Rabbit ACLT 474
16.2.4 Guinea Pigs 475
16.2.5 Rats 475
16.2.6 Mice 475
16.2.7 Assessing Cartilage OA with OCT in the Rat 475

16.3 Tendon/Ligaments 481
16.3.1 General Ligaments and Tendons 481
16.3.2 OCT Imaging of Tendons and Ligaments 482
16.3.3 Achilles Tendinopathy 483
16.3.4 Shoulder Pain 484
16.4 Other Potential Applications 486
16.5 Conclusion 488
References 488

17 OCT in Oncology 493

17.1 General 494
17.1.1 Epidemiology of Cancer 494
17.1.2 Need for a Diagnostic Imaging Technique 495
17.1.3 Epithelium 495
17.2 Esophageal Cancer 496
17.2.1 General 496
17.2.2 Adenocarcinoma of the Esophagus 497
17.2.3 Squamous Cell Carcinoma 505
17.3 Gastric Cancer 508
17.3.1 Epidemiology 508
17.3.2 Risk Factors 509
17.3.3 Staging 510
17.3.4 Diagnosis 510
17.4 Bladder Cancer 512
17.4.1 Epidemiology 512
17.4.2 Staging 512
17.4.3 Diagnosis 513
17.5 Lung Cancer 514
17.5.1 Epidemiology 514
17.5.2 Risk Factors 516
17.5.3 Histopathology 517
17.5.4 Staging System 517
17.5.5 Treatment 518
17.5.6 Screening 519
17.6 Sclerosing Cholangitis and Cholangiocarcinoma 522
17.6.1 Epidemiology 522
17.6.2 Diagnosis 524
17.7 Cervical Cancer 526
17.7.1 Epidemiology/Histology 526
17.7.2 Staging 527
17.7.3 Diagnosis 527
17.7.4 Treatment 531

17.8 Other Potential Applications 532
17.8.1 General 532
17.8.2 Colon Cancer 532
17.8.3 Postmenopausal Bleeding and Endometrial Carcinoma 532
17.8.4 Breast Cancer 533
17.8.5 Skin Cancer 533
17.8.6 Oral and Pharyngeal Cancers 534
17.8.7 Assessing Pathological Samples 534
17.9 Conclusion 534
References 534
Appendix 17-1 543

18 Other Applications and Conclusions 547

18.1 General 548
18.2 Dentistry 548
18.2.1 General 548
18.2.2 Anatomy and Histology 548
18.2.3 Dental Caries 551
18.2.4 Minimally Invasive Treatments 553
18.2.5 Diagnosing Caries 554
18.2.6 OCT and Dental 555
18.2.7 Limitations 557
18.3 Prostate Surgical Guidance 558
18.3.1 General 558
18.3.2 Benign Prostatic Hypertrophy 559
18.3.3 Treatment 560
18.3.4 OCT and BPH 562
18.4 Nerve Repair 563
18.4.1 General 563
18.4.2 Repair 566
18.4.3 Diagnostics 567
18.4.4 OCT and Nerve Repair 567
18.5 Vascular Repair 568
18.5.1 General 568
18.5.2 Vessel Re-anastomosis 568
18.5.3 OCT and Arterial Repair 570
18.6 Neurosurgery 571
18.6.1 General 571
18.6.2 Brain Tumors 571
18.6.3 Imaging Brain Tumors 573
18.6.4 OCT and Brain Tumor Resection 574

18.7 The Role of OCT in Assessing Subfertility 578
18.7.1 General 578
18.7.2 The Oviduct 580
18.7.3 Oviduct Pathology 580
18.7.4 Infertility Testing 581
18.7.5 Treatment 582
18.7.6 OCT and Imaging the Fallopian Tubes 583
18.8 Conclusion 584
References 585
