# Polymer Interface and Adhesion

## SOUHENG WU

E. I. du Pont de Nemours & Company Wilmington, Delaware

# Contents

Preface Acknowledgments

## 1. INTERFACIAL THERMODYNAMICS 1

1.1	Formulation of Interfacial Th	hermodynamics 1	
1.2	Work of Adhesion and Work	of Cohesion 4	
1.3	Interfacial and Hydrostatic	Equilibrium 5	
1.4	Effect of Curvature on Vapo	or Pressure and Su	rface
	Tension 7		
1.5	Spreading Pressure and Spr	eading Coefficient	8
1.6	Contact Angle Equilibrium:	Young Equation	11
1.7	Contact Angle Hysteresis	15	
	References 26		

## 2. MOLECULAR INTERPRETATIONS 29

2.1	Microscopic Theories of van der Waals Forces 30
2.2	### ### ### #########################
	Types of Molecular Forces 40
2.3	Approximations for Unlike Molecules 42
2.4	Lennard-Jones Potential Energy Function 44
2.5	Attraction Between Macroscopic Bodies 47
2.6	Macroscopic Theory of van der Waals Forces: The
	Lifshitz Theory 54
	References 62

X

3.	INTERFACIAL AND SURFACE TENSIONS OF POLYMER MELTS AND LIQUIDS 67			
	<ul> <li>3.1 Surface Tensions of Polymer Melts and Liquids 67</li> <li>3.2 Interfacial Tensions Between Polymers 96</li> <li>References 129</li> </ul>			
4.	CONTACT ANGLES OF LIQUIDS ON SOLID POLYMERS 133			
	<ul> <li>4.1 Equilibrium Spreading Pressure 133</li> <li>4.2 Spreading Coefficient 139</li> <li>4.3 Effect of Temperature on Contact Angle 139</li> <li>4.4 Effect of Primary and Secondary Transitions 147</li> <li>4.5 Contact Angle and Heat of Wetting 148</li> <li>4.6 Polarity of Liquids 148</li> <li>4.7 Prediction of Contact Angles 152</li> <li>4.8 Effect of Solute Adsorption on Contact Angle 152</li> <li>4.9 Tabulation of Equilibrium Contact Angle 157</li> <li>4.10 Distortion of Liquid Surfaces: Marangoni Effect 161</li> <li>4.11 Spreading of Partially Submerged Drops 164 References 165</li> </ul>			
5.	SURFACE TENSION AND POLARITY OF SOLID POLYMERS 169.			
	<ul> <li>5.1 Determination of Surface Tension and Polarity 169</li> <li>5.2 Surface Tension and Polarity of Organic Pigments 198</li> <li>5.3 Constitutive Effect on Surface Tension 201</li> <li>5.4 Morphological Effect on Surface Tension 201</li> <li>5.5 Effects of Additives, Polymer Blends, Copolymers, Conformation, and Tacticity on Surface Tension 209</li> <li>References 211</li> </ul>			
6.	WETTING OF HIGH-ENERGY SURFACES 215			
	<ul> <li>6.1 Introduction 215</li> <li>6.2 Spreading on High-Energy Surfaces 219</li> <li>6.3 Effect of Water and Organic Contaminations 222</li> <li>6.4 Kinetics of Surface-Energy Variation 229</li> </ul>

Contents xi

7.	DYNA	AMIC CONTACT ANGLES AND WETTING KINETICS	235
	7.2	Introduction 235 Kinetics of Spontaneous Motion 236 Kinetics of Forced Motion 247 References 254	
8.		RIMENTAL METHODS FOR CONTACT ANGLES INTERFACIAL TENSIONS 257	
	8.1 8.2		
9.	MECH	FICATIONS OF POLYMER SURFACES: HANISMS OF WETTABILITY BONDABILITY IMPROVEMENTS 279	
	9.3 9.4	Flame and Thermal Treatments 296 Plasma Treatments 298 Photochemical Treatments 322 Crystalline Modifications of Polymer Surfaces 323	
10.	ADHE	ESION: BASIC CONCEPT AND LOCUS OF FAILURE	337
		Definitions 337 Basic Concept of Adhesive Bond Strength 338 Locus of Failure 344 References 354	
11.	FORM	MATION OF ADHESIVE BOND 359	
	11.1 11.2 11.3 11.4 11.5	Wetting and Adhesion 360 Diffusion and Adhesion 380	359

References

	12.	WEAK	BOUNDAR	Y LAYERS	449
--	-----	------	---------	----------	-----

12.1	Wools Downdon	v-Laver Theory	449
10.	WEST POULTICIAL	v-Laver Incorv	449

- 12.2 Examples of Weak Boundary Layers 450
- 12.3 Critique of Weak-Boundary-Layer Theory 456 References 460

#### 13. EFFECT OF INTERNAL STRESS ON BOND STRENGTH 465

- 13.1 Shrinkage of a Coating Adhering to a Substrate 467
- 13.2 Free Thickness Contraction in a Butt Joint 470
- 13.3 No Thickness Contraction in a Sandwich Structure 472
- 13.4 No Thickness Contraction in a Long, Narrow Adhesive
   Layer in an Annulus 472
   References 473

#### 14. FRACTURE OF ADHESIVE BOND 475

#### Part I. Fundamentals of Fracture Mechanics 475

- 14.1 Linear Elastic Fracture Mechanics 476
- 14.2 Local Plastic Flow 484
- 14.3 Generalization of Flaw Theory to Viscoelastic Materials: Rivlin and Thomas Theory 486
- 14.4 Properties of Fracture Energy 488

#### Part II. Analysis and Testing of Adhesive Bonds 497

- 14.5 Tensile Tests (Butt Joints) 497
- 14.6 Shear Tests (Lap Joints) 510
- 14.7 Peel Tests (Peel Joints) 530
- 14.8 Cantilever Beam Tests 5
- 14.9 Other Fracture Energy Tests 560 References 563

#### CREEP, FATIGUE, AND ENVIRONMENTAL EFFECTS 571

#### Part I. Creep and Fatigue of Adhesive Joints 571

- 15.1 Creep Fracture 572
- 15.2 Fatigue Fracture 579

Contents xiii

Part II. Environmental Effects 586

15.3 Spontaneous Separation 589

15.4 Effect of Interfacial Chemical Bonds 593

15.5 Stress Corrosion Cracking and Fatigue in Wet Environment 603
 References 609

Appendix I: Calculation of Surface Tension and Its Nonpolar and Polar Components from Contact Angles by the Harmonic-Mean and the Geometric-Mean Methods 613

Appendix II: Unit Conversion Tables 619
