1	Introduction to Photonic Crystals	1
1.1	Introduction: What are Photonic Crystals?	1
1.2	Photonic Crystal Lattice	3
1.3	Basic Terminology	5
1.4	Historical Notes	6
1.5	Problems and Questions	12
2	Fundamentals of Wave Optics	13
2.1	What is an Optical Medium? – Theoretical Models	13
2.1.1	Wave Optics	14
2.1.2	Geometric Optics	15
2.2	Wave Propagation: Maxwell’s Equations	15
2.3	Wave Equation in Vacuum	18
2.4	Waves in Dielectric Media	20
2.4.1	Refractive Index of Dielectric Medium	21
2.4.2	Lossy Dielectric Medium	21
2.5	Group Velocity	23
2.6	Summary	24
2.7	Problems and Questions	25
3	Fundamentals of Computation of Photonic Crystal Characteristics	27
3.1	Computation of the Field Distribution in One-Dimensional (1D) Photonic Crystal	27
3.2	Applications of the Field Distribution Computation	32
3.3	Summary	35
3.4	MATLAB Program Reflectance Spectrum Computation of 1D PhC	35
3.5	Problems and Questions	39

4	Band Structure Computation of 1D Photonic Crystals	41
4.1	Problem Definition	41
4.2	Unit Cell	44
4.3	Lattice Vectors	45
4.4	Reciprocal Lattice	46
4.5	Reciprocal Lattice Vectors and Brillouin Zone	48
4.6	Band Structure Computation	50
4.7	Eigen-Values and Eigen-Vectors of a Matrix	53
4.8	Computation Results	54
4.9	Fourier Expansion of the Dielectric Function	55
4.10	The Eigen-Value Problem for Electric Field	57
4.11	Algorithm of PWE Method	58
4.12	Off-Axis Band Structure of 1D PhC	58
4.13	Summary	61
4.14	MATLAB Program for 1D PhC Band Structure Computation by Means of PWE Method	61
4.15	Problems and Questions	65
5	Band Structure Computation of 2D and 3D Photonic Crystals	67
5.1	Problem Definition for 3D Photonic Crystal	67
5.2	Problem Definition for 2D Photonic Crystal	70
5.3	Fourier Expansion of the Dielectric Function	72
5.3.1	Dielectric Spheres	72
5.3.2	Dielectric Rods	73
5.3.3	Fourier Expansion Coefficient of an Arbitrary Dielectric Function	74
5.3.4	Validation of the Fourier Expansion	76
5.4	Wave Vectors Set	78
5.5	Reciprocal Lattice Vectors Set	79
5.6	Results of the Band Structure Computation	80
5.7	Analysis of the Band Structure	81
5.8	Photonic Band Gap Maps	82
5.9	Photonic Density of States	84
5.10	Off-Plane Band Structure for 2D Photonic Crystal	85
5.11	Band Structure Computation of the PhC with Defect	88
5.12	Experimental Verification of the PWE Method	90
5.13	Advantages and Disadvantages of the Plane Wave Expansion Method	93
5.14	Summary	94
5.15	MATLAB Program for Band Structure Computation of 2D PhC by Means of PWE Method	94
5.16	Problems and Questions	100

6	Finite-Difference Time-Domain Method for PhC	
	Devices Modeling	103
6.1	Problem Formulation for the Field Distribution Computation: Finite-Difference Time-Domain Method	103
6.2	Maxwell's Equations Discretization	104
6.3	Definition of the Dielectric Function	108
6.4	Definition of Initial and Boundary Conditions	109
6.4.1	Initial Conditions	109
6.4.2	Conditions at the Boundaries of Computation Region	109
6.5	FDTD Method Stability	113
6.6	FDTD Method Application for Experimentally Obtained PhC with Hexagonal Lattice Structure	113
6.7	Summary	117
6.8	Problem Solution Example	117
6.9	MATLAB Program for Computation of Field Distribution in Nonuniform Optical Medium	121
6.10	Problems and Questions	125
7	Photonic Crystal Optical Fibers	127
7.1	Photonic Crystal Fibers: New Class of Optical Waveguides ...	127
7.2	Modes in Conventional Optical Fibers	129
7.3	Solution of Helmholtz Equation in Axial-Symmetric System ...	130
7.4	Hybrid Modes in Fibers and Mode Parameters	133
7.4.1	Fundamental Mode Distribution in Weakly Guiding Fibers	135
7.4.2	Effective Mode Index and Cutoff Conditions	135
7.4.3	bV Diagram	136
7.5	Single-Mode Fibers	138
7.5.1	Single-Mode Condition	138
7.6	Microstructured Fibers	139
7.6.1	Computation of Eigen-States of Microstructured Fibers	140
7.6.2	Computation of the Mode Field Distribution in Microstructured Fibers	142
7.7	Index-Guided Microstructured Fibers	144
7.7.1	Effective Refractive Index of the PhC-Fiber	146
7.7.2	Step-Index Fiber Model of the Index-Guided PhC Fibers	146
7.7.3	Numerical Aperture of the PhC Fiber	147
7.7.4	Macro-Bending Losses	148
7.8	Photonic Band Gap Fibers	150

7.9	Band Gap Diagram of the PBG Fiber	152
7.9.1	Coupling Losses of the PhC Fiber	153
7.10	Summary	154
7.11	MATLAB Program for Computation of the Fundamental Mode Distribution in Microstructured Fiber by Means of Plane Wave Expansion Method	155
7.12	Problems and Questions	161
8	FDTD Method for Band Structure Computation	163
8.1	Problem Definition	163
8.2	Computation Region Definition	164
8.3	Boundary Conditions Definition	165
8.4	Initial Conditions	166
8.5	Structure Response Analysis	167
8.6	Summary	169
8.7	MATLAB Program for Band Structure Computation of 1D PhC by Means of FDTD Method	170
8.8	Problems and Questions	175
9	Photonic Crystal Waveguides	177
9.1	Conventional Planar Waveguides	177
9.1.1	Guided Modes in a Slab	178
9.1.2	Characteristic Equations	181
9.2	Weakly Guiding Slabs	182
9.2.1	Graphical Solution of Characteristic Equation	182
9.2.2	bV Diagram: Modal Field Distribution in a Slab Waveguide	183
9.3	Kinds of PhC Waveguides	185
9.4	PWE Method for PhC Waveguides	186
9.5	Analysis of the Dispersion Diagram	191
9.6	FDTD Modeling of the PhC Waveguides	194
9.7	Summary	196
9.8	MATLAB Program for Computation of Dispersion Diagrams of 2D PhC Waveguide	197
9.9	Problems and Questions	203
10	Application for Design and Simulation of Optical WDM Demultiplexer	205
10.1	Problem Formulation	205
10.2	Band Structure Analysis	206
10.2.1	Waveguide Design	207
10.2.2	PBG Maps Design	208
10.2.3	Photonic DOS Maps Design	211
10.3	Temporal Response of DEMUX	214
10.4	Summary	215

10.5 MATLAB Program for the Computation of the PBG Map of PhC by Means of PWE Method	216
10.6 Problems and Questions	224
