Erratum to: Int Arch Occup Environ Health (2009) 82:417–426
DOI 10.1007/s00420-008-0339-8

We have discovered three errors in Table 1: (i) the numbers in the first two lines have been interchanged; (ii) in the last line but two the text is wrong as self-employed are not included in sample (the stated number of excluded participants is correct, though); and (iii) the figure for No

response should be changed to $N = 3,049$ and the corresponding percentage to 38.9. The corrections do not have any influence on our conclusions.

In addition to the original authors, we would also like to include Helene Feveile in the list of authors of the erratum, so that the list of authors is: Adriana Ortega, Annie Høgh, Jan Hyld Pejtersen, Helene Feveile and Ole Olsen.

Table 1 Dropouts and non respondents

	<i>N</i>	%
Randomly selected from Danish Central Office of Civil Registration	8,000	
Excluded from the study (12 had emigrated, 50 had unknown address, 62 were mentally handicapped, 37 were aboard for a longer period, 2 were dead and 3 people were also in first DPWES* cohort)	166	
Total sample	7,834	100
No response	3,049	38.9
Invalid respond; too many missing values or inconsistent data for gender and day of birth compared to the Civil Registration data	53	0.7
Valid response	4,732	60.4
Excluded; not wage earner	1,215	
Excluded; missing value for the bullying question	88	
Final population for the study	3,429
