PART I. LITERATURE REVIEWS: BACKGROUND TO MODERN PIGMENT OCEANOGRAPHY 17

1. Development of pigment methods for oceanography:
SCOR-supported Working Groups and objectives 19
S. W. Jeffrey and R. F. C. Mantoura
2. Introduction to marine phytoplankton and their pigment signatures 37
S. W. Jeffrey and M. Vesik
3. Metabolism and function of photosynthetic pigments 85
R. J. Porra, E. E. Pfündel and N. Engel
4. Application of pigment methods to oceanography 127
S. W. Jeffrey
5. Pigment processes in the sea: a selected bibliography 167
S. W. Jeffrey, C. A. Llewellyn, R. G. Barlow and R. F. C. Mantoura

PART II. EXPERIMENTAL RESULTS OF SCOR WORKING GROUP 78 WORKSHOPS 179

6. Simple procedures for growing SCOR reference microalgal cultures 181
S. W. Jeffrey and J.-M. LeRoi
7. Preparation of chlorophyll standards 207
S. W. Jeffrey
8. Preparation of carotenoid standards 239
D. J. Repeta and T. Bjørnland
9. Evaluation of methods and solvents for pigment extraction 261
S. W. Wright, S. W. Jeffrey and R. F. C. Mantoura

10. Filtration and storage of pigments from microalgae 283
R. F. C. Mantoura, S. W. Wright, S. W. Jeffrey, R. G. Barlow and D. E. Cummings
11. Simple isocratic HPLC methods for chlorophylls and their degradation products 307
R. F. C. Mantoura, R. G. Barlow and E. J. H. Head
12. High-resolution HPLC system for chlorophylls and carotenoids of marine phytoplankton 327
S. W. Wright and S. W. Jeffrey
13. Qualitative and quantitative HPLC analysis of SCOR reference algal cultures 343
S. W. Jeffrey and S. W. Wright
14. Comparison between spectrophotometric, fluorometric and HPLC methods for chlorophyll analysis 361
R. F. C. Mantoura, S. W. Jeffrey, C. A. Llewellyn, H. Claustre and C. E. Morales

PART III. GUIDELINES FOR HPLC SYSTEMS,
SAMPLING AND SELECTING METHODS
FOR PIGMENTS 381

15. Guidelines for selecting and setting up an HPLC system and laboratory 383
S. W. Wright and R. F. C. Mantoura
16. Calibration methods for HPLC 407
R. F. C. Mantoura and D. J. Repeta
17. Guidelines for collection and pigment analysis of field samples 429
S. W. Wright and R. F. C. Mantoura

PART IV. DATA FOR THE IDENTIFICATION
OF 47 KEY PHYTOPLANKTON PIGMENTS 447

S. W. Jeffrey, R. F. C. Mantoura and T. Bjørnland

- IV.1 Preamble: Notes on the use of the Data and Graphics sheets 449
- IV.2 Chlorophyll Data and Graphics sheets 457
- IV.3 Carotenoid Data and Graphics sheets 493
- References 554

PART V. APPENDICES 561

- A Pigment abbreviations used by SCOR WG 78 563
S. W. Jeffrey and R. F. C. Mantoura
- B Structural relationships between algal chlorophylls 566
S. W. Jeffrey
- C Structural relationships between algal carotenoids 572
T. Bjørnland

- D UV-vis spectroscopy of carotenoids 578
T. Bjørnland
- E Chlorophyll and carotenoid extinction coefficients 595
S. W. Jeffrey
- F Spectrophotometric and fluorometric equations in common use in oceanography 597
S. W. Jeffrey and N. A. Welschmeyer
- G Tests of accuracy of spectrophotometric equations for the simultaneous determination of chlorophylls *a*, *b*, *c*₁₊₂ 616
G. F. Humphrey and S. W. Jeffrey
- H Summary of terms and equations used to evaluate HPLC chromatograms 622
S. W. Wright
- I Minimum criteria for identifying phytoplankton pigments 631
S. W. Jeffrey and R. F. C. Mantoura
- J Commercial suppliers of pigments 633
R. F. C. Mantoura, R. G. Barlow and D. J. Repeta
- K HPLC manufacturers and suppliers (international addresses) 635
R. F. C. Mantoura and R. G. Barlow
- L Suppliers of SCOR reference algal cultures 636
S. W. Jeffrey
- M Names and affiliations of SCOR WG 78 members, participants and observers 637
S. W. Jeffrey
