POTENTIAL ENERGY HYPERSURFACES

PAUL G. MEZEY

*Department of Chemistry and Department of Mathematics,
University of Saskatchewan, Saskatoon, Canada S7N 0W0*

ELSEVIER

Amsterdam — Oxford — New York — Tokyo 1987

CONTENTS

FOREWORD	XIII
INTRODUCTION	1
Chapter I THE MOLECULAR ENERGY EXPECTATION VALUE	4
I.1 ENERGY, THE FUNDAMENTAL QUANTUM MECHANICAL OBSERVABLE	4
I.2 THE BORN-OPPENHEIMER APPROXIMATION AND THE CONCEPT OF NUCLEAR GEOMETRY	6
I.3. GENERALIZATIONS OF NUCLEAR COORDINATES	18
I.4 GLOBAL AND LOCAL COORDINATE SYSTEMS AND THE CONCEPT OF NUCLEAR CONFIGURATION SPACE	21
I.4.1 Global cartesian coordinate systems	21
I.4.2 Local internal coordinate systems	27
I.4.3 Symmetry coordinates and normal coordinates of the small amplitude vibrational problem	30
I.4.4 Special global coordinate systems	45
I.4.5 Special purpose coordinate systems for small molecules	47
I.5 INTERSECTIONS OF ENERGY HYPERSURFACES: ADIABATIC AND DIABATIC REPRESENTATIONS	51
Chapter II GEOMETRICAL PROPERTIES OF ENERGY HYPERSURFACES	61
II.1 ENERGY DERIVATIVES: FORCES AND FORCE CONSTANTS	61
II.1.1 The Hellmann-Feynman theorem	61
II.2 MINIMA, SADDLE POINTS AND GENERAL CRITICAL POINTS	66
II.2.1 Classification of critical points	69
II.2.2 Interrelations among critical points: critical point inequalities	77

II.3	MINIMUM ENERGY PATH AND THE INTRINSIC REACTION COORDINATE	81
II.3.1	Steepest descent paths and stationary paths	83
II.3.2	Steepest descent paths and the intrinsic reaction coordinate	86
II.3.3	Symmetry properties of transition structures and steepest descent paths	87
II.3.4	Steepest descent approach to critical points	94
II.4	DIFFERENTIAL GEOMETRY OF ENERGY HYPERSURFACES	98
Chapter III CALCULATION AND REPRESENTATION OF ENERGY HYPERSURFACES		117
III.1	THE HARTREE - FOCK - ROOTHAAN - HALL METHOD FOR THE CALCULATION OF MOLECULAR WAVEFUNCTIONS	117
III.2	THE ELECTRON CORRELATION PROBLEM AND THE CORRELATION ENERGY	143
III.3	CALCULATION OF SEMIEMPIRICAL AND EMPIRICAL POTENTIAL FUNCTIONS	149
III.3.1	Semiempirical Quantum Chemical Methods	150
III.3.2	Molecular Mechanics Method and Empirical Potential Functions	151
III.4	THE FORCE METHOD AND CALCULATION OF HIGHER DERIVATIVES	152
III.5	MINIMUM SEARCH METHODS FOR THE DETERMINATION OF STABLE CHEMICAL SPECIES	155
III.5.1	Non-gradient Methods of Energy Minimization	156
III.5.2	Gradient Methods for Minimum Search	161
III.6	SADDLE POINT SEARCH METHODS FOR THE DETERMINATION OF TRANSITION STRUCTURES	163
III.7	FITTING OF POTENTIAL ENERGY HYPERSURFACES, POLYNOMIALS, SPLINES AND TRIGONOMETRIC FUNCTIONS	170
Chapter IV THE QUANTUM CHEMICAL CONCEPT OF MOLECULES REVISITED		181
IV.1	QUANTIZATION AND CONTINUITY	181
IV.2	WAVE PACKET TOPOLOGY	185
IV.3	THE TOPOLOGY OF NUCLEAR CONFIGURATIONS	191

Chapter V	MOLECULAR TOPOLOGY	198
V.1	THE REDUCED NUCLEAR CONFIGURATION SPACE: METRIC SPACE M	198
V.1.1	An equivalence relation and a general correspondence principle	198
V.1.2	Metric properties of the reduced nuclear configuration space M	204
V.1.3	Continuity of energy hypersurfaces as functions of internal configurations K	215
V.1.4	Reflection properties of the reduced nuclear configuration space M : a tangent criterion	219
V.2	CATCHMENT REGIONS OF POTENTIAL ENERGY HYPERSURFACES: THE REPRESENTATION OF CHEMICAL SPECIES	227
V.2.1	The intuitive concept of catchment regions	227
V.2.2	Relaxation of formal nuclear configurations in the laboratory frame	235
V.2.3	Catchment regions in Euclidean nuclear configuration space 3N_E	236
V.2.4	Catchment regions in the reduced nuclear configuration space M	246
V.2.5	Exciplex and excimer topologies: catchment regions of excited state potential energy hypersurfaces	257
V.3	MANIFOLD THEORY OF POTENTIAL ENERGY SURFACES AND CATCHMENT REGIONS	262
V.3.1	Manifold Theory of a General Nuclear Configuration Space nR	263
V.3.2	Manifold Structure of the Reduced Nuclear Configuration Space M	270
V.3.3	The Number of Chemical Species Along a Hypersurface	280
V.4	POTENTIAL DEFYING CHEMICAL SPECIES	301
V.4.1	The intrinsic kinetic energy along potential energy hypersurfaces	303
V.4.2	The construction of approximate $\Delta E^0(\mathbf{r})$ functionals	308
V.4.3	Local geometric criteria for potential defying chemical species	313
V.4.4	Global topological criteria for potential defying chemical species	319

V.5	THE ROLE OF NUCLEAR CHARGES AND RELATIONS BETWEEN POTENTIAL SURFACES: CONVEXITY THEOREMS IN SPACE wZ	324
V.5.1	The abstract nuclear charge space wZ and the product space ${}^nR \otimes {}^wZ$	327
V.5.2	Level sets of the electronic energy functional in space wZ	329
V.5.3	A simple relation between nuclear charges and potential energy hypersurfaces: a concavity condition for molecular total energies	346
V.6	CATCHMENT REGIONS AND SYMMETRY	364
Chapter VI REACTION TOPOLOGY		369
VI.1	TOPOLOGICAL REACTION PATHS AND QUANTUM CHEMICAL REACTION MECHANISMS	369
VI.2	THE ALGEBRAIC STRUCTURE OF THE COMPLETE SET OF REACTION PATHS	377
VI.2.1	The fundamental groupoid of reaction paths	378
VI.2.2	Tunneling and the extension of the fundamental groupoid of reaction paths into a semigroup	382
VI.3	THE FUNDAMENTAL GROUP OF REACTION MECHANISMS	384
VI.3.1	The fundamental group and fundamental reaction mechanisms	385
VI.3.2	Comparing systems of reaction mechanisms: homomorphisms and isomorphisms of fundamental groups	390
VI.3.3	Generators for the fundamental group of reaction mechanisms	393
VI.3.4	Energy dependence within the family of groups of reaction mechanisms	401
VI.4	THE REACTION GLOBE, THE REACTION POLYHEDRON, AND HOMOLOGY GROUP THEORY OF REACTION MECHANISMS	409
VI.4.1	The construction of the reaction globe $H(F)$ and reaction polyhedron $P(F)$	412
VI.4.2	Chains, cycles, and homology groups of catchment regions	419

	XI
VI.5. QUANTUM CHEMICAL REACTION NETWORKS	429
VI.5.1 Pointed sets of the nuclear configuration space nR and reaction networks	429
VI.5.2 Analysis of reaction graphs and networks of reaction mechanisms	438
VI.5.3 Theorems on shortest reaction mechanisms and reachability matrices	445
VI. 6 THE FUTURE OF COMPUTER BASED QUANTUM CHEMICAL SYNTHESIS DESIGN AND MOLECULAR ENGINEERING	453
CLOSING REMARKS	459
APPENDIX 1 REVIEW OF TOPOLOGICAL CONCEPTS	460
APPENDIX 2 PHYSICAL UNITS AND CONVERSION FACTORS	495
REFERENCES	497
SUBJECT INDEX	527
