CONTENTS

	PREFACE		**xvii**
	INTRODUCTION		**xxi**
1	**THE FREE ELECTRON PICTURE**		**1**
	1.1	Atoms in Solids	1
	1.2	The Drude Model	2
	1.3	Quantum Mechanics and Electrons	12
	1.4	The Density of States	16
	1.5	Filling of Electronic States	18
	1.6	For the Technologist in You	22
	1.7	Problems	25
	1.8	References	26
2	**PERIODICITY: CRYSTAL STRUCTURES**		**28**
	2.1	Periodicity of a Crystal	28
	2.2	Basic Lattice Types	32
	2.3	The Reciprocal Lattice	40
	2.4	Artificial Structures: Superlattices	47
	2.5	Surfaces: Ideal Versus Real	50
	2.6	Interfaces	53
	2.7	For the Technologist in You	55
	2.8	Problems	58
	2.9	References	60
3	**WAVE DIFFRACTION IN PERIODIC STRUCTURES**		**61**
	3.1	Bragg's Law	62
	3.2	Laue Conditions	64
	3.3	Diffraction from Random Scatterers	66
	3.4	Diffraction Methods	74
	3.5	Temperature Dependent Effects	78
	3.6	For the Technologist in You	84
	3.7	Problems	87
	3.8	References	89

4	**ELECTRONS IN PERIODIC STRUCTURES**		**91**
	4.1	Periodicity and Bloch's Theorem	92
	4.2	Significance of $\boldsymbol{k}$: Crystal Momentum	97
	4.3	Electron States in a Weak Periodic Potential	100
	4.4	A Simple Description of Band Filling	115
	4.5	Holes in Semiconductors	117
	4.6	For the Technologist in You	120
	4.7	Problems	124
	4.8	References	125
5	**SEMICONDUCTOR BANDSTRUCTURE**		**126**
	5.1	The Tight Binding Method	127
	5.2	The Spin–Orbit Coupling	140
	5.3	Symmetry of Conduction Bandedge States	146
	5.4	Symmetry of Valence Bandedge States	147
	5.5	The Orthogonalized Plane Wave Method	149
	5.6	The Pseudopotential Method	150
	5.7	The $\boldsymbol{k} \cdot \boldsymbol{p}$ Method	151
	5.8	Selected Bandstructures	159
	5.9	Density of States in Semiconductors	169
	5.10	For the Technologist in You	171
	5.11	Problems	174
	5.12	References	176
6	**BANDSTRUCTURE MODIFICATIONS: ALLOYS AND HETEROSTRUCTURES**		**178**
	6.1	Bandstructure of Semiconductor Alloys	179
	6.2	Bandstructure Modifications by Heterostructures	190
	6.3	Bandstructure in Quantum Wells	194
	6.4	Bandstructure in Superlattices	201
	6.5	For the Technologist in You	210
	6.6	Problems	213
	6.7	References	215
7	**BANDSTRUCTURE MODIFICATIONS THROUGH STRAIN**		**218**
	7.1	Critical Thickness	218
	7.2	Elastic Strain	221
	7.3	The Elastic Constants	223
	7.4	Strain Tensor in Lattice Mismatched Epitaxy	226
	7.5	Deformation Potential Theory	228
	7.6	Bandgap Alteration	246
	7.7	Built-in Electric Fields in Strained Quantum Wells	246
	7.8	For the Technologist in You	248

	7.9	Problems	251
	7.10	References	252
8	**DOPING OF SEMICONDUCTORS**		**254**
	8.1	Intrinsic Carrier Concentration	254
	8.2	The Effective Mass Equation for Shallow Levels	258
	8.3	Extrinsic Carriers	266
	8.4	Population of Impurity Levels, Carrier Freeze-out	267
	8.5	Heavily Doped Semiconductors	270
	8.6	Modulation Doping	274
	8.7	Hydrogenic Impurities in Quantum Wells	276
	8.8	For the Technologist in You	280
	8.9	Problems	282
	8.10	References	283
9	**LATTICE VIBRATIONS: PHONONS**		**285**
	9.1	Considerations for Crystal Binding	286
	9.2	Crystal Vibrations for a Monatomic Basis	292
	9.3	Crystal Vibrations for a Diatomic Basis	296
	9.4	Phonons: Quantization of Lattice Vibrations	299
	9.5	Polar Optical Phonons	301
	9.6	Optical Phonon–Photon Interactions	304
	9.7	Phonon Statistics	309
	9.8	Models for Phonon Energy	312
	9.9	Phonon Dispersion Measurement Techniques	315
	9.10	Phonons in Heterostructures	318
	9.11	For the Technologist in You	320
	9.12	Problems	321
	9.13	References	322
10	**TRANSPORT: GENERAL FORMALISM**		**324**
	10.1	Relaxation Times	326
	10.2	The Boltzmann Transport Equation	327
	10.3	Averaging Procedures	336
	10.4	Mobility Measurement Techniques	338
	10.5	Hall Mobility	342
	10.6	Solution of the Boltzmann Transport Equation	346
	10.7	For the Technologist in You	353
	10.8	Problems	355
	10.9	References	356
11	**DEFECT AND CARRIER-CARRIER SCATTERING**		**357**
	11.1	Ionized Impurity Scattering	359
	11.2	Alloy Scattering	369
	11.3	Carrier-Carrier Scattering	374

11.4	Auger Processes and Impact Ionization	381
11.5	For the Technologist in You	391
11.6	Problems	393
11.7	References	394
12	**PHONON SCATTERING**	**397**
12.1	General Formalism	397
12.2	Limits on Phonon Wavevectors	403
12.3	Selection Rules for Phonon Scattering	410
12.4	Acoustic Phonon Scattering	411
12.5	Deformation Potential Optical Phonon Scattering	414
12.6	Polar Optical Phonon Scattering	417
12.7	Electron-Plasmon Scattering	424
12.8	Piezoelectric Scattering	425
12.9	Intervalley Scattering	427
12.10	The Polaron	429
12.11	For the Technologist in You	430
12.12	Problems	431
12.13	References	432
13	**THE VELOCITY-FIELD RELATIONS**	**433**
13.1	Low Field Transport	434
13.2	High Field Transport	437
13.3	Monte Carlo Simulation of Carrier Transport	439
13.4	Electron Transport Monte Carlo Calculations	459
13.5	High Field Electron Transport in Si	462
13.6	Hole Transport Monte Carlo Calculations	464
13.7	Balance Equation Approach to High Field Transport	471
13.8	Impact Ionization in Semiconductors	475
13.9	Zener-Bloch Oscillations	480
13.10	For the Technologist in You	484
13.11	Problems	491
13.12	References	492
14	**TRANSPORT IN HETEROSTRUCTURES**	**496**
14.1	Parallel Transport in Quantum Wells and MODFETs	498
14.2	Mobility in a MODFET Quantum Well	505
14.3	High Temperature / High Field Transport	511
14.4	Effect of Strain on Transport	511
14.5	Transport in Quantum Wires	517
14.6	Real Space Charge Transfer	518
14.7	Avalanche Processes in Quantum Well Structures	520
14.8	Quantum Transport	523
14.9	Resonant Tunneling	524

14.10 Tunneling in Heterostructures with Spatially Varying Central Cell Symmetry 530
14.11 Perpendicular Transport in Superlattices 539
14.12 Quantum Interference Effects 541
14.13 Density Matrix Formalism 544
14.14 For the Technoligist in You 549
14.15 References 554

15 INTERACTIONS OF PHOTONS WITH SEMICONDUCTORS 557
15.1 Maxwell Equations, Vector Potential, and Gauge Transformations 559
15.2 Drude-Zener Theory 564
15.3 Optical Modes in Ionic Crystals 567
15.4 Kramers-Kronig Relation 568
15.5 Electrons in an Electromagnetic Field 572
15.6 Selection Rules for Optical Processes 576
15.7 Interband Transitions 578
15.8 Optical Processes in Semiconductor Lasers 586
15.9 Indirect Interband Transitions 595
15.10 Intraband Transitions 599
15.11 For the Technologist in You 604
15.12 Problems 612
15.13 References 613

16 OPTICAL PROPERTIES IN SEMICONDUCTORS: EXCITONIC TRANSITIONS 615
16.1 Excitonic States in Semiconductors 617
16.2 Optical Properties with Inclusion of Excitonic Effects 622
16.3 Excitonic States in Quantum Wells 627
16.4 Excitonic Absorption in Quantum Wells 632
16.5 Exciton Broadening Effects 634
16.6 Modulation of Excitonic Transitions: Quantum Confined Stark Effect 637
16.7 Exciton Quenching 646
16.8 Refractive Index Modulation Due to Exciton Modulation 653
16.9 Strain Induced Electric Fields for Enhanced Optical Modulation 657
16.10 Radiative Recombination from Excitonic States 658
16.11 For the Technologist in You 660
16.12 Problems 665
16.13 References 665

17	**SEMICONDUCTORS IN MAGNETIC FIELDS**	**668**
	17.1 Semiclassical Dynamics of Electrons in a Magnetic Field	670
	17.2 Semiclassical Theory of Magnetotransport	675
	17.3 Quantum Mechanical Approach to Electrons in a Magnetic Field	676
	17.4 The Aharonov-Bohm Effect	683
	17.5 The De Haas-Van Alphen Effect	686
	17.6 The Shubnikov-De Haas Effect	691
	17.7 The Quantum Hall Effect	695
	17.8 Magneto-optics in Landau Levels	701
	17.9 Excitons in Magnetic Field	703
	17.10 Shallow Impurities in Magnetic Fields	707
	17.11 Magnetic Semiconductors	709
	17.12 For the Technologist in You	711
